### TIME TABLE

#### SYMBOLS

#### S-3.

**S-3-A.** The following symbols will be used as indicated by Rule 5:

- Ⓐ Ⓑ Ⓒ Ⓓ, etc.
- Ⓐ No. 604 meets 617 and 621 when on time.
  - Ⓑ No. 240 take siding at Central Islip to meet No. 211.
  - Ⓒ No. 14 take siding at Hampton Bays to meet No. 19.
  - Ⓓ No. 4286 take siding at Southold to meet No. 4215.

#### S-4. LETTERS AND CHARACTERS

**S-4-A. Rule 6 amplified.**

The following letters and characters indicate:

- S—Regular stop.
  - F—Stop on signal to receive or discharge passengers.
  - A—Stop on Monday.
  - B—Reduce speed to receive newspapers.
  - C—Flag stop to receive or discharge New York, Brooklyn or Jamaica passengers.
  - D—Regular stop to discharge passengers.
  - E—Stop on Saturday.
  - G—Stop on Friday.
  - H—Stop Oct. 13, Nov. 4, 27, Dec. 25, Jan. 1, Feb. 12, 23 and May 30.
  - J—Stop except Sundays.
  - K—Stop on Sunday.
  - L—Stops Saturdays, Oct. 13, Nov. 4, Feb. 12-23.
  - N—Stop on Nov. 27, Dec. 25, Jan. 1 and May 30.
  - P—Stop on Oct. 13, Nov. 4, Feb. 12 and 23.
  - R—Regular stop to receive passengers.
  - T—Stop on Saturday and Oct. 13, Nov. 4, 27, Dec. 25, Jan. 1, Feb. 12, 23 and May 30.
  - U—Stop July 4 and Sept. 1.
  - V—Stop Saturday, July 4 and Sept. 1.
  - W—Stop Sunday and July 4 and Sept. 1.
  - No baggage service.
  - †—Unattended block station.
  - ‡—Time shown for information only.
  - ◆—Connections Saturdays only.
  - \*—Connections except Saturday.
  - \*—Connections Ex. Sundays
  - △—Connections Sunday only.
- Trains scheduled to stop at MP-Tower will stop at Dunton station.

#### S-5.

### COLOR SIGNALS

**S-5-A.** At the end of double track where switches are not interlocked, when the switch is set for trains to move in normal direction, switch lamp will display white disk (green light at night). When the switch is set against train movement in normal direction, switch lamp will display red disk (red light at night).

#### S-6.

### HAND, FLAG AND LAMP SIGNALS

**D-601.** When a blue flag or blue light is placed at one or both ends of an engine, or cars to which an engine is attached, the engineman and fireman must be notified; they must also be notified when the blue flag or blue light is removed. (Rule 26 amplified.)

**D-602.** When an engine with or without cars is detached from its train for any cause at night or when weather conditions require, a white light must be placed on the front end of the leading car of the portion left standing.

Conductor and engineman will be held equally responsible for complying with this rule.

**D-603.** Switchtenders in charge of main track switches, who are required to give signals to trains moving on main tracks, will use a green flag by day and a green light by night to give proceed signals.

**D-604.** Rockaway Park—Switchtenders to give proceed signals will use a green flag by day and a green light by night for westward movements. A yellow flag by day and a yellow light by night for eastward movements.

#### S-7.

### ENGINE WHISTLE SIGNALS

**D-701.** Rule 14 (db) — — — — o o will apply:

- Between WJ-Tower and H-Tower, North Side Branch.
- Between WJ-Tower and White Pot underjump, Rockaway Beach Branch.
- Between Springfield Jct. and Lynbrook, Atlantic Branch.
- Belmont Jct., Central Branch.
- HC-Tower, Hempstead Branch.
- Hammel, Rockaway Beach Branch.
- Eastport Jct., Manorville Branch.
- Fresh Pond, Bushwick Branch.
- Mineola, West Hempstead Branch.
- Bethpage Jct., Central Branch.
- Bridgehampton, Sag Harbor Branch.
- DF-Tower, Bay Ridge Branch.
- BS-Tower, Montauk cut-off.

Rule 14 (eb) — — — — o o will apply:

- JC-Tower, Whitestone Branch.
- Between WJ-Tower and H-Tower, North Side Branch.
- White Pot underjump and WJ-Tower, Rockaway Beach Branch.
- Between Lynbrook and Springfield Jct., Atlantic Branch.
- Lynbrook, Long Beach Branch.
- Bridgehampton, Sag Harbor Branch.
- Floral Park, Hempstead Branch.
- Bethpage Jct., Central Branch.
- Hicksville, Wading River Branch.
- Manorville, Manorville Branch.
- Valley Stream, West Hempstead Branch.
- BJ-Tower, Central Branch.
- Hammel, Rockaway Beach Branch.

Rule 14 (da) — — — — o will apply:

- Valley Stream, Far Rockaway Branch.
- J-1 Block Station and J-3 Block Station—No. 5 Track.
- FW-Tower and HU-Tower—No. 3 Track.

Rule 14 (ea) — — — — o will apply:

- Valley Stream, Far Rockaway Branch.
- Mineola, Oyster Bay Branch.
- J-1 Block Station and J-3 Block Station—No. 5 Track.
- FW-Tower and HU-Tower—No. 3 Track.

Rule 14 is amplified as follows:

- Rule 14, (p) o o o o o — Call Inspector.
- Rule 14, (q) o o o o o o — Call Drill Crew.

**D-702.** Rule 14 (l) amplified: — — o o; approaching public crossings at grade, to be prolonged or repeated until crossing is reached, unless otherwise provided; also when view is obscured by weather or other conditions, approaching interlocking plants, stations, yards or other points where men may be at work on tracks.

**D-703.** Rule 14 (m) will not apply.

**D-704.** Rule 14 amplified. (ma) — o double, three or more tracks when running against the current of traffic. (1) Approaching stations, curves, or other points where view may be obstructed. (2) Approaching passenger or freight trains and when passing freight trains. (3) Preceding the signals prescribed by Rules 14 (d), (da), (db), (e), (ea) and (eb), flagman for train against the current of traffic on that track may return as prescribed by Rule 99.

**D-705.** Rule 16-J amplified oooooo when standing deplete brake pipe pressure.

### S-8. EMERGENCY WHISTLE AND HORN SIGNALS AT INTERLOCKING PLANTS

### S-9. COMMUNICATING SIGNALS

**D-901.** If the communicating signal fails on a passenger train, and cannot be put in working condition without detention, the train may proceed with the communicating signal out of service; in such cases the conductor and engineman must be notified and have a clear understanding as to how the train is to be handled.

### S-10. TRAIN SIGNALS

**D-1001.** Rule 21a will apply on double, three or more tracks.

**D-1002.** Rule 17a amplified by adding:

(g) Approaching a fixed signal affecting the movement of the train when the weather conditions are such that, in the judgment of the engineman, his view of the signal will be thereby improved.

**D-1003.** Rule 19 modified as follows:

Engine running forward or backward by day without cars or at the rear of a train pushing cars will display two yellow flags instead of marker lamps to indicate the rear of train. Diagrams 2, 9 and 13 changed accordingly. New York, New Haven & Hartford crews will obtain yellow flags at FN and NU Towers, same to be left with the Towerman at FN or NU-Towers after completing movement. Towerman must report all cases not complied with.

Trains using Bay Ridge Branch, tracks 3 and 4, between FN and MJ-Tower, with the current of traffic will display to the rear a yellow light on the left side and a red light on the opposite side.

Marker lamps will be displayed from the brackets located on the lower panel of MP-41 cars.

### S-11. USE OF SIGNALS

**D-1101.** Night signals will be displayed on rear of trains by day in East New York tunnel, Bay Ridge Branch, East New York tunnel and Nostrand Avenue tunnel, Atlantic Branch.

**D-1102.** Enginemen and conductors of trains scheduled to make flag stops, will assure themselves that there are no passengers before passing the station without stopping.

**D-1103.** When a pusher engine is assisting a train coupled behind the cabin car and the flagman when protecting the rear end of the train is riding in the cabin car, the requirements as to the use of fuseses should be met by throwing the fusees off between the cabin car and pusher engine on the track the train is using and not dropping them between that track and an adjoining track.

**D-1104.** In complying with Rule 34 in calling fixed signals, the name as it appears in the Book of Rules shall be used, omitting the word "signal" except when calling a "stop signal."

### S-12. SUPERIORITY OF TRAINS

**D-1201.** Between 12.01 A.M. and 12.01 P.M. westward trains are superior to eastward trains of the same class; between 12.01 P.M. and 12.01 A.M. eastward trains are superior to westward trains of the same class.

**D-1202.** A delayed regular train is superior by direction to an opposing train that is to be run by the same engine and crew.

**D-1203.** On running track through Richmond Hill Yard from Lefferts Avenue to MP-Tower eastward movements shall have preference.

### S-13. BULLETIN BOARDS

**D-1301.** Location of bulletin board points where all general orders, including New York Division Zone-A general orders will be posted and delivered as indicated below.

|                       |                                    |

### S-14. GENERAL ORDERS

**S-14-A.** Rule 75 amplified.

**D-1401.** 1. Conductors and enginemen must have a copy of all General Orders that pertain to any portion of a General Order Zone over which they are qualified to run either in part or as a whole. Conductors and enginemen will not be required to understand a General Order pertaining to territory over which they are not qualified to run.

The qualification page following the instructions under caption "Miscellaneous" in each conductor and engineman's Home Division time table must show their Home Division, Name, Occupation, and all General Order Zones over which they are qualified to run either in part or as a whole. If a conductor or engineman is qualified to run over a Foreign Division, the qualification page in their time table for that Division must show General Order Zones of that Division over which they are qualified to run.

