SPECIAL INSTRUCTIONS

Note—Five-point star symbol (★) indicates Special Instructions of System application.

★ 1001. A rule referred to by number, unless otherwise specified, is a rule in the "Operating, Signal And Interlocking Rules."

STANDARD TIME

+ 1101. Eastern-Central Standard Time applies on this Division.

★ 1102. Referring to Rule 2, drivers of track cars must use reliable watches.

LETTERS AND CHARACTERS

- ★ 1201. The following letters and characters in schedules indicate:
- S —Regular stop.
- F-Stop on signal to receive or discharge passengers.
- A -Stop on signal to receive passengers.
- B-Stop on signal to discharge passengers. C-Regular stop to receive passengers.
- D-Regular stop to discharge passengers. E —Regular stop for express, mail or newspapers.
- G-Regular stop, Saturday only.
- H-Regular stop, Saturday only, to receive passengers.

- J—Regular stop, Saturday only, to discharge passengers.

 K—Regular stop, Sunday only.

 L—Stop on signal, Sunday only, to receive or discharge passengers. sengers.
- M-Regular stop daily except Saturday and Sunday.
- N-Regular stop daily except Sunday.
- No baggage service.
- -No baggage service Sunday.
- Passenger train—schedule assigned to rail motor cars.
 Passenger train—schedule assigned to handle passenger and
- freight equipment.

 O—Passenger train—No train baggageman.
- #—Indicates train that will not be operated on specified dates or holidays shown on schedule pages.

1202.

- O-Stop on signal to discharge passengers from Pittsburgh or beyond or pick up passengers for Richmond or beyond.
- Q-Stop on notice to conductor to discharge Pullman passengers from points south of Harrisburg.
- R-Regular stop week days; stop on signal Sundays to receive or discharge passengers.
- T-Stop on signal, Saturday only, to receive or discharge
- passengers. U—Stop on signal to receive or discharge passengers to or from Richmond or points west.
- W-Stop on signal to receive passengers for St. Louis and beyond.
- X—Stop on signal to discharge passengers from St. Louis and beyond.
- Y-Stop on notice to conductor to discharge passengers from Pittsburgh and east thereof.
- #-Train may leave in advance of time-table scheduled leaving time when station work is completed but not earlier than time-table scheduled arrival time.
- Δ—No train baggageman between Richmond and Fort Wayne or between Richmond and Logansport, exclusive.
- □-No train baggageman between Richmond and Indianapolis, exclusive.
- -Stop on signal to receive or discharge passengers to or from Chicago and beyond.

COLOR SIGNALS

★ 1301. At the end of two main tracks where switch is not interlocked nor spring switch is in service, when the switch is set for trains to move in normal direction, switch lamp will

display white disc (green light at night). When the switch is set against train movement in normal direction, switch lamp will display red disc (red light at night).

★ 1302. A yellow flag or light placed to the right of track indicates the approach to a portion of track covered by a slow order and is located a sufficient distance ahead of the obstruction to permit the speed of train to be reduced from maximum authorised speed to the speed required.

The end of the restricted territory will be indicated by a green flag or light.

NOTE—The requirements of Special Instruction *1302 will be considered as having been complied with when Western Region standard slow and resume boards are used instead of vellow and green flags. Yellow and green lights will be used.

HAND, FLAG AND LAMP SIGNALS

1401. An oil lamp must be used for the red light prescribed by Rule 35, Night Signals—to be used by flagman.

1402. Switchtenders at Fourth Street, Columbus Union Depot and Front Street, and signalman at Dennison Avenue use a green flag by day and a green light by night to govern eastward movements; a yellow flag by day and a yellow light by night to govern westward movements.

ENGINE WHISTLE SIGNALS

1502. Rule 14 (r) ——— o will apply:

Westward:

At Hewitt when stop will be made at Richmond for water.

Eastward:

At Thorne when stop will be made at Henry for

Westward:

Passenger trains passing West Manchester, and

Eastward:

Passenger trains passing Dunreith; supplemented by a display of red light at night, or a red flag by day, held up in the gang-way of engine will indicate the necessity for an exchange of engines at Richmond.

NOTE—The display of red light, or red flag, must be made in such a manner as not to be confusing or misinterpreted by crews of other trains.

Operator will notify train dispatcher promptly.

COMMUNICATING SIGNALS

★ 1601. When communicating signal is inoperative and cannot be put in working condition without detention, train may proceed after conductor and engineman have an understanding as to how train is to be operated.

TRAIN SIGNALS

1702. Trains of foreign railroads may display train signals as required by the operating rules of their respective railroads when on this Division.

USE OF SIGNALS

Fusees And Torpedoes

★ 1801. When a pusher engine is assisting a train, coupled behind the cabin car, and the flagman that protects the rear end of the train is riding in the cabin car, the requirements as to the use of fusees should be met by dropping them off between the cabin car and pusher engine on the track the train is using, and not between that track and an adjoining track.

1802. On account of fire hazard lighted fusees must not be displayed on bridges or trestles unless necessary to prevent an accident.

1803. Minimum number of fusees and torpedoes which must be carried as part of equipment in services indicated:

	Fusees	Torpedoes
Passenger Service	6	12
Freight Service	12	24
Engines in Road Service	3	6
Engines in Shifting Service	3	6
Track Cars	3	6

Switch Stands Not Equipped With Lighted Switch Lamps

1804. Switch stands at the following locations either not equipped with switch lamps or equipped with switch lamps not lighted:

Location	Main, Secondary Track or Siding	Switch
Front Street-Olentangy	No. 4	All switches
Olentangy-Mounds	No. 2	All switches
Bradford-West Bradford	No. 1 and No. 2	All switches
West Bradford-New Paris	Main	All switches
Clement-Hempstead	Secondary	All switches
Dayton-Lytle	Secondary	All switches

SUPERIORITY OF TRAINS

★ 1901. Eastward trains are superior by direction to trains of the same class in the opposite direction, unless otherwise specified.

GENERAL ORDERS, BULLETIN BOARDS, EMPLOYES' REGISTERS, STANDARD CLOCKS

★ 2001. Location of Bulletin Boards on this Division and other railroads where General Orders of this Division will be posted and delivered, locations of Employes' Registers and Standard Clocks on this Division, also locations on this Division where General Orders of other Divisions will be posted and delivered:

Bulletin Board	Employes' Register	Standard Clock	Location	Other Divisions

NO'	NOTE—X indicates in service.				

2002. Standard Clocks At Other Points: Train Dispatcher's Office. ★ 2003. At points where there is no designated employe on duty to witness signatures as required by Rule 75b, conductor or engineman must witness the signatures of all members of his crew.

GENERAL ORDER ZONES

* 2101. General Order Zones of this Division are as follows:

Zone A-

Between:

Division Post, Toledo Division, located 2.2 miles north of Fields, and Mounds, exclusive;

Division Post, Cleveland Division, located 6100 feet

east of Joyce Avenue, and Joyce Avenue;
High Street and Miami Crossing, exclusive.
Columbus Yards.

Zone B-

Between:

Mounds, inclusive, and Division Post, Logansport Division, located 1285 feet west of Bradford Passenger Station.

Zone C-

Between:

Bradford, exclusive, and Glen, exclusive.

Zone D—

Between:

Division Post, Cincinnati Division, located 20 feet east of Glen and Division Post, Cincinnati Division, located 50 feet west of Newman. Richmond Yards.

Zone E-

Between:

Newman, exclusive, and Division Post, Indianapolis Division, located 1885 feet east of Thorne.

Zone F-

Between:

Miami Crossing, inclusive, and Division Post, Cincinnati Division, located 939 feet west of Greene;

Xenia, inclusive, and New Paris, exclusive.

Clement and Hempstead. Dayton and Lytle.

Springfield Branch.

Qualification of Conductor Or Engineman

2102. A conductor or an engineman who has not made a trip, either in service or a special trip in such manner as to keep posted on the physical characteristics of his own division, or a part of it, or over connecting divisions used in interdivisional service within a period of six months, must not be used on such portions of the road until he has made one or more trips. In such cases it will be necessary to go over the portion of the division involved, be examined and qualified by the proper division officer.

When a conductor or engineman makes a trip (not in service) for the purpose of retaining his qualifications he must notify the Superintendent in writing, giving necessary details, and have conductor or engineman witness his certification.

Conductors or enginemen extending their qualifications by making trips (not in service) must be reexamined after the expiration of one year.

TRACK ASSIGNMENTS

2201.

Single Track

Track	Between	And
	Fields	Joyce Avenue
M-:- T:	Xenia	Division Post (Cinti. Div.)
Main Line	Xenia	Dutoit Street
	Wolf Creek	New Paris
	West Bradford	New Paris
Akron Branch	Division Post, (Cleveland Div.)	Joyce Avenue
Springfield Branch	Springfield	Xenia

2202.

Two or More Tracks

Current of traffic is as follows:

Main Line Between:	No. 4 Track	No. 3 Track	No. 2 Track	No. 1 Track
Joyce Avenue and Neliston			Westward	Eastward
High Street and Xenia			Westward	Eastward
Dutoit Street and Wayne Avenue Jct.			Westward	Eastward
Miami City Jot, and Wolf Creek			Westward	Eastward
High Street and Front Street			Westward Frt.	Eastward Frt.
Front Street and Olentangy	Westward Pagr.	Eastward Pagr.	Westward Frt.	Eastward Frt.
Olentangy and Rice			Westward	Eastward
Rice and Garrett		Westward Frt.	Westward	Eastward
Garrett and Bradford			Westward	Eastward
Bradford and Division Post (Logan. Div.)			Westward	Eastward
Bradford and West Bradford			Westward	Eastward
New Paris and 12th Street, Richmond			Westward	Eastward
Newman and Thorne			Westward	Eastward
Sandusky Branch Division Post (Toledo Divn.) and Fields			Southward	Northwar

NOTE—Tracks are numbered from south to north or east to west.

2203. Secondary Tracks of Assigned Direction

Track	From	To	Assigned Direction	Controlled by	Reverse Movements on Permission From	Note
No.1	High St.	Fourth St.	East- ward	Terminal Train- master- Union Depot Co.	Terminal Train- master- Union Depot Co.	1 2 4
No. 2	Fourth St.	High St.	West- ward	Terminal Train- master— Union Depot Co.	Terminal Train- master- Union Depot Co.	1 3 4
No. 3	Newman	Glen	East- ward	Newman	Newman	5
No. 4	Glen	Newman	West- ward	Glen	Glen	6

NOTE 1. Referring to Rule 105b:—Rule 99 will apply.

NOTE 2. Eastward movements made on signal indications at High Street. Permission must be obtained from Terminal Trainmaster, Neilston, through Signalman at High Street, to use this track at any point.

NOTE 3. Westward movements made on hand signal from switchtender at Fourth Street. Movements originating between Fourth Street and High Street will be made on hand signal from switchtender at east end Union Depot.

NOTE 4. Reverse movements on these tracks may be made when authorized in writing on message blank in following form:

	Date	Time
C. & E. Engine		has right over opposing
trains on No	track	to
		Superintendent.

Signalman and switchtenders will arrange and sign authority for such movements under direction of Terminal Trainmaster.

NOTE 5. Eastward movements made on signal indication at Newman. Permission must be obtained from Newman to use this track at any point between Newman and Glen.

NOTE 6. Westward movements made on signal indication at Glen. Permission must be obtained from Glen to use this track at any point between Glen and Newman. Westward movements will stop clear of all switches and routes at 19th Street, and not proceed unless route is seen or known to be clear and switches in proper position. Westward trains having sufficient cars to block street crossings if stopped between 19th Street and Newman, will not pass 19th Street without permission from signalman at Newman.

2204. Secondary Tracks of No Assigned Direction

Tracke	Between	And	Controlled by	Note
Clement- Hempstead (W)	Clement	Hempstead	Yard Master Dayton	
Dayton-Lytle (W)	Dayton	Lytle	Yard Master Dayton	

(W) Indicates time-table direction from point first named.

MOVEMENT OF TRACK CARS

2301. Track cars will be governed as specified by Rule 80 on portions of the division as follows:

All main tracks, secondary tracks and sidings.

★ 2302. Track cars will not operate spring switches.

★ 2304. Signalmen will not admit a one-man track car to a block which is occupied by an approaching train, nor permit any train to enter a block which is occupied by a one-man track car without instructions from the Superintendent.

Movement of Detector Cars, Burro Cranes, etc.

★ 2305. Unless otherwise provided, Rules and Special Instructions applying to movement of track cars will apply to detector cars (device for detecting defective rails), burro cranes or cars of similar type or construction, except that detector cars will display markers in accordance with Rules 19 and 19a, and will not be required to conform to speed for track cars.

Detector cars will be designated as Detector car extra, burro cranes as Burro crane extra and other cars in a like manner.

When detector cars are testing rail in manual block system territory, Rule 316 will apply to following movements.

MOVEMENT OF TRAINS

2401. Location of Train Dispatchers—Columbus.

NOTE—Movements on main tracks will be in charge of Train Dispatcher of this Division, except:

Between-

Fields and Division Post, located 2.2 miles north thereof; Joyce Avenue and Division Post, located 6100 feet east thereof;

Bradford and Division Post, located 1285 feet west of Bradford Passenger Station;

Greene and Division Post, located 939 feet west thereof; where movements will be in charge of Train Dispatcher of connecting Division and orders issued over signature of the Superintendent of that Division.

Movements on portions of the main tracks of connecting Division listed below will be in charge of Train Dispatcher of this Division:

Between-

Thorne and Division Post, located 1885 feet east thereof; and orders issued over signature of the Superintendent of this Division.

* 2402. Rule S-83: Except on portions of the railroad where Rule 261 is in effect, the information as to the arrival or departure of superior trains will be furnished on form CT1246 or by message, by the signalman at initial stations, junctions or where trains pass from one of two or more tracks to single track or by train orders if furnished to trains before arrival at the points mentioned,

Except:

At Dutoit Street, a Proceed signal displayed for eastward train will indicate that all trains due which are superior have arrived or left;

At Wolf Creek, a Proceed signal displayed for westward train will indicate that all trains due which are superior have arrived or left.

Engineman Pilot

★ 2404. Enginemen, when acting as pilots, will operate the engine of train to which assigned, unless otherwise instructed.

2405. Referring to Rule 105b:—Rule 99 will apply to movements from Shelbyville Branch to eastward siding, Dublin Junction, and from Dublin Public Delivery to westward siding, Dublin.