The Bulletin Board Attendant will be governed accordingly in checking time tables.

2. The Bulletin Board Attendant will supervise the handling of the employes register, matters pertaining to General Orders and delivery of time slips to conductors and enginemen.

He must personally witness the signatures of conductors and enginemen on their register, personally inspect time tables to ascertain that they contain all General Orders as outlined in paragraph (1), punch and insert sticker copies of such General Orders in time tables, and, after each conductor and engineman has registered and has his time table verified as to containing all copies of General Orders required, he will

cancel the figures on Form "Z" so as to indicate the date of reporting for duty and numbers of necessary General Orders, then deliver to the person presenting the time table and Form "Z" his time slip and Form "Z" properly prepared.

An additional Form "Z" card or cards must be used if a conductor or engineman is qualified to run over more than eight (8) General Order Zones and a notation made following his name indicating the number of cards.

If a conductor or engineman reports for duty at a point where the General Orders received do not cover all the territory over which he is qualified to run, the General Order Clearance received there does not apply to territory not covered by General Orders sent there and he must not run over such territory until after having received General Order Clearance at a point to which General Orders covering it are sent, unless otherwise instructed by the Superintendent of that territory.

The use of a receipted card furnished by the Bulletin Board Attendant, and as referred to in Rule 75, will be discontinued. The method of preparing Form "Z" is as follows: To indicate date of reporting for duty, cancel the star under proper date; however, if a conductor or engineman reports for duty twice on the same date, cancel the figure or figures of that date to indicate the second time reporting for duty. To indicate General Order information, cancel the star under proper number. The figures 1 to 9, inclusive, represent the last figure of numbers above an even hundred, and from 10 on the last two figures above an even hundred. The use of this punch must be confined to the Bulletin Board Attendant.

When a new time table is effective, or, after a Form "Z" card is used up, it must be turned in to the Bulletin Board Attendant, who will prepare a new card as follows:

At the end of a month, with no change in time table, prepare a new card in such a manner as to show the same General Order Information as was shown on the old card, and proper information for the first trip.

When a new time table is effective, the information shown on the old Form "Z" card need not be shown on the new one, but proper information for the first trip must be shown.

Cards turned in must be sent to the Superintendent by the Bulletin Board Attendant.

3. Before starting out on a run the engineman must show his General Orders to his fireman, and when he has no conductor he must also show his Form "Z" to his fireman. The conductor must show his General Orders to his trainmen.

4. When conductors and enginemen compare time, as required by Regulations 803, 806 and 818 they must in addition be governed as follows:

- (a) Check the qualification page in each other's time tables to determine necessary qualification information for that trip.
- (b) Check the latest General Orders in each other's time tables.
- (c) Compare their Forms "Z" for that trip.

5. In the application of these instructions, a pilot will be regarded the same as a conductor or engineman.

6. The foregoing instructions apply to conductors and enginemen when serving in that capacity.

All qualified conductors and enginemen, when not serving in that capacity, must be provided with a Form "Z," and when they register at the beginning of each day's work, present to the bulletin board attendant their time tables and have necessary General Orders inserted, also present their Form "Z" to be punched as provided by instructions covering conductors and enginemen serving in that capacity.

These instructions also apply to book of special instructions for such employes as are not furnished New York Division Time Tables.

**D-1402.** General Order Zones of this railroad are as follows:

- Zone B. "FN" interlocking to Bay Ridge inclusive.
- Zone C. All territory not covered in Zone B.

General Orders for each Zone will be numbered consecutively, followed by the proper Zone letter. Example—General Order No. 113-1, Zone B.

#### S-15. TRACK ASSIGNMENTS

**D-1501.** Where double track is used the tracks will be numbered, westward No. 1, eastward No. 2.

#### DOUBLE TRACK

Long Island City to H-Tower.  
H-Tower to G-Tower (North Side Branch).  
MT-Tower to OY-Tower.  
HN-Tower to S-Cabin.  
FK-Tower to HC-Tower.  
Long Island City to Y-Cabin (Montauk Branch).  
JE-Tower to WL-Tower.  
Penna. Ave. (Atlantic Branch) to signal AB-39 (Bay Ridge Branch).  
WJ-Tower to CV Block Station (Rockaway Beach Branch).  
WD-Tower to Rockaway Park.  
WT-Tower to BA Block Station (Rockaway Beach Branch).  
HU-Tower to HJ-Tower.  
VA-Tower to FW-Tower.  
FK-Tower to PW-Interlocking.  
MJ-Tower to NU-Tower.  
DF-Tower to FN-Tower.  
Laurelton to Cedarhurst (South Shore Branch).  
FT-Tower to CN-Tower.  
WT-Tower to MP-Tower.

**D-1502.** On three or more tracks the current of traffic is as follows:

##### Eastward Express

No. 2 H to J.  
No. 2 Cabin "J4" to FK.  
No. 2 CV to WD.  
No. 2 MP to J.  
No. 2 CN to WT.  
No. 2 MJ to FN.

##### Westward Express

No. 1 J to H.  
No. 1 FK to Cabin "J4".  
No. 1 WD to CV.  
No. 1 J to MP.  
No. 1 WT to CN.  
No. 1 FN to MJ.

##### Eastward Local

No. 4 H to J.  
No. 4 Cabin "J4" to FK.  
No. 4 CV to WD.  
No. 4 MP to J.  
No. 4 CN to WT.  
No. 4 MJ to FN.  
No. 2 FW to HU.

##### Westward Local

No. 3 J to H.  
No. 3 FK to Cabin "J4".  
No. 3 WD to CV.  
No. 3 J to MP.  
No. 3 WT to CN.  
No. 3 FN to MJ.  
No. 1 HU to FW.

No. 3 middle track between FW-Tower and HU-Tower, trains will run by block signals whose indications will supersede time-table superiority and take the place of train orders.

**D-1503.** The Creedmoor Branch, Central Extension HC-Tower to Bethpage Jct., Bethpage Jct., to Bethpage and Manhattan Beach Branch will be operated as sidings as provided in Rule 90.

**D-1504.** The middle track between J-Tower and Signal S-79 will be operated as a siding under the control of towerman at J-Tower.

Train and engine crews before using main track switches or siding at this point must obtain permission from the towerman at J-Tower by telephone located at Signal S-79 or crossover at coach yard. Eastward Montauk Branch trains finding Signal S-79 in stop position will call J-Tower by telephone and be governed by instructions of towerman as to whether to proceed on track No. 2 or use siding to home signal at J-Tower.

#### S-16. MOVEMENT OF TRAINS

**D-1601.** Rule 83. Unless otherwise provided the information required by Rule 83 must be obtained by clearance message CTL-1246 given by operator, or by train order given by dispatcher.

Rule 83 will not apply on portions of the railroad operated under Rules 251, 253 and 254.

**D-1602.** The general definition of an extra train is modified as follows:

Extra—for any extra train except passenger train extra or work train extra.

Passenger Extra—for passenger train extra.

Work Extra—for work train extra.

**Rule 97-a amplified:** On double, three or more tracks trains carrying passenger equipment, not representing a schedule, will run passenger extra without train orders when proper signal is displayed or permission is given by towerman, station master or yard master.

**D-1603.** Rules 251, 253 and 254 will apply on double, three or more tracks. Stops made for water, to give hot boxes attention, etc., will be considered work under the provisions of Rule 253.

**D-1604.** In complying with Rule 221A, and when receiving Clearance Message (Form C. T. L. 1246) and Clearance Card (Form K), speed must be reduced to not exceeding 20 miles per hour until after orders are received.

**D-1605.** Between FT and VD-Towers, between JE, J and MP-Towers, and between H and F interlocking on Long Island Railroad track No. 2, trains will proceed against the current of traffic upon receiving proper signal indication. Rules 81, 251 and 605 amplified accordingly.

**D-1606.** When necessary to detour scheduled trains between VA and JE-Towers, trains will proceed on receiving proper signal indication at either of the above points, will run passenger extra while using other route and will resume regular schedule number when returning to their respective route, unless otherwise instructed. Trains detoured with stops at St. Albans or Springfield Gardens will stop at Locust Manor and Higbie Avenue. A train detoured with stops at Locust Manor or Higbie Avenue will stop at St. Albans and Springfield Gardens.

**D-1607.** The third track between Cedarhurst and FW-Tower will be operated as a freight running track. Permission must be obtained from the towerman at FW to use this track; trains must not be given permission to use this track when occupied by stored equipment, without full understanding between towerman and train crews. Trains using this track must run prepared to stop within range of vision. Engine or trains must not foul this track at Far Rockaway without proper protection.

**D-1608.** Between HJ-Tower and Rockaway Park trains may be spaced one minute apart and must run prepared to stop within range of vision.

**D-1609.** Bay Ridge Branch, signals B-62 and B-70, govern movements of trains through East New York tunnel; B-62 at the north portal for westward trains and B-70 at the south portal of tunnel for eastward trains.

Trains must not pass these signals in stop position unless authorized to do so by the Dispatcher; before giving such permission the Dispatcher, if the cause for signal not clearing is not known, must arrange for member of crew to inspect track through tunnel and report condition.

**D-1610.** Trains receiving proceed signal for No. 4 track from suspended signal on Bridge B-90 or Bridge AB-39, will proceed with right over opposing trains over that portion of No. 4 track between Signal Bridge B-90 and AB-39.

Trains en route Atlantic Branch to Bay Ridge Branch will obtain permission from towerman at NO-Tower by telephone located near Signal Bridge AB-39 and will proceed to NO-Tower upon receiving proper signal indication.

Westward trains using crossover at Pennsylvania Avenue, Atlantic Branch will obtain permission from and report clear to towerman at VD-Tower. Trains using this crossover from No. 2 track to No. 1 track will obtain permission from towerman at CN-Tower and report clear to towerman at VD-Tower.

Color light signal, located at clearance point of connection leading from the Bay Ridge Branch to the Atlantic Branch at former "PR" Cabin governing movements from No. 2 track Bay Ridge Branch. When switch is set normal for movement on Atlantic Branch signal will indicate Stop; when switch is set for movement from the Bay Ridge Branch signal will indicate Caution—Slow Speed. Permission must be obtained from the Towerman at "VD" before switch is set for movement from the Bay Ridge Branch.

**D-1611.** Between BS-Tower and BJ-Tower, Montauk Branch, and B-Tower and PW Interlocking main line, crews must obtain permission to enter main track or use crossovers, outside of interlocking plants, and must report when clear of the main track and when crossover movement has been completed and switch locked in normal position.

Telephones are located at the crossovers and switches leading to the main track.

Towerman will not permit a train to enter a block or crossover at a hand-operated switch between automatic block signals, without permission from the Superintendent if there is a train between the switch where the train is to enter the block and the next station in the rear where the towerman is located, or if such movement has been authorized.

When a train has been given permission to enter a block or crossover at a hand-operated switch between automatic block signals, the towerman in the rear must know that it has entered the block before admitting any other train to the block, either at his station or any intermediate point.

Towerman will arrange with conductors or enginemen of trains, desiring to enter a block or crossover at a hand-operated switch between automatic block signals, to give him information regarding passing trains on the main track, and will also arrange with them, after having received permission for their train to enter a block, to advise him when such movement has been made.

**D-1612.** Enginemen must personally handle the engine while loading and unloading floats and while making movements on coal wharves.

**D-1613.** From time to time semaphore type signals will be changed to position light signals in the same location and non-interlocked crossovers will be equipped with center locking devices with operating lever located in center of track.

**D-1614.** When a train is stopped by a signal at which an automatic train stop is located, after complying with Rules 509 and 629, to enable the train to proceed the conductor or engineman or such person as they may designate must at once place the release key in slot in the side of small iron case and turn key to right. The housing for release key is fastened to case of releasing mechanism and locked by switch lock.

This releases the automatic stop arm so that it will not trip the train stop valve, but the key must be held to the right until engine has passed over stop. With multiple unit equipment it must not be released until the entire train has passed over the stop.

If for any reason the automatic stop arm cannot be released by using release key, the conductor or engineman will immediately notify the Train Dispatcher by telephone and secure permission to pass same in tripping position. When this occurs care must be exercised to avoid damage to train.

When a train handled by an engine has one or more engines assisting at rear of train, the automatic train stops on the assisting engine or engines must be made inoperative by closing cut-out cocks in brake pipe leading to automatic train stops. This must be done before movement is started.

After assisting service has been completed, the cut-out cocks must be immediately opened to restore normal operation.

Trains operating in either direction where automatic train stops are in service must have engine or head car equipped with automatic tripping device. On the eastward and westward home signals at Broad Channel Draw Bridge and HJ-Interlocking; on automatic signals R-131, 144 and 143 when aspect figure 3, page 102 aa Book of Rules is displayed it will not be necessary to key by automatic train stop located at these signals. If lower light is not lighted, it will be necessary to key by.

Broad Channel, Rockaway Beach Branch. Automatic train stops in service and located at automatic signals R-131, R-144, and home signals governing eastward and westward movements over drawbridge.

HJ-Interlocking. Automatic train stops in service and located at automatic signal R-143, and home signals governing eastward and westward movements to and from Far Rockaway Branch and Rockaway Beach Branch over drawbridge.

Powell's Creek Drawbridge, Long Beach Branch. Automatic train stops in service on eastward and westward home signals governing movement over drawbridge.

Wreck Lead Draw Bridge automatic train stops in service on eastward and westward home signals governing movement over Draw Bridge.

**D-1615.** Broad Channel, Main Street and Douglaston Drawbridges —Position light type dwarf signals, and at Powells Creek Drawbridge, color light type dwarf signals, governing reverse movements over drawbridge in service in stop position.

Trains will be permitted to pass these signals in stop position by hand signal given under direction of drawbridge tender by trainman stationed on track on which movement is to be made, after Conductor or Engineman has been advised by the drawbridge tender that bridge is locked for movement.

Between the hours of 3.00 P.M. and 7.00 A.M., when Powells Creek Drawbridge is unattended, Conductor or Engineman must examine drawbridge and obtain permission from Dispatcher, Jamaica, before passing these signals.

**D-1616.** All movements to and from Long Island City via the Third Street Running Siding will be controlled by F-Tower.

Westward movements via Third Street Running Siding will be controlled by the display of proper interlocking signal controlled from F-Tower, and located at the west end of Loop Track No. 1.

To complete westward movement from the Third Street Running Siding to Long Island City Passenger Yard, between the hours of 7.00 A.M. and 5.00 P.M. daily, except Sunday, when Assistant Yard Master is on duty at Long Island City Passenger Yard, permission to enter and run over the Eastward Main Track at Third Street must be obtained from the Assistant Yard Master, Long Island City Passenger Yard, in addition to complying with Special Instructions D-1804.

Jamaica, N. Y., October 2nd, 1930

## GENERAL ORDER NO. 113-6, ZONE C

Effective Wednesday, October 8th, 1930

OYSTER BAY AND WEST  
HEMPSTEAD BRANCHES

Before making movements over street crossings specified below, a trainman must precede such movement to warn the public of approaching engines or cars. Special Instructions D-1619 amplified.

Westward movements must report clear of Third Street Running Siding to Operator at F-Tower. (Telephone extension New York 52.)

Eastward movements from Long Island City must not enter the Third Street Running Siding before first securing verbal permission from the Operator at F-Tower.

Telephone connection with Assistant Yard Master and H-Tower is located adjacent to the switch at the west end of siding. Telephone extension L. I. C. 26 located in Assistant Yard Master's Office, L. I. City Passenger Yard. Office is locked with standard switch lock.

**D-1617. JAMAICA STATION.** A light indication system for starting trains at Jamaica is in service.

This system consists of a series of blue lights placed 60 feet apart on platform 1, tracks 1 and 2; platform 2, tracks 2 and 3 westward; on platform 4, tracks 6 and 7; platform 5, tracks 7 and 8 eastward. Train crews will place themselves in position on station platform at Jamaica where these lights can be observed and immediately upon their being lighted will close doors and pass signal to start train.

This starting system will be operated between the hours of 6.30 A.M. and 9.30 A.M. westward, 4.00 P.M. and 8.00 P.M. eastward daily except Saturday and Sunday. Saturday—westward between the hours of 6.30 A.M. and 9.30 A.M., eastward between the hours of 12 noon and 8.00 P.M.

Rule 92 modified accordingly insofar as it relates to the operation at Jamaica Station.

**D-1618.** Engines moving under steam after side rods have been disconnected or removed while on main track or en route.

Engine Class     Maximum speed miles per hour

All engines     15

When engines have interference between crossheads and front crank pins on account of wheels getting out of register when side rods are removed while on main track or en route, engineman must notify the Superintendent and receive instructions for further movement.

However, when it is necessary to move a light engine with side rods removed from a terminal point to another point, the Master Mechanic or other proper authority will notify the Superintendent the speed permitted, before the engine is dispatched, and the latter will then issue necessary instructions.

**STREET CROSSING PROTECTION**

**D-1619.** Before making movements over STREET CROSSINGS specified below, a trainman must precede such movement to warn the public of approaching engines or cars.

**D-1620.** When trains are run against the current of traffic, extreme care must be exercised by the engineman when approaching STREET CROSSINGS protected by Standard Light Signals and Automatic Alarm Bells. Speed should be reduced sufficiently and sufficient warning given with engine whistle and bell to prevent accident to persons or, or working about tracks, keeping a sharp lookout for any vehicles that might be attempting to cross tracks. Crossing warnings do not operate when movements are made against the current of traffic and on sidings close to main track.

**D-1621.** Hammal. Before making movement over 82nd Street crossing "South leg of Wye," a trainman must precede such movement to warn the public of approaching engine or cars.

**D-1622.** Trains running against the current of traffic must stop before passing over street crossing at Flushing Avenue, MV-Tower.

**D-1623.** Where flashing light signals and/or warning bells are located at highway crossings they indicate movements on main track only. When movements on sidings at such points are made, a trainman must be stationed on crossing to give warning to persons using same.

**D-1624.** A trainman must be stationed on Railroad Avenue crossing Islip to warn persons using same while shifting moves are being made over this crossing on siding or crossover, as crossing signal will not operate when siding switch or crossover is reversed.

Eastward trains leaving a portion of their train on the main track while shifting will leave such portion 840 feet west of Grand Avenue the second crossing west of Islip Station.

NA-Tower—position light dwarf signals located opposite home signals, governing reversed movements on Nos. 1 and 2 tracks in service and in stop position. Trains will be permitted to pass these signals in stop position by hand signal given under direction of towerman by trainman stationed on New York Avenue crossing.

**D-1625.** Rule 721 amplified: When heavy road machinery or farming implements desire to cross tracks at grade crossings, crossing watchman will secure permission from Train Dispatcher before permitting such movement to be made. The Train Dispatcher will arrange for proper protection before authorizing such movement.

**D-1626.** Trains making stop at stations or for any purpose will, when possible, avoid blocking street crossings.

#### **S-17. MOVEMENT BY TRAIN ORDERS**

**D-1701.** Rule 220-A modified: The use of train register books referred to under General Definition "Train Register" is discontinued. Train orders annulling a schedule or section of a schedule will be delivered by the operator to the person addressed—as provided in Rule 204.