Referring to Rule 605:—Rule 99 will apply between High Street Interlocking Station and eastward limits of this Interlocking.

2406. At Dennison Avenue, signalman will obtain block permission and trains will enter main tracks or cross from one track to another on receipt of proper signal, given by signalman, and proceed with the current of traffic as prescribed by Rule 291, or against current of traffic after receiving train order authorizing such movement, and block permission as prescribed by Rule 361a. When a train clears the block at this point it will be reported clear by the signalman.

2407. Switchtenders, other than P. R. R. employes, are stationed at and have charge of hand operated switches as indicated:

Location	Switches
Fourth Street	Crossovers
Columbus Union Depot, east end	All Switches
Columbus Union Depot, west end	All Switches

NOTE—Trains and engines must approach switches at Fourth Street and at east and west ends of Columbus Union Depot prepared to stop and must stop clear of switches or routes unless signal to proceed is received from switchtender as prescribed by Special Instruction 1402.

2408. Switchtenders are stationed at and have charge of main track switches as indicated:

Location	Switches	
Front Street	All hand thrown switches between High Street and Low Home signal west of Front Street	

2409. Signalmen in charge of main track hand operated switches when block station is open:

Location	Switches
Fields	Crossovers and yard tracks
Neilston	End of two main tracks and crossover
Dennison Ave.	C. & O. connection and crossovers

Trains or engines must approach switches at Fields, Neilston, and Dennison Avenue, prepared to stop and must stop clear of switches or routes unless signal to proceed is received from signalman.

If necessary to change any route for which proceed indication has been given to an approaching train or engine, switch must not be changed nor proceed indication given for any conflicting movement until train or engine for which proceed indication was first given has stopped.

Signalman must not set a switch to divert an approaching train or engine until he is assured of its identity and that its speed does not exceed 15 miles per hour.

Hand Operated Switches Equipped With Electric Locks

2411. The following switches are equipped with electric lock; permission to unlock must be obtained from signalman:

1					
Location	Switch	Controlled by			
Columbus	International Harvester Co.	High Street			
Columbus	North Alley	High Street			
Columbus	Columbus Bolt Co.	High Street			
Columbus	Borger Bros. Co.	High Street			
Columbus	Fairmount Creamery	High Street			
Columbus	South Alley	High Street			
Columbus	West switch of crossover from No. 1 track to American Vitrified Products Co.	High Street			
Columbus	East switch of crossover to 88 track, Davis Ave.	Scioto			
Columbus	Wellnitz Company	Miami Crossing			
Columbus	East and west switches to Asylum	Miami Crossing			
Xenia	House Track	Xenia.			
Dayton	R. and A. Coal Company	Dayton (DE)

Dayton	East end of eastward storage track	Dayton (DE)			
Dayton	West end of westward storage track	Dayton (DE)			
Dayton	Crossover, Wayne Ave. Junction	Dayton (DE)			
Dayton	West end of eastward storage track	Dayton (DE)			
Dayton	Bulk Yard	Dayton (DE)			
Dayton	Durst Milling Company	Dayton (DE)			
Dayton	R. W. Harbaugh Company	Dayton (DE)			
Dayton	Peter Kuntz Lumber Co.	Dayton (DE)			
Dayton	P. M. Klippinger & Sons	Dayton (DE)			
Dayton	Shank Coal Company	Dayton (DE)			
Dayton	East end of Dayton Mal- leable Iron Company	Dayton (DE)			
Dayton	Miami Ice & Coal Company	Dayton (DE)			
Dayton	Malleable Warehouse	Dayton (DE)			
Dayton	Crossover Edison Ave.	Dayton (DE)			

Location	Switch	Controlled by
Dayton	New Yard	Dayton (DE)
Dodson	B. & O. connection	Control button in 'phone box
Columbus	Kelly Track	High Street
Columbus	West switch of crossover between Union Depot station lead and No. 2 track	High Street
Columbus	From No. 4 track to lower pit track, Spruce Street Enginehouse	Olentangy
Olentangy	From No. 2 track to east end of North Side, Grandview Yard	Olentangy
Grandview	From No. 2 track to west end of North Side, Grandview Yard	Mounds
Grandview	West switch of crossover	Mounds
Marble Cliff	From No. 2 track to Plant X, Marble Cliff Quar- ries Company	Mounds
Marble Cliff	West switch of crossover	Mounds
Marble Cliff	From No. 2 track to east end of Dump Track	Mounds
Marble Cliff	From No. 2 track to west end of Dump Track	Mounds
Marble Cliff	From west end of Dump Track to Marble Cliff Oil Company track	Mounds
Urbana	East end of house track	Urbana
Piqua Crossing	From No. 1 track to Storage Track (old No. 4 track)	Piqua Crossing
Piqua Crossing	North wye	Piqua Crossing
Bradford	Yard C	Bradford
Gettysburg	Storage track	Bradford
Greenville	Crossover from Main track to middle of siding	Greenville
Greenville	East and west switches to house track	Greenville
Greenville	Swift and Co.	Greenville
New Madison	From siding to Bowers Coal Co. track, Oil track, House track	Hewitt
Richmond	From No. 1 track to American Aggregates	Glen
Greenfield	Virginia Sweet Foods	Thorne
Greenfield	News Mill	Thorne
Greenfield	West switch of crossover	Thorne

Location	Switch	Controlled by
Greenfield	Conklin Lbr. Co., North	Thorne
Greenfield	Station track—east and west end	Thorne
Greenfield	Lilly Company	Thorne
Greenfield	Broadway Lbr. Co.	Thorne
Greenfield	Ice and Fuel Co.	Thorne
Greenfield	Farm Bureau	Thorne
Greenfield	Conklin Lbr. Co., So'th side	Thorne
Philadelphia	Station track	Thorne
Cumberland	West Switch to Gem West- ward Siding	Thorne

NOTE. When operating crossover from normal to reverse, the switch equipped with electric lock must be operated first; when operating crossover from reverse to normal, this switch must be operated last.

Spring Switches

★ 2412. Spring Switch is marked by disc with white background and black letters SS. Switch lamp will display green light in both directions when switch is in normal position and red light in both directions when switch is in reverse position or not properly set.

When trailing movement through spring switch is stopped before movement is completed, slack must not be taken or reverse movement made until switch has been reversed by hand.

After passing with proper authority a Stop-Signal, Rule 292; a Stop-and-proceed Signal, Rule 291; a Caution Signal, Rule 285-A, or a Yellow Distant Switch Indicator protecting a spring switch; movement shall not be made over the switch until it has been operated by hand to the proper position and switch points have been examined by a member of the crew, unless a green light is displayed on the switch lamp.

The switch must be restored to normal position after movement is completed.

Spring Switches Located:

Location	Normal Position	Route for Which Sprung	Note
Hagenbaugh	No. 1 track	Eastward movements from siding to No. 1 track	1
Garrett	No. 2 track	No. 3 track to No. 2 track	2

NOTE 1. Switch must be operated manually for westward movement into the siding.

NOTE 2. Switch must be operated manually for eastward movement into No. 3 track.

2413. Train or engine must obtain permission from signalman at Urbana to enter block from track No. 3 at Garrett, then open door of white iron box located adjacent to telephone box, press button marked START which will cause the signal for No. 2 track to display aspect of Rule 291, Fig. A, and the Homesignal for No. 3 track to display aspect of Rule 291, Fig. A. Conductor or engineman must then notify signalman at Urbana that these signals have been operated and that they display proper aspect.