#### **S-18. YARD AND YARD INSTRUCTIONS**

**D-1801.** Track between Fresh Pond and Bushwick will be operated as a yard track under jurisdiction of Yard Master at Fresh Pond. Trains operating within this territory must keep towerman, DF-Tower, advised of their movements and ascertain location of other trains operating within this territory.

Telephones for this service located as follows:

West end of Fresh Pond Yard,  
Bohack Siding,  
Varick Avenue,  
Morgan Avenue.

Tracks between BS-Tower and Thompson Avenue, Montauk Cutoff, will be operated as yard tracks under the jurisdiction of Yard Master, Yard A.

Freight connection from the Montauk Cutoff to the Main Line will be operated as a westward yard running track and is controlled by the towerman at F-Tower. Eastward trains must get permission from towerman at F-Tower before using this track.

All trains operated within territory specified in D-1801 must run prepared to stop within range of vision.

**D-1802.** Rules 93 and 317-D amplified: The use of the main track within yard limits authorized by Rules 93 and 317-D applies to engines not authorized by time-table schedule or train order to use main track within yard limits, and they may do so without train orders. Under manual block operation, before entering the block, the conductor or engineman must notify the towerman when it is desired to make such a yard movement; they must not exceed a speed of 15 miles per hour, prepared to stop short of other yard movements, extra trains or obstructions; they are not required to protect against other yard movements and extra trains.

Rules 19 and 21 will not apply to such yard movements, but by night at least one red light must be displayed on the rear, and if the movement is made past a block station by day at least one yellow flag must be displayed on the rear to indicate the rear.

Except as hereby provided, all rules and special instructions applicable to trains must be observed.

**D-1803.** The tracks east of end of block at Oyster Bay and Port Washington and east of WL Interlocking will be operated as Terminal Yards. Within limits specified Rule 93 is modified as follows: All trains must run prepared to stop unless the track is seen or known to be clear. Eastward trains arriving at terminal must report clear of and westward trains must not foul main track without permission from the Towerman at OY, G or WL as the case may be.

**D-1804.** Tracks between passenger station and end of block signs on Main Line and Montauk Branch, Long Island City, will be operated as Long Island City Passenger Yard. Rule 93-A is amplified as follows: "All trains must run prepared to stop unless track is seen or known to be clear." Yard movements are not required to protect against other yard movements or extra trains.

**D-1805.** Yards indicated by yard limit board are located as follows:  
 Riverhead Port Jefferson  
 Patchogue Hempstead.

Long Island City and Floral Park—Main Line.  
 H-Tower and J.C-Tower—North Side Branch.  
 Long Island City and Valley Stream—Montauk Branch.  
 WJ and WD-Towers—Rockaway Beach Branch.  
 DF-Tower and Bay Ridge—Bay Ridge Branch.  
 Flatbush Avenue and Valley Stream—Atlantic Branch.

Yards indicated by end of block sign instead of yard limit board are located at following points.

NOTE—under rule 93—modified.  
 Whitestone Landing Port Washington  
 Long Beach Oyster Bay  
 Greenport Wading River  
 Montauk

**D-1806.** Eastward light engine movements to Morris Park Shops will normally be made through Richmond Hill Yard. Westward Montauk Division light engine movements from Morris Park Shops normally use underjump track at MP-Tower and through yard to switch leading to Montauk Branch.

**S-19. SPEED TABLE**

| S-62       | E. of Parkside.....       |                     |                   |                        |                               |       |        |                 |            | 15   |  |

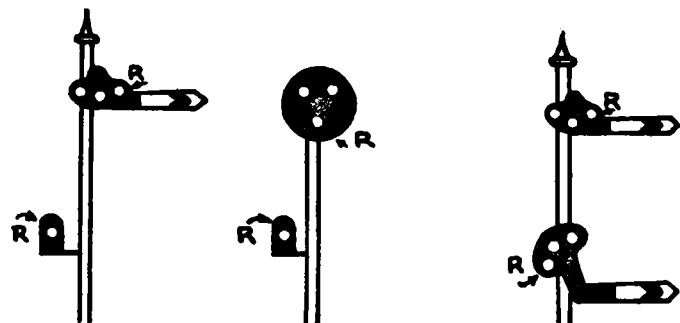

Note:  
\*Brakes should not be applied unless necessary while locomotive is on drawbridge or viaduct, nor more power be applied than is sufficient to maintain the above speed.

**S-21. SIGNAL ASPECTS NOT STANDARD**

**D2101.** The following signal aspects, not provided for by Book of Rules, in service.

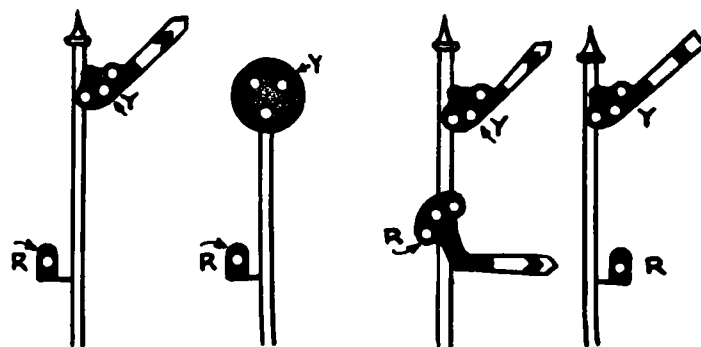

Indication—Stop  
Name—Stop Signal

Indication—Stop—Then proceed in accordance with Rule 509 or 660.  
Name—Stop and Proceed Signal.

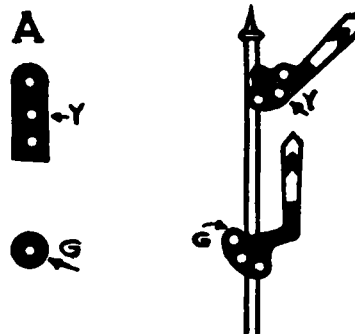

Indication—Approach next signal prepared to stop. Where a facing point switch is connected with the signal, approach that switch prepared to stop. A train exceeding one-half its maximum authorized speed at point involved must at once reduce to not exceeding that speed.  
Name—Caution Signal.

Indication—Approach next signal prepared to stop. A train exceeding one-half its maximum authorized speed at point involved must at once reduce to not exceeding that speed.

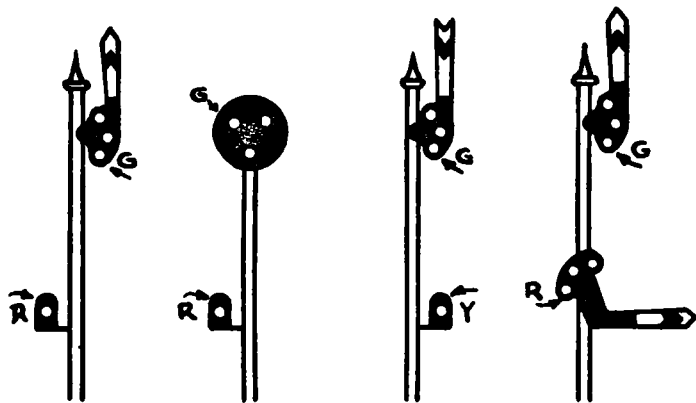

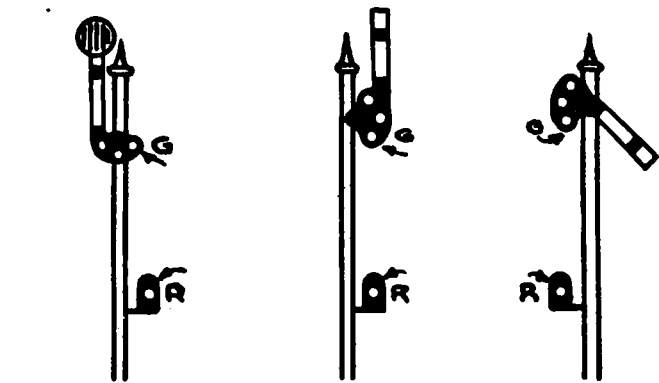

Indication—Proceed prepared to stop at next signal.

Name—Approach Signal

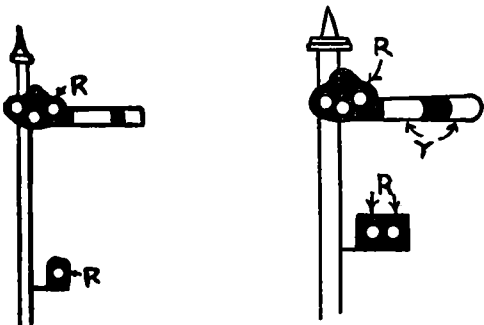

Indication—Train approach next signal at not exceeding one-half its maximum authorized speed at point involved but not exceeding 30 miles per hour.

Name—Approach Restricting Signal.

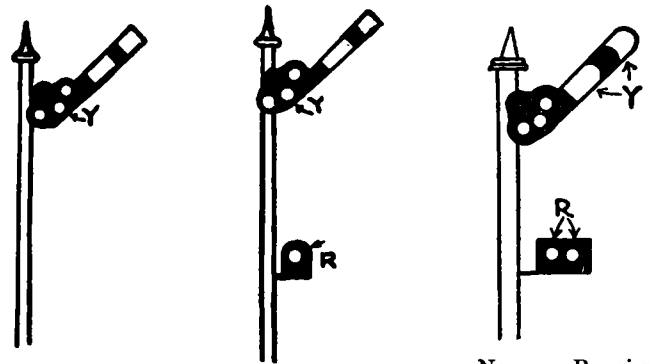

Indication—Proceed.  
Name—Clear Signal.

**D-2102.** The following block signal aspects, not provided for by Book of Rules, in service.

Indication—Stop.  
Name—Stop Signal.

Indication—Stop.  
Name—Stop Signal.

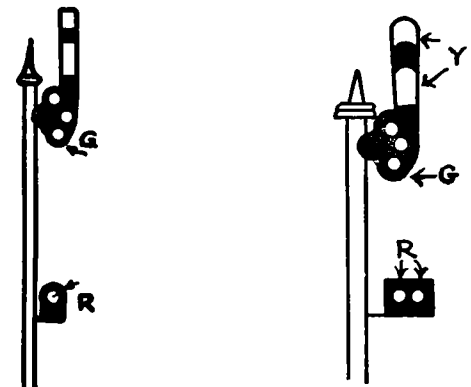

Name—Permissive Block Signal.

At the following points if an approach signal, page 100, Book of Rules, is displayed on the eastward signal at "JC" Tower, Flushing Bridge Street, and "G" Tower, the westward signal at Whitestone Landing, College Point, Flushing Bridge Street, and Port Washington; the indication is block clear to next signal; proceed prepared to stop at next signal. Aspect page 96, Book of Rules, amplified accordingly.

Indication—For passenger trains stop and report in accordance with Rule 362 or 462.

For other trains proceed with caution prepared to stop short of train or obstruction.

Name—Permissive Signal.

Indication—Proceed  
Name—Clear Signal

Indication—Proceed manual or controlled manual block clear.  
Name—Clear Block Signal.

**D2103.** The following aspects for distant switch indicator, not provided for by Book of Rules, in service.

Indication—Switch Open  
Name—Caution Indicator

Indication—Switch Closed  
Name—Clear Indicator

KEY: G—Green. Y—Yellow. R—Red.

**D-2104. SIGNAL ASPECTS figures 11 and 12, page 102-b Book of Rules.**

In conforming to speed requirement when operating under figure 11 (caution signal) and figure 12 (approach signal), train should not exceed one half its maximum authorized speed when passing the signal, but not necessarily before reaching it; however, where the signal cannot be seen a sufficient distance to reduce to not exceeding one half its maximum authorized speed at the signal, the speed should be so reduced as soon as proper handling of the train will permit and this, therefore, requires reduction of speed immediately upon the signal being in sight.

**S-22. BLOCK SIGNAL RULE**

**D-2201.** When a train clears a block between block stations, the flagman may, when authorized by the conductor or engineman, report clear to the towerman or operator.

**D-2202.** A train stopped at a home or block signal at which a telephone is located, may fill out clearance card (Form C) or caution card (Form D) as authorized by the towerman or operator and proceed as prescribed by the card.

**D-2203.** Rules 317a and 317b are modified to permit trains to back from a siding and proceed in the opposite direction on verbal authority from the towerman or block operator, who will consult with the Train Dispatcher.

**D-2204.** Four-wheel cabin cars must not be allowed to stand in an automatic block unless the block is occupied by other cars or engine. Necessary care must be used at all interlocking plants, and such cabin cars must not be permitted to stand alone between the signals of a block or interlocking station without permission from the towerman.

**S-23. MANUAL BLOCK SYSTEM**

**D-2301.** Rules 301 to 375 inclusive are in effect as follows: Except Rules 317a, 317b, 318a and 318b will apply only on portions of the Railroad as specified.

- Between Y-Cabin and end of block, Montauk.
- " FK-Tower and HM-Tower.
- " VA-Tower and MT-Tower.
- " PW-Interlocking and end of block, Greenport.
- " S-Cabin and end of block, Wading River.
- " MR-Cabin and PT-Cabin.
- " BA and SH.
- " JC-Tower and the end of block, Whitestone Landing.
- " NO-Tower and NU-Tower.
- " HN-Tower and B-Tower.
- " B-Tower and BJ-Tower for movement of track cars only.

**D-2302.** Rule 317a will apply:  
 HC-Tower and HM-Tower.  
 VA-Tower and MT-Tower.  
 JC-Tower and end of block, Whitestone Landing.  
 B-Tower and BJ-Tower for movement of track cars only.

**D-2303.** Rule 317b will apply:  
 Y-Cabin and end of block, Montauk.  
 PW-Interlocking and end of block, Greenport.  
 S-Cabin and end of block, Wading River.  
 MR-Cabin and PT-Cabin.  
 BA and SH.  
 All movements against current of traffic unless otherwise provided.

**D-2304.** Rule 318a will apply:  
 FK-Tower and HC-Tower.

**D-2305.** Rule 318b will apply:  
 NO-Tower and NU-Tower.  
 HN-Tower and B-Tower.

**D-2306.** During the time MR, PT, S and Y Block Stations are unattended, all signals will be left in the stop position but do not indicate the condition of the block. These signals may be passed in the stop position after block signal rules have been complied with and it is known that switches are in the position for the movement to be made.

At S and Y, westward trains will proceed as though a stop and proceed signal was displayed.

The normal position of switches—MR, switches set for main line. PT, switches set for Montauk Branch. S and Y, switches set for eastward movement.

**S-23A. UNATTENDED BLOCK STATIONS**

An unattended block station is a point designated by a sign indicating the limit of a block, the use of which is controlled by Manual Block System Rules, except as hereby modified.

**D-2309.** Unattended block stations are controlled by the towerman or block operator specified in time-table, or Special Instructions.

The sign indicating an unattended block station will display by day the station call and, in addition, by night a red light and yellow light horizontal—the yellow light next to the main track.

Where a block station is attended a portion of the time and unattended during the remainder of time during twenty-four (24) hour period, the unattended sign will be installed and light on sign extinguished during the time the station is attended.

The towerman or block operator may give a train oral permission to enter one block and by the use of clearance card (Form K) may authorize a train to pass one or more unattended block stations. When oral permission is given (to enter one block) train will report clear only when instructed to do so.

Unless otherwise provided, trains must stop at unattended block stations, and conductor or engineman must obtain permission from the towerman or block operator to enter and ascertain conditions of the block.

If, from any cause, conductor or engineman is unable to communicate with the towerman or block operator, either by the usual means of communication or the use of commercial lines and should no cause for detaining the train be known, it may proceed through that block on its rights or time-table authority, preceded by a flagman, to the next point of communication and report to the Superintendent.

Conductors and enginemen finding an unattended block station sign imperfectly displayed, or absent, must if practicable correct it, or replace the light and report the fact to the Superintendent.

A train receiving clearance card (Form K) to pass an unattended block station and arriving at such station after the time for it to become an open block station, must identify the train to the towerman or block operator before accepting a signal to proceed at that station, as clearance card (Form K) is thereby annulled.

If a train takes siding before clearance card (Form K) is fulfilled and reports clear, the conductor or engineman must have clearance card (Form K) annulled by the towerman or block operator, on authority of Train Dispatcher.

If a train is passed at an unattended block station, or between block stations (where unattended block rules are in effect) the conductor or engineman of a train that has been passed must report to the towerman or block operator and receive from him proper block indication.

| <p><i>The towerman, or block operator may issue this card only when authorized by the Superintendent. Before issuing it the towerman, or block operator must have proper understanding with other towermen or block operators, if any, having authority over blocks mentioned, and must know that blocks mentioned above have been duly reported clear of opposing trains, and clear of trains that may not be followed in the same block by the train addressed.</i></p> <p><i>The conductor and engineman receiving this card properly filled out and signed, or authorized by the towerman or block operator to fill it out, may proceed as directed above.</i></p> |  |                   |

**S-24. CONTROLLED MANUAL BLOCK SYSTEM**

**D-2401.** Rules 401 to 472 inclusive, except Rule 417b are in effect as follows:

- Between B and BJ-Towers—except for movement of track cars.
- " OY-Tower and end of block, Oyster Bay.
- " G-Tower and end of block, Port Washington.

**D-2402.** Trains must not take siding at Dependable Fuel Company's siding, Babylon, and report clear of block, and switch must not be set and locked for main track while engine or train occupies this siding.

Trains must not take siding at Mill Neck and report clear of the block, and switch must not be set and locked for main track while engine or train occupies this siding.

### S-25. AUTOMATIC BLOCK SYSTEM

**D-2501.** Automatic block Rules 501 to 514 inclusive, are in effect as follows:

Between H-Tower and G-Tower.

- \* Long Island City and HN-Tower (Main Line).
- \* MT-Tower and OY-Tower.
- \* HN-Tower and S-Cabin.
- \* DB and Y-Cabin.
- \* FT-Tower and WL-Tower.
- \* WJ-Tower and HJ-Tower.
- \* HU-Tower and VA-Tower.
- \* DF-Tower and NO-Tower.
- \* Signal Bridge AB39 and clearance point of Atlantic Branch, No. 2 Track.
- \* B-Tower and PW-Interlocking.

In the Atlantic Division Subway letter "A" is placed on a bracket close to the signal instead of on the signal.

**D-2502.** Where automatic Block System Rules are in effect, in addition to complying with Rules 152 and 511, trains must wait 2 minutes after opening switches before entering main track from siding or starting crossover movement, except where Special Instructions D-1611 are in effect.

**D-2503. RULE 505 AMPLIFIED**—A train having passed beyond the limits of a block, must not back into that block without orders from the Superintendent, except that while shifting at an interlocking station movements may be made against the current of traffic beyond the Home signal by permission of towerman and under protection as prescribed by Rule 99. Towerman must not give permission for such movements when there is a train between the point where the move is to be made and the next block station in the rear where a towerman is located, or if permission has been given for a train to enter the block at the rear.

When permission has been given for the reverse movement the towerman in the rear must know that it has been made before admitting any other train to the block, either at his station or at any immediate point.

**D-2504.** During the hours the bridge tender at Powells Creek Drawbridge, Long Beach Branch, is off duty, signals will not be passed in stop position until Conductor or Trainman has examined drawbridge and authority received from Train Dispatcher. Telephone for this purpose located outside of Cabin.