Should movement of train or engine not be made and it is desired to release signals, member of train or engine crew must reverse spring switch by hand, then restore it to normal

position, notifying signalman at Urbana. Movement from No. 3 track is then prohibited until permission is again obtained and the same procedure followed as outlined in first paragraph of this instruction.

A supply of Clearance Card Form C is provided in telephone shelter.

2414. Referring to Rule 291—between:

Mounds and Piqua Crossing, Newman and Thorne, Miami Crossing and Xenia.

When a train receives a Stop-and-proceed Signal between interlocking stations, except where grade markers are displayed, the engineman or conductor must immediately communicate with the signalman from telephone located at fixed signal and be governed by his instructions.

If unable to establish communication, train may proceed governed by signal indication.

2415. While a freight train is passing an open block or interlocking station, a member of the crew must be stationed on the rear of the train to receive or deliver messages.

Train service employes in or on cabin cars must take position on platform of cabin car while train is entering, passing through, or leaving yards and be prepared to acknowledge signal from any person in the vicinity, affecting the movement of their train.

Yards and Yard Instructions

2417. Yards indicated by yard limit boards located at:

Main Line—
Xenia.......Greene to 939 feet west thereof—via
Cincinnati Divn.
Xenia to 4700 feet west thereof—via
Columbus Divn.
Clement.....240 feet west of Mile Post 12 to
Dutoit Street.
Wolf Creek...Wolf Creek to 1055 feet east of Mile
Post 20.

Post 20.

Springfield Branch—
Springfield...Springfield to 750 feet west of Mile
Post 18.
Xenia....Xenia to 7030 feet east thereof.

2418. Rule D-93 in effect as follows:

Track	Between	And
No. 1, No. 2, No. 3 and No. 4	High Street	Grandview Avenue
No. 1 and No. 2	High Street	Miami Crossing
No. 1 and No. 2	Glen	West 2nd Street west of Newman

Oscillating Head and Rear Lights

2419. When a train equipped with an oscillating red light on either engine or rear car is disabled or stopped suddenly by an emergency application of the air brakes or other causes, the oscillating red light or lights will be turned on immediately. Trains approaching from either direction must stop clear of train displaying oscillating red light or lights until it is ascertained that it is safe to proceed.

Operation of Pusher Engines in State of Ohio

2420. The operation of pusher engines behind occupied cabin cars of assembled freight trains in the State of Ohio is prohibited.

In the State of Ohio, employes and others are prohibited from riding on a cabin car when a pusher engine is operated behind a cabin car of an assembled freight train; they may ride on the pusher engine. The train shall be stopped to cut off the pusher engine.

Use of Water Station-Richmond

2421. Class T or S Engines taking water at double-plug locations, Richmond Passenger Station, will use spout as indicated:

Westward—East plug at west end of platform. Eastward—West plug at east end of platform.

Automatic Highway Crossing Signals

★ 2450. Automatic highway crossing signals at grade crossings indicate the approach of a train. These signals do not relieve enginemen from complying with Rules 14 (1) and 30. They operate when trains approach crossings with or against the current of traffic on main tracks only.

Trains approaching a highway crossing on a siding or yard track, adjacent to tracks crossing a highway protected by automatic highway crossing signals, will run carefully sounding the warning as prescribed by Rules 14 (I) and 30.

When a train passes entirely over a highway crossing protected by automatic highway crossing signals, it must not move in opposite direction over the crossing until protection is provided as prescribed by Rule 103a.

To avoid unnecessary operation of the automatic highway crossing signals, switches must not be left open, nor cars left standing on the main track longer than necessary within operating limits of such signals.

When shifting movements are made in the vicinity of a highway crossing protected by automatic highway crossing signals, or when a train is stopped, thereby operating the signals unnecessarily, every effort must be made by trainmen to avoid delay to highway traffic. When it is safe for vehicles or pedestrians to cross the track, the trainman will say "all right" and beckon to cross. At the following locations a device is provided to cut out the operation of the automatic highway crossing signals by trainmen:

men:				
Track	Crossing	LOCATION	Control Device Located	Movements
No. 1	Hudson St.	1200 feet south of Mile Post 4, San- dusky Branch	White box on post, east of tracks just north of crossing	North and South
No. 2	Hudson St.	1200 feet south of Mile Post 4, San- dusky Branch	end of relay case,	North and South
Siding (north side)	Cincinnati Ave.	Xenia	White box on post, east of crossing	Eastward and Westward
Siding (south side)	Cincinnati Ave.	Xenia	White box on post, west of crossing	Eastward and Westward
Main	Rosedale Ave.	Dayton	White box on relay case, north side, west of crossing	Eastward and Westward
Main	Hay St. Market St. Main St. Salem St.	Brookville	Box in telephone shelter, north side, west of crossing, Hay St.	Eastward and Westward
No. 1	Main St.	Hilliards	White box on tele- phone box, front of Hilliards Sta- tion building	Eastward
No. 2	Main St.	Hilliards	White box on relay case, north side, east of crossing	Westward
No. 1	Mill St.	Milford Centre	White box on post, south of Elevator track, just east of crossing	Eastward
No. 2	Mill St.	Milford Centre	White box on relay case, north of No. 2 track, just east of crossing	Westward
No. 2	Main St.	Urbana	White box on post, north side, east of crossing	Westward
No. 1	Miami St.	Urbana	White box on relay case, south side, west of crossing	Eastward
No. 2	Miami St.	Urbana	White box on Sta- tion platform	Westward
No. 1	State Route 69	1800 feet west of Mile Post 59, west of St. Paris	White box on post, south side, east of crossing	Eastward
No. 2	State Route 69	1800 feet west of Mile Post 59, west of St. Paris	White box on relay case, north side, east of crossing	Westward
Main	Harrison Ave. Central Ave. Sweitzer St. Chestnut St.	Greenville	White box on relay case, north side, west of Washing- ton Street	Eastward and Westward
No. 1	West Fifth St.	2800 feet west of Mile Post 120, Rich- mond	White box on post, south side, east of crossing	Eastward (See Note)
No. 2 and adjacent yard track (RI Storago)	West Fifth St.	2800 feet west of Mile Post 120, Rich- mond	White box on relay case, north side, east of crossing	Westward

NOTE: When indication of eastward Home signal at Newman is Stop, eastward trains on No. 1 track having

sufficient cars to block West Fifth Street, will stop west of relay case located south of No. 1 track 500 feet west of West Fifth Street. This will permit the automatic highway-crossing signals and gates to clear without use of the control device, for highway traffic to proceed over the crossing. When such train again proceeds, the operation of the highway-crossing signals and gates will cut in automatically.

When such device is used, no movement may be made over the crossing by their train until protection is provided as prescribed by Rule 103a, or the automatic operation of these signals has been restored. At Main Street, Urbana, train or engine must be at least 250 feet east of Main Street when cut out device is operated.

Employes should observe the operation of automatic highway crossing signals and report promptly to the Superintendent any failures to operate properly.

★ 2451. Electric light indicators are in service on or adjacent to instrument cases of flashing light signals and crossing bells protecting highway crossings.

Indicator light will be displayed when train is operating the flashing light signals or crossing bells. Absence of indicator light indicates normal source of power has failed and that signals or bells will be entirely dependent upon storage battery.

If indicator light is not displayed as train approaches crossing, prompt report must be made to Superintendent.

2452. XENIA—Columbus Street:

Before movements are made on yard tracks over this crossing small lever, in white control box located on either side of crossing, must be operated to cause automatic highway crossing signals to flash. After these movements are completed, lever must be placed in normal position and the control box closed and locked. Cars must not be left standing between insulated rail joints on yard tracks. These joints are painted yellow.

Cincinnati Avenue (first highway crossing west of Greene Interlocking Station);

West Street (first highway crossing west of Xenia Passenger Station, via Alpha):

Automatic Highway Crossing Signals operate when trains approach these crossings on main track, sidings and on yard tracks. Cars must not be left standing between insulated rail joints on yard tracks. These joints are painted yellow.

CLEMENT-Overlook Avenue:

Before movements are made on yard tracks over this crossing knife-switch, in white control box located on relay case west of the crossing, must be operated to cause automatic highway signals to flash. After these movements are completed, knifeswitch must be placed in normal position and the control box closed and locked.

WOLF CREEK (West of)-Riverview Avenue:

Automatic highway crossing signals operate when Lead track to Dayton Rubber Company track is occupied. Cars must not be left standing between insulated rail joints. These joints are painted yellow.

MILFORD CENTRE-Mill Street:

Automatic highway crossing signals and gates operate when elevator track is occupied. Cars must not be left standing between insulated rail joints. These joints are painted yellow.

RICHMOND-West Fifth Street:

Automatic highway signals and gates operate when industrial lead track and yard track (RI Storage) is occupied. Cars must not be left standing between insulated rail joints. These joints are painted yellow.

Protection For Public Highway Crossings At Grade

2456. Trains or engines must stop before passing over the following public highway crossings at grade and a member of the crew must protect the crossing in advance of each movement over the crossing:

Track	Crossing	Location
Secondary	Stewart, Main, Brown and Alberta Streets, Dayton	Dayton-Lytle

Rail Motor Cars

★ 2475. Rail motor cars must not use sand in automatic block system territory, except to avoid accidents. When these cars are used as trailers or are being towed, they must be placed only at end of train. If handled by passenger train, it should not consist of more than 15 cars. If handled by freight train, it should not consist of more than 35 cars.

Four-Wheel Cabin Cars

★ 2476. Four-wheel cabin cars must not be allowed to stand in an automatic block unless the block is occupied by other cars or engine. Necessary carc must be used at all interlockings and such cabin cars must not be permitted to stand alone between the signals of a block or interlocking station without permission of signalman.

Dragging Equipment Detector

★ 2478. After each actuation of a dragging equipment detector, the train crew must examine the entire train and advise the signalman when this has been done before proceeding.

2479. An indicator light displaying illuminated letters DE located on or adjacent to a distant signal indicates that the dragging equipment detector has been actuated and train must stop as soon as safe handling will permit.

MOVEMENT BY TRAIN ORDERS

2501. Train orders will be issued covering the meeting of First-Class trains on single track at scheduled meeting points, except where Rules 261, 262, 263 and 264 are in effect.

2502. A train must not leave its initial station without reporting for train orders.

2503. At Columbus, enginemen of passenger trains are relieved from reporting for train orders. Conductor will personally deliver a copy of each train order to the engineman, who will compare with the conductor by reading the train order aloud. When there are no orders or messages, the conductor will personally notify the engineman before train departs.

2504. At Dayton, conductors of all trains using tracks adjacent to station platform must call "DE" Office on telephone and ask for train orders, or instructions. If there are any train orders or messages for a train the conductor must go to "DE" Office immediately to receive them and will personally deliver a copy to the engineman. When there are no train orders or messages for the train, the conductor will personally notify the engineman.

Trains using other than the station platform tracks through Dayton, will proceed on proper signal indication without reporting for train orders.

★ 2505. While train order signal (Rule 294, Fig. B) is displayed in the direction of an approaching train or trains, it must not be passed by any such train on any track except as provided in Rule 221a.

 \bigstar 2506. Referring to Rule 221a, message form C.T. 1250 will be used.

MOVEMENT OF TRAINS IN THE SAME DIRECTION BY BLOCK SIGNALS

★ 2601. Rules 251, 253 and 254 in effect:

	Track	Between	And
	Single	Fields	Joyce Avenue
	No. 1 and No. 2	Joyce Avenue	Neilston
	No. 1 and No. 2	Miami Crossing	Xenia
	Single	Greene	Division Post (Cin. Divn.)
	Single	Xenia	Dutoit Street
	Single	Wolf Creek	New Paris
Main Line	No. 3	Front Street	Olentangy
	No. 1	Olentangy	Mounds
	No. 1 and No. 2	Mounds	Rice
	No. 1, No. 2 and No. 3	Rice	Garrett
	No. 1 and No. 2	Garrett	Bradford
	No. 1 and No. 2	Bradford	Division Post (Logan.Divn.)
	No. 1 and No. 2	New Paris,	12th Street, Richmond
	No. 1 and No. 2	Newman	Division Post (Indpls. Divn.)
Sandusky Branch	No. 1 and No. 2	Division Post (Toledo Divn.)	Fields
Akron Branch	Single	Division Post (Cleve. Divn.)	Joyce Avenue
Springfield Branch	Single	Xenia	Springfield

On two or more tracks signal indication or permission of the signalman will be authority for a train to proceed as an extra.

When a train is to run as a Passenger Extra it will be notified by the signalman, except:

At Columbus Union Depot, by Operator, RN Office.

OPPOSING AND FOLLOWING MOVEMENT OF TRAINS BY BLOCK SIGNALS

★ 2602. Rules 261, 262, 263 and 264 in effect:

	Track	Between	And
	No. 1 and No. 2	High Street	Miami Crossing
	Single	Xenia	Greene
	No. 1 and No. 2	Dutoit Street	Wayne Avenue Jet.
Main Tine	No. 1 and No. 2	Miami City Jct.	Wolf Creek
Main Line	No. 4	Front Street	Olentangy
	No. 2	Olentangy	Mounds
	No. 1 and No. 2	Bradford	West Bradford
	Single	West Bradford	New Paris

Signal indication or permission of the signalman will be authority for a train to proceed as an extra.

When a train is to run as a Passenger Extra it will be notified by the signalman.

FIXED SIGNALS

2701. Signal aspects not in conformity with the typical aspects, in service:

South of No. 1 track, 100 feet west of Mile Post 38, for spring switch, Hagenbaugh.

Signal Bridge 581, St. Paris, for spring switch, Garrett.

Distant Switch Indicator Note: Y-Yellow; G-Green

Indication-Switch open. Name—Caution Indicator. Indication—Switch closed. Name-Clear Indicator.

Block Stations indicated below are provided with illuminated sign to display white cross (and supplemental letters at designated locations) on black background, or position light signal arranged to display cross.

> Take siding indicator. Name-Indication-Take siding as indicated.

When displayed will be answered by two short blasts of the engine whistle, Rule 14 (g).

Location

Indication

Clear Main Track at Hilliards Westward Relay Yard.

Take siding at Hayden.

Take siding at Unionville.

Location

Indication

Milford Centre..... Eastward trains on No. 1 track:

Take siding at Unionville.