**D-2505.** Unless it is known that gasoline motor cars and cars of similar type or construction will operate automatic signals and shunt track circuits at interlockings and other switch locations, they must not be operated in automatic block signal territory unless special provision is made for manual block protection, and such gasoline motor cars, and cars of similar type or construction, must not be permitted to stand alone between the signals of a block or interlocking station without permission from the signalman. The signalman or leverman must assure themselves that such cars have cleared the switches of an interlocking before attempting to operate them.

### S-25A. AUTOMATIC TRAIN CONTROL IN EFFECT

**D-2506. NORTH SIDE BRANCH**—Signal bridge G-18, H-Tower, to Whitestone Landing and Port Washington.

**MONTAUK BRANCH**—Signal S-107 Hillside to Cooper Street, Babylon.

A.—No train or engine will be permitted to operate in automatic train stop equipped territory without operative train stop equipment on head car or engine, except as directed by the Superintendent.

B.—Aspects displayed by cab indicator in automatic train stop territory:

Green—Clear (Proceed).

Red—Stop; then proceed. On two or more tracks as provided in Rule 509 "B." On single track not exceeding 15 miles per hour prepared to stop short of train (preceding or opposing), obstruction, broken rail or switch not properly set.

Yellow—Approach. Proceed prepared to stop at next signal.

When wayside signal displays an approach restricting or clear restricting aspect, cab indicator will display yellow-approach.

C.—When taking siding, backing or switching, each more restrictive aspect of cab signal must be acknowledged.

D.—Trains taking on a helper engine in automatic train stop territory must cut in air brakes on the helper engine.

E.—When automatic train stop apparatus fails and cannot be promptly repaired, engineman will cut out the control of the air brake by the train stop apparatus, if required, and proceed in accordance with fixed or cab signal, if operative, but not exceeding one-half maximum authorized speed to the next point of communication and then be governed by instructions from the Superintendent.

F.—When passing a fixed signal, the indication of which conflicts with the cab signal, the more restrictive indication must be observed. If after passing the fixed signal a cab signal indication appears that conflicts with the fixed signal, train will be governed as follows: If running under a stop and proceed signal or caution slow speed signal, observe cab signal after having run the length of the train and until the next fixed signal can be seen. If running under any other signal indication, observe cab signal at once and until the next fixed signal can be seen.

G.—Defects or irregularities in the operation of automatic train stop apparatus, including fixed or cab signals, must be promptly reported to the Superintendent.

**D-2507. FLUSHING, BRIDGE STREET DRAWBRIDGE.** A train receiving a red aspect on cab indicator, after passing the drawbridge signals in the proceed position, may proceed over drawbridge without stopping, at not exceeding the authorized speed of 10 miles per hour. After clearing the bridge one car length, if a more favorable indication is not received, stop must be made and automatic train stop instructions complied with.

### S-26. INTERLOCKING RULES

**D-2601.** In making arrangements to reverse traffic on main track same care must be exercised as though traffic lever control did not obtain. When traffic has been established in either direction on any main track, before the traffic levers are reversed, the Train Director or towerman at each end of track affected must know that the last movement in the direction of traffic previously established has cleared.

**D-2602. FY-Interlocking-Block Station.** Closed between 10.00 P.M. and 6.00 A.M. daily. During this time trains will be governed by signal indication displayed. Normal position of switches will be for the main track. In case of signal failure when no towerman is on duty, conductor and engineman, or if no conductor, the engineman, must immediately examine the switches within the limit of the interlocking, and if all switches are found to be properly set for the movement, trains must pass stop signal and proceed with caution to next fixed signal, expecting to find a train in block or a broken rail, reporting the signal failure to the Superintendent from the first available telephone. Rule 663 modified.

**D-2603. HU-Interlocking-Block Station.** Closed between 10.00 P.M. and 6.00 A.M., daily. During this time trains will be governed by signal indication displayed. Normal position of switches will be for Nos. 1 and 2 tracks. In case of signal failure when no towerman is on duty, conductor or engineman, or if no conductor, the engineman must immediately examine the switches within the limit of the interlocking and if all switches are found to be properly set for the movement, trains may pass stop signal and proceed with caution to the next fixed signal, expecting to find a train in block or broken rail, reporting the signal failure to the Superintendent from the first available telephone. Rule 663 modified accordingly.

During the hours HU-Interlocking is closed, movements on No. 3 track between FW and HU-Interlockings will not be made except by train order.

**D-2604. WD-Interlocking-Block Station.** Closed between 11.00 P.M. and 7.00 A.M. During this time trains will be governed by the signal indication displayed. Normal position of switches will be for Track No. 3 and No. 4. In case of signal failure, conductor or engineman, must immediately examine switches within the limits of interlocking and if all switches are found to be properly set for the movement of the train, it will pass stop signal and proceed expecting to find train in block, broken rail or other obstruction between that point and the next fixed signal where they will be governed by its indication. Signal failures must be reported to the Superintendent from first convenient telephone. Crossover movements cannot be made during time specified.

**D-2605. PW-Interlocking.** Home signals, electric switches at east end of double track and west end of Pinelawn Passing Siding, remotely controlled from B-Interlocking—Block Station.

Movement may be made to and from WEST END only of Pinelawn Passing Siding on signal indication without reporting clear of main track, or obtaining permission to occupy main track.

Interlocking rules 601 to 685 both inclusive in effect in PW-Interlocking. Particular attention is called to Rules 667 and 670.

In EMERGENCY only, electric remote controlled switches may be operated by hand. Conductors or Enginemen must secure permission from Train Dispatcher to hand operate switch movements, after which they will be governed by instructions from the Towerman at B-Interlocking—Block Station and in accordance with the following.

**To Operate Electric Remote-Control Switch by Hand:** Operate, if necessary, hand throw switch lever, large lever marked "N" for normal and "R" for reverse position, to agree with switch points. Position of switch points can be determined by letters "N" for normal and "R" for reverse position, located on first tie ahead of switch points. (Normal position of end of double track switch is for westward movements.)

Operate selector lever, small lever located opposite hand throw lever on switch movement to "Hand Operating Position" which disengages the switch movement from the interlocking operation. The switch may now be operated by hand throw lever.

If the switch points are in a position intermediate between full normal and full reverse, move the selector lever firmly as far as it will go toward the hand throw position, then move the hand throw lever to a position which permits completion of the movement of the selector lever. There may be some opposition, but this will disappear when the hand throw lever reaches the point where the throw of the selector lever may be completed.

During the time the selector lever is in the "Hand Operating Position," all the home signals adjacent to switch will indicate "Stop." Under these conditions, the train or engine authorized to use the switch may make movements over the switch as necessary.

Hand signals must not be given for making a movement over an electric remote control switch until the selector lever is in the "Hand Operating Position" except in an emergency when the Engineman and Conductor are fully informed as to the circumstances.

The permission granted by the Train Dispatcher to hand operate the switch does not authorize any part of train to move beyond the home signal limits even though the selector lever is in the "Hand Operating Position."

When clearing other trains or when work is completed, the switch and levers, on switch machine, must be restored to the normal position, and both levers locked and so reported to the Towerman, and at the same time the location of train or engine must be stated.

To avoid personal injury when removing obstruction from switch DO NOT USE HANDS.

**D-2606.** Drawbridge signals at Wreck Lead are controlled by the towerman at WL-Tower. Bridgetender must obtain unlock from towerman to open drawbridge.

If westward drawbridge signal fails, towerman at WL-Tower will issue instructions for the drawbridge tender to deliver Form "C" to conductor and engineman or motorman of train, to pass signal in stop position. The drawbridge tender will be held responsible for knowing rails are properly matched and safe for train to pass over before requesting permission from towerman to issue Form "C."

### S-27. NON-INTERLOCKED SWITCHES CONNECTED WITH MANUAL AND CONTROLLED MANUAL BLOCK STATION SIGNALS

#### D-2701.

**Block Station Non-interlocked switches electrically locked**

Whitestone Landing... East end College Point passing siding.  
S-Cabin..... Switch leading to freight house siding, Cold Spring Harbor

**Interlocking Non-interlocked switches electrically locked**

JC-Tower..... West end College Point passing siding.  
East end Flushing, Bridge Street, passing siding.  
West end Flushing, Bridge Street, passing siding.  
DF-Tower..... Crossover west of Fresh Pond.  
Eastward Montauk switch.  
CN-Tower..... West end of north yard track near Norwood Avenue.

MP-Tower..... Morris Park shop yard switch between MP-Tower and Morris Park Station.  
Sheffield's Milk Siding (on Ave. Freight Track).  
Brandenburg Co. Siding (on Ave. Freight Track).  
FW-Tower..... West end Lay-up Yard—Far Rockaway.  
B-Tower..... Fairchilds Aviation Co.  
BJ-Tower..... Dependable Fuel Co. siding.  
FK-Tower..... Hempstead Branch, east end lay-up track on eastward and westward tracks.  
NO-Tower..... No. 4 track connection to Atlantic Division.  
FY-Tower..... Freeport, Raynors' siding east end westward platform.  
MT-Tower..... Knickerbocker Ice Co. siding, Oyster Bay Branch.

### S-28. TRACK CARS, ETC.

**S-28A.** General definition of a track car, page 16, Book of Rules, amplified as follows: TRACK CAR—A HAND CAR or self-propelled car or truck which may be manually moved to or from the track.

**D-2801.** Rule 80 is in effect and modified as follows:

**D-2802.** Track cars will be numbered for identification and designated as track car extra — — — — .

They will be in charge of qualified employe and unless otherwise provided, rules and special instructions governing movement of trains will apply to the movement of track cars.

They must not be attached to trains in motion or follow other trains schedule and under manual block system rules will be operated as a train other than a passenger train.