Take siding at Plain City.

Clear Main Track at Hilliards Eastward Relay Yard.

Indication-Take siding as directed below.

Are located at front of office and when displayed must be answered by two short sounds of the engine whistle.

X	
Location	_

Indication

Miami Crossing...... Westward trains on No. 2 track take siding London.

South Charleston Westward trains on No. 2 track take siding Wilberforce.

Mounds..... Eastward trains on No. 1 track head in No. 4 track, Grandview Yard.

Milford Centre......Westward trains on No. 2 track take siding Hagenbaugh.

Urbana...... Westward trains on No. 2 track take

siding Conover. Eastward trains on No. 1 track take

siding Hagenbaugh.

Indication—Take siding as directed below.

Indication

Piqua Crossing...... Eastward trains on No. 1 track take siding St. Paris.

CAB SIGNALS

2751. Cab Signal Rules 295 to 298, inclusive, are in effect as follows:

For movements with current of traffic and on single track.

[
	Track	Between	And
	No. 3 and No. 4	Front Street	Olentangy
	No. 1 and No. 2	Olentangy	Rice
	No. 1, No. 2 and No. 3	Rice	Garrett
Main Line	No. 1 and No. 2	Garrett	West Bradford
	Single	West Bradford	New Paris
	No. 1 and No. 2	New Paris	Richmond, 12th Street
	No. 1 and No. 2	Newman	Division Post (Indpls. Divn.)
F	or movements agai	inst the current of	traffic.
	No. 4	Front Street	Olentangy
Main Line	No. 2	Olentangy	Mounds
	No. 1 and No. 2	Bradford	West Bradford

 \star 2753. Required departure tests of engines and trains must be made before entering territory in which the use of cab signals is prescribed.

Testing sections, in addition to those at terminals, located:

Bradford.

Columbus-

East end of Yard A Classification Yard.

★ 2754. Departure test of cab signals on engines equipped for forward and backward running will be made from both ends.

When two or more electric engines are coupled in multiple, departure test will be made from front end of leading unit and trailing end of rear unit, noting that all cab signals and warning whistles are operative.

When two or more engines are coupled and it becomes necessary enroute to operate one of the engines from an end from which departure test of cab signals has not been made, the engine must be considered as not equipped.

MANUAL BLOCK SYSTEM

2801. Rules 305 to 373, inclusive, are in effect as follows, except that Rules 316 and 317 will apply only on portions of the Division as specified:

			
	Track	Between	And
Main Line	Single	Fields	Joyce Avenue
Main Line	No. 1 and No. 2	Joyce Avenue	Neilston
Sandusky Branch	No. 1 and No. 2	Division Post (Toledo Div.)	Fields
Akron Branch	Single	Division Post (Cleve. Divn.)	Joyce Avenue
Springfield Branch	Single	Springfield	Xenia

NOTE-

At Fields, Block Indication will be given by display of flag or lamp signal.

At Joyce Avenue, Block Indication will be given as follows: For eastward trains enroute to Fields—by display of flag or lamp signal;

For eastward trains originating at Pennor or Grogan enroute to Cleveland Division—by telephone.

2803. Rule 317 will apply between:

Division Post, Toledo Division, and Joyce Avenue. Division Post, Cleveland Division, and Neilston. Springfield and Xenia.

Two or more tracks—movement against current of traffic except where Rule 261 is in effect.

2805. Referring to Rule S97; Block Indication will be the authority for movements between Fields and Joyce Avenue.

AUTOMATIC BLOCK SYSTEM

2901. Rules 501 to 512, inclusive, are in effect on portions of the Division as follows:

For movements with current of traffic and on single track.

	Track	Between	And
Main Line	No. 1 and No. 2	High Street	Xenia
	Single	Xenia	Division Post (Cin'ti Divn.)
	Single	Xenia	Dutoit Street
	No. 1 and No. 2	Dutoit Street	Wayne Ave. Jct.
	No. 1 and No. 2	Miami City Jet.	Wolf Creek
	Single	Wolf Creek	New Paris

For movements against current of traffic.

	Track	Between	And
	No. 1 and No. 2	High Street	Miami Crossing
Main Line	No. 1 and No. 2	Dutoit Street	Wayne Ave. Jct.
	No. 1 and No. 2	Miami City Jct.	Wolf Creek

2915. Rules 501 to 518, inclusive, are in effect on portions of the Division as follows:

For movements with current of traffic and on single track.

	Track	Between	And
	No. 3 and No. 4	Front Street	Olentangy
	No. 1 and No. 2	Olentangy	Rice
	No. 1, No. 2 and No. 3	Rice	Garrett
Main Line	No. 1 and No. 2	Garrett	Bradford
Main Dille	No. 1 and No. 2	Bradford	West Bradford
	Single	West Bradford	New Paris
	No. 1 and No. 2	New Paris	Richmond, 12th Street
	No. 1 and No. 2	Newman	Division Post (Indpls. Divn.)

For movements against current of traffic.

Main Line	No. 4	Front Street	Olentangy		
	No. 2	Olentangy	Mounds		
	No. 1 and No. 2	Bradford	West Bradford		

NOTE—Between Bradford and West Bradford cab signals without block signals will govern movements against the current of traffic.

2916. Rule 515—following exceptions authorized in switching, transfer and other similar service:

Between-

of Piqua.

Front Street and Dennison Avenue for C. & O. Ry. passenger trains.

Front Street and Mounds.

Mile Post 45, east of Urbana, and 1320 feet west of Mile Post 48, west of Urbana. Mile Post 72, east of Piqua, and Mile Post 74, west

Non-equipped trains may be operated at normal speed between Mile Post 117, east of Glen, and 1320 feet west of Mile Post 122, west of Newman.

Passenger trains Nos. 203 and 204 and freight trains CN-7, CN-8, CN-27 and CN-28 may be operated at normal speed with non-equipped engines between New Paris and Glen.

NOTE—Signalmen New Paris, Glen and Newman will not permit a non-equipped train to enter the blocks while occupied by another train, except by train order. Westward trains stopping at Richmond Passenger Station will report to signalman, Glen, promptly, when train has cleared Twelfth Street. Eastward non-equipped trains will secure permission from signalman, Glen, before leaving Richmond Passenger Station.

2917. In the application of Rule 515 the Superintendent may authorize a train to move in cab signal territory by the use of Form C.T. 1400-B or the following form of message:

C& E extra 452 West at A.

You are authorized to operate without cab signals from A to B complying with Rule 516.

INTERLOCKING

3002. Emergency Signals—Whistle or Horn, in service as follows:

Glen. Newman.

OTHER EQUIPMENT RESTRICTIONS

Steam Suburban Cars

★ 3116. The following classes of passenger cars must not be hauled between heavier steel cars or between heavier steel cars and the engine:

Coaches	Combined Passenger and Baggage	Passenger—Baggage and Mail
P-54 MP-54 MP-54c	PB-54 MPB-54 MPB-54b MPB-54c	MPBM-54 MBM-62

NOTE—For purpose of identification, P. R. R. suburban cars of MP-54, MBM-62 types are shorter than the through service cars, and are not equipped with buffer diaphragms.

Long Island Rail Road suburban cars of P-54 type are shorter than the through service cars, but are equipped with buffer diaphragms and may be identified by means of the description on board located in toilet.

Reading Company passenger cars, all types, are subject to the same restrictions as provided for P. R. R. MP-54 types.

Cabin Cars In Passenger Train

* 3117. Cabin cars, other than all-steel construction equipped with four-wheel trucks, must not be moved in passenger, mail, express or Main trains.

Cars Utilizing Compressed Inflammable Gas

*3118. Cars utilizing acetylene, butane, propane or other compressed inflammable gas for cooking, lighting, or other purposes, must not be accepted for movement unless the pintsch or acetylene gases have been drained from the permanent containers on cars so equipped, or unless the portable containers with other types of gases have been removed.

Cars Seventy Feet Or More In Length

*3119. Cars having a stenciled length of load space of seventy feet or more, or passenger-carrying cars of P70 car length or greater, must not be coupled to cabin cars of the 2-axle type nor to cabin cars having 4-wheel trucks if the latter have couplers of the riveted yoke type.

Passenger-Mail-Express-Main Trains

- * 3120. The following restrictions must be observed with reference to physical condition of foreign railroad cars received for movement over our lines:
- (a) Passenger equipment cars of all-wood construction must not be operated in passenger, mail, express or Main trains nor accepted from foreign railroads for movement in such trains.
- (b) Cars having steel underframe with wood superstructure or having steel underframe with composite superstructure and wood sheathing must not be used for transporting passengers.
- (c) Baggage or kitchen cars with steel underframe and wood superstructure assigned in Main movement, may be moved in Main trains or exclusive express trains to any point on line except when required to operate through East and North River Tunnels, New York Division.
- (d) Passenger refrigerator cars with steel underframe and wood or composite superstructure, without lights or heating stoves, will be accepted for movement through East and North River Tunnels, New York Division.
- (e) Passenger equipment cars with trucks having wood side and end members, with or without plates bolted thereto, must not be operated in passenger. mail, express or Main trains nor accepted from foreign railroads for movement in such trains.
- (f) Cars with cast iron wheels must not be operated in passenger trains. Mail, express or Main trains having such cars must be operated at freight train speed.

Cars offered for movement in violation of clearances or any of these physical restrictions must not be accepted for movement over our lines.

Passenger Car Buffer Plates

★ 3121. Passenger train cars having continuous buffer plates must not be coupled to freight cars having coupler release levers with a center projecting arm.

Folding Steps

★ 3122. Folding steps which operate in conjunction with vestibule trap doors on passenger cars are not within the established clearance limits, unless in fully closed position or fully open position. Vestibule traps of cars equipped with folding steps must not be opened or closed while cars are in motion.

Dead Or Disabled Engines

★ 3123. Dead engines of a design having two or three pairs of drivers and no trucks, may be moved only at speeds not exceeding 20 miles per hour. Dead engines of a design having four pairs of drivers and no trucks shall be restricted to speeds not exceeding 25 miles per hour.

Two or more such dead engines in the same train shall be separated by one or more cars.

When necessary to clear the main track, engines with any main or side rods disconnected may be moved to a terminal at not exceeding the following speeds:

Class of Engines	Miles per Hour
C1 HH1 I1s I1sa J1 J1a N1s	8
N2sa J All others	15

If engines with any main or side rods disconnected while on the main track, have interference between crossheads or guide and front crank pin, on account of front wheels getting out of register, engineman must notify the Superintendent and receive instructions for further movement.

When it is necessary to move a light engine with any main or side rods disconnected, from a terminal to another point, the Master Mechanic or Road Foreman of Engines will notify the Superintendent the speed permitted before the engine is dispatched and the latter will then issue the necessary instructions.

When necessary to tow a diesel engine designed for road service, the reverser drum must be locked in neutral position. All isolation switches must be placed in "start" position. If necessary to keep power units idling, the fuel pumps and control switches must be in closed position.

The following instructions for shipment of Diesel engines dead in trains are intended to cover several types of Diesel engines and may not apply in every detail to all such engines.

- 1. The reversing lever on the master controller stand must be moved to the "Off" position and the handle locked in position or removed. Reversers shall be centered and locked in position. Isolation switches shall be placed in "Start" position. Motor cut out switches and battery switch shall be opened. The high capacity starting fuse shall be removed. The transition lever must be moved to the "Off" position before the control push button is pulled out.
 - 2. On all "A" units:
- (a) Place the dead engine cock on the control valve in "Dead" position.

- (b) Close double heading cock (Handle vertical).
- (c) Place Independent Brake Valve handle in "Release" position and remove handle.
- (d) Place Automatic Brake Valve handle in "Running" position and remove handle.
- (e) When so equipped, the safety control cock on brake valve must be in "OUT" position (Handle up).
- (f) Place the Rotair Valve handle on "Pass" position on all leading units, and on all trailing units place the handle in "Lap" or "Pass Lap" position.
- (g) The safety valve on Control Valve must be set to limit brake cylinder pressure to 30 pounds.
 - (h) The brake pipe branch pipe cut-out cock must be open.
- (i) The Shifter Lever on Brake Valve must be in "AU" position.
 - 3. On all "B" units:
- (a) Place the dead engine cock on Control Valve in "Dead" position.
- (b) When so equipped, the controlled emergency cock on Control Valve must be placed in Passenger, "P" position.
 - (c) The cut-out cock to NS-1 Reducing Valve must be closed.
- (d) Either remove or secure the Hostler's brake valve handle in "Release" position.
- (e) Open cut-out cock in the Independent Application and Release pipe under Hostler's brake valve.
 - (f) The brake pipe branch pipe cut-out cock must be open.
- (g) The safety valve on Control Valve must be set to limit brake cylinder pressure to 30 pounds.
- (h) If "B" unit is not part of a locomotive and hauled singly, remove the pipe plugs from the dual connections and open the cut-out cocks of the "Independent Application and Release," "Actuating" and "Straight Air" pipes at one end of unit to assure an atmospheric vent for these pipes.
- 4. Make certain all cocks are open on connecting hoses between all units on dead engines.
- 5. Brake cylinder piston travel must not be increased as this would result in rough handling of dead engines.
- 6. Water must be drained from the cooling and the heating systems when danger of freezing exists.
- 7. Place engine as far away from engine hauling train as is feasible, preferably next to the cabin. A new engine must not be moved at a speed greater than 25 miles per hour for at least the first 150 miles, after which speed may be increased as conditions justify. Cover exhaust stacks and close louvres to exclude dirt and water.

Roller Bearing Equipment

- *3124. Engines and cars equipped with roller bearing journals must not be operated through water, except in emergency when authorized by the Superintendent and then, only as specified below:
- (a) Steam and electric engines and cars, other than MU cars and rail motor cars, may be run through water when its depth does not exceed 7 inches (measured from top of rail) at a speed not exceeding 2 miles per hour.
- (b) MU cars, rail motor cars and diesel engines may be run through water when its depth does not exceed 2 inches (measured from top of rail), at a speed not exceeding 2 miles per hour.

USE OF TELEPHONES

★ 3501. Employes using telephones in connection with train movements must satisfy themselves that they are in communication with the proper persons and must not consider conversation finished until the persons taking part are assured that they have heard all of the conversation and that it is understood.

Persons using telephones must yield the line promptly for train movements.

If telephones fail, trainmen will use any means of communication to avoid delay.