When night signals as prescribed by Rule 9 are required, a white light must be displayed to the front and a red to the rear of track cars. They will be equipped with portable telephone in connection with which they may be removed from and replaced on the main track at any point within a block by complying with the block system rules.

Lookout must be maintained in both directions. The maximum speed of a track car is 20 miles per hour and must not exceed a speed of 5 miles per hour over switches and highway crossings. When track cars are approaching a road crossing at grade, the trackman's whistle or other alarm, which may be provided, must be sounded before reaching the crossing and track car must approach all such crossings prepared to stop.

They must not be attached to trains in motion or follow other trains or other track cars closer than 500 feet.

Track cars will not be operated between G Tower and Port Washington and OY-Tower and Oyster Bay. Between B-Tower and BJ-Tower Manual Block Rules, 301 to 375 inclusive, are in effect: except Rules 317B, 318A and 318B.

**D-2803.** Attention is called to the fact that track cars will not operate automatic or semi-automatic signals, therefore, automatic block signals do not protect the operation of these cars; responsibility for proper protection rests entirely with person in charge of the car. They must not be permitted to stand alone between the signals of an interlocking station. Towermen and levermen must assure themselves that such cars have cleared the switches of an interlocking before attempting to operate the switches.

**D-2804.** Pony trucks must use the least important track available and be loaded so as to permit of prompt removal from the track on the approach of a train; when practicable they must run on the rail nearest the ditch, and on double, three or more tracks on a track against the current of traffic; they must not use a track under conditions when an approaching train cannot be seen in ample time to clear the track for a train, except in case of emergency and then not until after flagman has been placed in position where train can be stopped before reaching pony truck.

In yards they must not be used except by permission of the Yard Master and under proper protection.

**D-2805.** Between sunset and sunrise or when the numbers of the track car cannot be seen by the block stations, the driver of the track car must stop and advise the towerman the number of the car.

**D-2806.** The prefix "H.C." must be used preceding numeral when issuing instructions or train orders to hand cars.

### S-29. ENGINE AND OTHER EQUIPMENT RESTRICTIONS

### S-30. ELECTRICAL OPERATION

**D-3001.** "SPECIAL INSTRUCTIONS FOR EMPLOYEES IN ELECTRIFIED TERRITORY" are issued in book form. Employees working in electrified territory must be conversant with these instructions.

Yard Masters and conductors will be responsible for knowing that trainmen and caretakers of shipments and equipment understand and comply with these instructions.

Enginemen or motormen will be responsible for knowing that firemen or helpers understand and comply with these instructions.

When newly employed or inexperienced trainmen are working in the crew, the older members must call the attention of the new men to the possible danger.

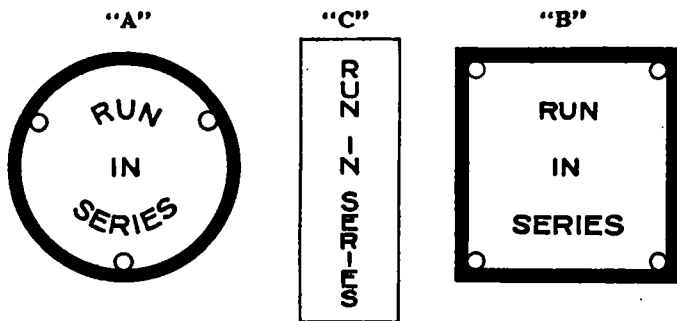

**D-3002.** "Run in Series" signs governing the restriction of movement of electric trains at times of partial or complete failure of the power supply are located at various towers in electrified territory. These signs are of three types, A, B and C as illustrated.

The order to display "Run in Series" signs at any point will be issued by the Chief Train Dispatcher and sign or signs must be immediately displayed by the towerman at the different points on receipt of such instructions.

The display of a sign or signs at a point will indicate to motormen of all passing trains in a given direction that they are to run in series position until they reach their terminal or next location where no sign is displayed. When such signs are displayed, motormen will anticipate low voltage conditions in the territory affected and proceed with care.

In all cases of failure of power or abnormally low voltage, even though "Run in Series" signs are not displayed, motormen will run carefully for a few minutes after the power is restored to prevent abnormal loads on the power system when all electric trains are accelerating at the same time.

#### RUN IN SERIES SIGNS

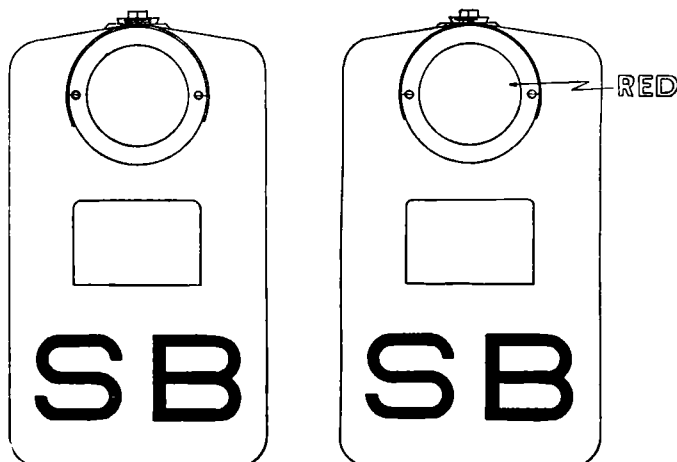

At points where more than one sign is used trains on the divisions and branches specified will be governed as follows:

| Location                           | Type | Trains Affected        |
|------------------------------------|------|------------------------|
| Between H-Tower and MT-Tower . . . | A    | Main Line              |
|                                    | B    | Rockaway Beach         |
| WT-Tower . . . . .                 | B    | North Side Branch      |

### THIRD RAIL SECTION BREAK SIGNALS

**D-3003.**

Indication—Proceed  
Name—Clear Signal

Indication—Stop  
Name—Stop Signal

Letters "SB" are illuminated by white lights.

These signals must not be passed in the stop position without instructions from the Train Dispatcher.

Trains other than electric trains are not affected except when electric trains are moved by steam locomotives.

#### D-3004. ELECTRIC TRAINS WILL DISPLAY INDICATION SIGNALS AS FOLLOWS:

|   | Right            | Left   |
|---|------------------|--------|
| Rockaway Park Express Trains . . . . .  | Red . . . . .    | Red    |
| Rockaway Park Local Trains . . . . .  | Yellow . . . . . | Green  |
| Far Rockaway Trains . . . . .   | Red . . . . .    | Yellow |
| Jamaica, Queens Village, Valley Stream<br>Locals, Whitestone and Winfield shuttle . . . . . | Yellow . . . . . | Yellow |
| Jamaica, Freeport and Babylon Express<br>Trains . . . . .                                   | Red . . . . .    | White  |
| Floral Park, Hempstead and West Hemp-<br>stead Branch Trains . . . . .                      | Yellow . . . . . | White  |
| Long Beach Trains . . . . .   | Red . . . . .    | Green  |
| Extra Trains . . . . .  | White . . . . .  | White  |
| Port Washington Trains . . . . .  | Green . . . . .  | White  |

Indicator lights on M.U. cars of series 1678 to 1943 must be burned during daylight or darkness where it is necessary to display indication signals.

### S-31. EMPLOYES REGISTER

**S-31-A.** Employees in train and engine service when reporting for duty or after having been off duty one hour or more, must personally sign the register in the presence of assistant Train Master, Yardmasters, Station Masters, Agent, Engine House Foreman, or their representatives, or Towerman, when the register is signed at a block station, who will witness the signatures.

**D-3101.** Registers for this purpose are located as follows, except as noted register sheets are available 24 hours:

| Terminal             | Location of Register Sheet                            |                         |
|----------------------|---|-------------------------|
| I. City Engine House | General Forman's Office                               | 7.00 A.M. to 5.45 P.M.  |
| I. City Pass. Sta.   | Ticket Agent's Office                                 |                         |
| Coria Park           | Engine Dispatcher's Office                            |                         |
| Flatbush Avenue      | FT-Tower  |                         |
| Carlton Avenue       | VD-Tower  |                         |
| Jamaica Station      | Station Master's Office                               |                         |
| Jamaica Storage Yard | Yard Master's Office                                  |                         |
| Pennsylvania Station | Crew Dispatcher's Office                              |                         |
| White Stone Landing  | Passenger Station                                     |                         |
| Port Washington      | Passenger Station                                     |                         |
| Queens               | QU-Tower  |                         |
| Floral Park          | EK-Tower  |                         |
| Hempstead            | HM-Tower  |                         |
| Valley Stream        | VA-Tower  |                         |
| Far Rockaway         | FW-Tower  |                         |
| Rockaway Park        | Passenger Station                                     |                         |

|                      | Asst. Yard Master's Office, 6th St.                   |                         |
| Blisville            | Asst. Yard Master's Office                            |                         |

### S-32. PERSONAL INJURIES

**S-32-A.** Emergency calls for Surgeons will have preference over other business, except train orders.

Employees injured on company property or while on company business, will be treated by the nearest physician named below, without cost, throughout their disability; if hospital attention is necessary, they should be sent, if practicable, to one of the hospitals named below.

Passengers or others injured on company property will receive first attention by the Medical Examiner or Company Surgeon, without cost; at points where it is impossible to obtain their services, the company will be responsible for the cost of reasonable surgical attention by an outside Surgeon for the first services rendered; subsequent attention will be determined by direction of proper official.

### S-33. USE OF TELEPHONES

**S-33A.** Employees using telephones in connection with train movements must satisfy themselves beyond doubt that they are in communication with proper persons. Persons using telephones must yield the line promptly for train movements.

If telephone fails, train and engine crews will use any available means of communication to avoid delay.

When used for Block Operations, transmitting train orders or making any arrangement pertaining to the movement of trains by trainmen, the conductor or engineman must personally receive all orders on the telephone and make all verbal arrangements pertaining to the movement of his train, but neither is relieved of any responsibility as prescribed by Rule 105.