When used for block operations, transmitting train orders or making any arrangement pertaining to the movement of their trains, the conductor, engineman or driver must personally receive all orders on the telephone and make all verbal arrangements pertaining to the movement of his train, but neither is relieved of any responsibility as prescribed by Rule 106.

Verbal arrangements and instructions in regard to trains being clear of, or desiring to occupy certain tracks, etc., must be repeated by the person receiving the information.

3502. Train and engine service employes using telephone in connection with the movement of their train will identify themselves to the signalman by giving their name, occupation, identification and location of train involved. Operators and signalmen, when answering telephone will identify themselves by name and station.

3503. Trains doing work on sidings or to be met or passed by another train or trains must place a man within hearing distance of the telephone bell in order that instructions may be given if desired.

Employes authorized to use telephones, will see that shelter boxes are properly closed after using them.

3504. Enginemen, Conductors and Drivers of track cars required to copy train orders at block-limit stations or other outlying points will preserve such copies, endorse on the face of them their name and occupation, and turn them in with their time cards at end of trip or day. The Yard Master, Crew Dispatcher or other person receiving these orders will forward them daily to Division Operator, Columbus Division, Union Station, Columbus, Ohio.

Conductors and Enginemen of other Divisions will endorse their copies of Train Orders as above and send them to Division Operator, Columbus Division, Union Station, Columbus, Ohio.

GENERAL INSTRUCTIONS

Machinery Of Rotary Or Swinging Type

★ 3601. Machinery of rotary or swinging type such as cranes, derricks, steam shovels, etc., whether loaded on cars or moving on own wheels, must not be moved in revenue trains unless form CT-310 covering the specific movement is attached, one to each side of car on which it is loaded or one to each side of the machine when moving on own wheels, and form CT-310-A is attached to the billing.

In all movements of such rotary or swinging type machinery on own wheels in revenue trains the boom end must trail, except that when necessary the Superintendent may authorize movement with boom end forward, in which event the authority will include any additional speed restrictions that may be required.

When cranes are shipped on their own wheels, all coal must be removed from the coal bunkers, and all water removed from the boilers and reservoirs. When boom is detached the light end of crane should trail. Where trucks are secured to body with keyed or nutted center pin, key or nut should be removed from pin on trailing end. All locking pins and hold-downs must be in secured position.

When pivoted machinery, equipped with swinging booms of which a part may swing or extend outward, is moved from one service point to another in work trains, boom anchors and cables must be in place and locking devices fastened. When such equipment is moved during the progress of work on or about main tracks, stops must be in use to prevent fouling adjacent tracks, and crane operator must be in cab.

Boom must be securely anchored, with center lock in place, and crane operator must be in cab while train movements are being made on adjacent tracks.

Heavy Machinery Over Tracks At Grade Crossing

★ 3602. To provide against possible accident to railroad property, and insure the safe passage of heavy machinery or implements at grade crossings, special provision should be made to protect such movement over the tracks.

Agents and foremen should keep closely in touch with such matters and give the Supervisor of Track advance information to enable him to make proper arrangements with the owners or those in charge of the equipment to insure full protection is afforded while tracks are to be crossed.

3605. Trainmen must not pass over container cars while cars are in motion.

3606. A sufficient number of hand brakes must be applied on cars or cuts of cars left standing on any track to make them secure. When necessary and practicable, car wheels must be blocked.

Overhead Clearance

* 3610. Employees are warned of close overhead clearance at the following locations and must not go on top of box cars, engines or other high equipment while movements are being made under these bridges or structures, except at locations marked thus (*) where it will be permissible when engaged in classification or switching when extreme care must be exercised to avoid possibility of personal injury.

*Coal Wharves and Sand Houses at St. Clair, Spruce Street, Xenia and Richmond Enginehouses and Bradford Coal Docks.

Spectacles With Colored Glass

* 3615. The use of spectacles with colored glass by employes whose duties require them to distinguish the position or color of signals is prohibited.

Observation Of Train For Defects

3620. Referring to Rule 77, a train must be stopped when it is observed with any of the following defects or other indications of conditions endangering the train:

> Hot Journal Sliding Wheels Broken Wheels Defective Trucks Dragging Brake Connection
> Lading Shifted Over Side Or End Of Car Swinging Car Door

Hog Drenchers

3622. From May 1st to October 1st, whenever the temperature reaches 70 degrees above zero or over, cars loaded with hogs must be sprayed or drenched enroute. Care must be exercised that water is not sprayed on hogs.

Drenchers are located as follows:

Bradford. Yard A. Columbus.

Notation must be made on billing showing points and time at which hogs were drenched.

Delay Involving Equipment—Freight Trains

3623. When freight trains are delayed by reason of broken couplers, draft rigging or end of a car pulling out, air hose bursting, defective train lines, undesired quick action of air, hot boxes, train parting or other defects, conductors will be careful to give the following information in a report to be sent to Superintendent from first telegraph or telephone office from which the report can be sent, without serious delay to the train:

- Date of accident.
- Train number.
- Direction train was moving.
- Place where accident occurred.
- Engine number and whether pulling or pushing train.
- Number of loaded and number of empty cars in train.
- Whether train was stopping or starting. Initials and number of car, kind of car, end of car damaged, whether loaded or empty.
- Location of car in train.
- Disposition made of car. 10.
- If loaded give lading, tonnage, consignor, consignee and destination.

PERSONAL INJURIES

* 3701. Emergency calls for surgeons will have preference over other business, except train orders and power emergency calls.

Employes injured on company property or while on company business, will be treated by the nearest physician named in the following, without cost. If hospital attention is necessary, they should be sent, if practicable, to one of the hospitals named in the following.

Passengers or others injured on company property will receive first attention by the Medical Examiner or Company Surgeon, without cost; at points where it is impossible to obtain their services, the company will be responsible for the cost of reasonable surgical attention by an outside surgeon for the first services rendered, subsequent attention will be determined by direction of proper official.

3702. Medical Examiners and Company Surgeons

THE PENNSYLVANIA RAILROAD COLUMBUS DIVISION

Columbus, Ohio, April 20, 1948.

GENERAL ORDER No. 1001

Effective { 1.01 A. M. E. S. T. } Sunday, April 25, 1948.

Applies in All Zones

(a) Time-Table No. 10 in effect. It contains the necessary instructions issued in General Orders up to and including No. 910, all of which must be removed from bulletin boards. Each employee must examine Time-Table No. 10 to see that his copy is complete with all schedule pages properly lined up and note changes in schedules and Special Instructions. Employes must turn in Time-Table No. 9 to bulletin board attendant, after Time-Table No. 10 takes effect.

Applies in Zone A

(b) MAIN LINE

COLUMBUS

Trains Nos. 6041 and 6050 stop on signal at St. Clair Avenue to receive and discharge employes.

(c) MAIN LINE

GRANDVIEW AVENUE AND URLIN AVENUE

Highway Crossing Signals (flasher-light type), manually operated by crossing watchman in watch-tower located west of Grandview Avenue north of No. 2 track, in service. Trains stopped west of Urlin Avenue must not move eastward over this crossing until crossing watchman has been notified that train is about to proceed. The crossing watchman will then cause the flasher lights at this point to operate, after which the train may proceed over the crossing.

This General Order is printed in Time-Table No. 10 and will not be issued in sticker form.

W. H. MAPP, Superintendent.

the nation's needs, railroads should be permitted to earn a return of not less than

to keep them up to