The same precaution must be taken to insure accurate transmission and proper delivery of train orders and instructions as is required by the rules in transmitting by telegraph. The essential features of all verbal arrangements and instructions such as train numbers, engine numbers, information in regard to trains being clear of, or desiring to occupy certain tracks, etc., must be repeated by the person receiving the information.

Train crews will be required to properly close all telephone booths or box doors after using telephone, also telephones where two-way switches are located, switch must be left open after completing conversation. Particular care must be used in opening switches where telephones are connected to the dispatcher circuit.

### S-3301. LOCATION OF TELEPHONES

Telephones are located at or near automatic signals (except between MT-Tower and OY-Tower, HN-Tower and S-Cabin), home signals, ends of passing sidings, and at or near unattended Block Stations; also about two thousand (2,000) feet apart along transmission lines and third rail sections.

### S-34. MISCELLANEOUS

**D-3401.** Whenever it is necessary for a motorman to operate a train from any location other than the head end, a qualified conductor must be stationed at the head end to give signals to motorman to control movement of the train; speed not to exceed 30 miles per hour. (See instructions to Motormen for Operation of MP-54 Equipment.)

**D-3402.** Tracks 1 and 2 in Flatbush Avenue Terminal must not be used for MP-54 equipment which will not clear platforms alongside these tracks

**D-3403.** In the event of a fire or serious flashing or arcing developing on trains while in the Flatbush Avenue or East New York tunnels, every effort must be made to get the train out of the tunnel as quickly as possible. The engineman must be notified at once but the train should not be stopped unless there is reason to believe that derailment or personal injury may otherwise result.

Trainmen should close all doors, windows and ventilators as quickly as possible. If fire should occur in the interior of any car or threaten to communicate to it, passengers should be removed from this car to an adjacent car as quickly as possible, but no more doors should be opened than necessary to make the transfer expeditiously.

After this is done, fire extinguishers may be used to put out the fire, but employees are cautioned to play only sufficient of the liquid as is necessary to extinguish the fire, so as to reduce to the greatest possible extent the fumes given off when this liquid comes in contact with the fire, thus insuring the least amount of inconvenience and discomfort to our patrons in the event of trouble of this kind.

In the event of any electrical trouble, the engineman should be advised at once and train crews governed by his instructions.

In case the engineman discovers a fire of any magnitude on the roadway in the Flatbush Avenue or East New York tunnels, he should attempt to stop the train within a reasonable distance before reaching the fire in order that smoke or fumes may not reach the train. If it is found to be impossible to stop the train before reaching the fire, the train should proceed until it has passed beyond the fire, provided, of course, that the condition of the track is such that it is safe for the train to proceed. Should the train be stopped by an emergency application, close to or over the fire, the train should be started as quickly as possible and moved to a safe distance beyond the fire.

An emergency passenger exit, located near the intersection of Franklin and Atlantic Avenues, Atlantic Branch, is in service.

This emergency exit is for use only when it is necessary for passengers to leave trains due to obstruction or other trouble in tunnel between this point and Flatbush Avenue Station.

**D-3404.** Passengers must not be permitted to take into coaches packages that are large enough to take up seat space or of such a character as to cause inconvenience or annoyance to other passengers. Conductors will arrange to have such packages placed in baggage car, or if no baggage car on train, upon the rear platform, collecting necessary fee from passenger and issuing receipt therefor, in accordance with tariff.

**D-3405.** Upon request of the passenger, small dogs in baskets or other receptacles, will be permitted in passenger coaches, but under no circumstances shall they be permitted to occupy a seat, roam about the floor, or cause any annoyance to passengers.

Dogs when properly muzzled and leashed will be handled under baggage tariff regulations, they may be carried in the rear vestibule of electric trains when there is no baggage or combined car on such trains.

**D-3406.** Employes handling U. S. Mail must obtain a supply of mail report blanks and comply with the instructions printed on back of same.

**D-3407. INSTRUCTIONS FOR THE HANDLING OF LOCOMOTIVE CRANES, DERRICKS, STEAM SHOVELS, MINING MACHINERY WITH CUTTING ARMS, AND OTHER PIVOTED MACHINERY, WITH OR WITHOUT BOOMS DETACHED, EITHER ON THEIR OWN WHEELS OR ON CARS**

(a) Before moving locomotive cranes, derricks, steam shovels, mining machinery with cutting arms or machinery of various kinds, parts of which are of a pivoted or swinging character, which if not properly secured may foul an adjoining track; also other pivoted machinery with or without booms detached, either on their own wheels or on cars in revenue trains from point of origin on our own tracks or at junction points with foreign railroads, they must be inspected by a Car Inspector to insure that the requirements of A. R. A. Loading Rules are complied with.

When a machine or parts of machinery is protected by covering of any kind by the shipper, the Agent and Car Inspector must assure themselves that such covered parts comply with the above rules before shipment is moved.

(b) After a Car Inspector has inspected pivoted machinery of any kind and finds that it meets all requirements of the A. R. A. Loading Rules, he must sign Forms CT 310-A and CT 310 and give them to the Agent or others responsible for billing or carding, who will attach Form CT 310, one on each side of the pivoted machinery when moving on its own wheels, or to the car upon which it may be loaded and attach Form CT 310-A to the billing.

**Sample Form CT 310-A:**

**PIVOTED MACHINERY**

This shipment of pivoted machinery complied with A. R. A. Loading Rules.

.....  
Car Inspector

**Sample Form CT 310:**

**PIVOTED MACHINERY**

Date.....Initial.....Number

From.....to.....

This Shipment of pivoted machinery has been inspected by me and complies with the requirement of A. R. A. Loading Rules.

.....  
Car Inspector

(c) Locomotive cranes and such other pivoted machinery equipped with swinging booms of which a part may swing or extend outward, must not be moved in revenue train unless Form CT 310 is attached, one to each side of the pivoted machinery, when moving on its own wheels or to the car upon which it may be loaded, and Form CT 310-A to the billing. When such shipments are set off for repairs that may effect the requirements of A. R. A. Loading Rules, they must not be moved except upon authority of the Train Master, and not until after proper inspection, and billing has been endorsed by Agent or Yard Master "Reinspected at.....and loaded as per A. R. A. Loading Rules."

Conductors when setting off such shipments for repairs must notify the proper officer that it is pivoted machinery.

(d) For all such Company-owned or rented equipment, whether in the M. of W. or M. of E. Department, the following notice, signed by the Master Mechanic must be posted under glass in the operator's cab:

**FOR MOVEMENT IN NON-REVENUE TRAINS**

Notice to state what anchors or other apparatus are to be applied, and how; to give a list of such anchors; that they are to be kept on the equipment at all times; that operators are responsible for having the anchors, etc., replaced immediately on loss or breakage; that operators will apply the anchors.

**D-3408.** Cars carrying passengers must be fully lighted while passing through East New York and Nostrand Avenue tunnels, and while passengers are loading or unloading in Flatbush Avenue Station.

**D-3409.** The emergency train brake attachment on master controller handles of electric engines must be in service on the end from which engine is operated, except that while making shifting movements, the grip lever may be fastened to the master controller handle in order to facilitate such movements.

**D-3410. Rule 703 amplified: INSPECTION OF PASSING TRAINS**

The following instructions must be observed as far as practicable and other duties will permit: Employes will observe passing trains for defects, and should there be any indication of conditions endangering the train, take such measures for its protection as may be practicable.

Trainmen of freight and passenger trains will observe passing trains and if any defects are noted, such as brakes sticking, brake rigging down, swinging doors, hot boxes, objects protruding that may result in damage or injury, will signal members of such trains, calling attention to dangerous conditions, and if nothing irregular is noted, will give proceed signal to rear of passing trains when it is practicable to do so.

Train and engine crews on moving trains will be on the lookout for signals, when passing other trains, interlocking block, water, coaling and other stations, sidings and points where trackmen are working, and when practicable exchange signals.

The following signals will be used where other signals are not required:

|  |   |
|--|---|
| Hot Journal  | { By day —Nose held with one hand, with other hand pointed toward track.<br>By night—Lamp swung vertically in a small circle, lamp to be held by guard wire around globe. |
| Brakes Sticking  | { By day —Hands shoved in sliding motion out from body.<br>By night—Lamp raised and held stationary.  |
| Broken Wheels<br>Defective Truck<br>Dragging Brake Connection, Lading Shifted over Side or End of Car, Swinging Car Door or any other Dangerous Conditions | { Stop signal.  |

**D-3411.** Crews shifting tracks or placing cars on tracks, which are equipped with concrete bumpers, will leave a space between the car and bumper.

**D-3412.** When necessary to couple Long Island Railroad multiple unit car to a car equipped with A. R. A. type "D" coupler with bottom uncoupling device, arrangements must be made to have chain which holds up the outer end of the automatic hose connector head uncoupled and the head allowed to drop down out of the way of the uncoupling rigging on type "D" couplers. Brake pipe hose must be uncoupled from the brake pipe and an A. R. A. standard brake pipe hose with hand coupling applied in its place and the brake pipe on cars coupled with hand coupling hose.

This is necessary in order to avoid the danger of the automatic hose connector unlocking "D" coupler, causing cars to part.

**D-3413.** Card waybill, Form CT-1198, must be prepared in connection with the movement of mail storage cars and one of the waybills must accompany each car in mail storage service whether loaded or empty. "MOVE PORTION" must be used in the loaded movement while the "RETURN PORTION" must be used in empty movement of mail storage service.

These reports must be prepared by conductors and turned into Station Master or Agent upon arrival of car at destination or upon being taken out of U. S. Mail service.

Supply of Form OTL-1198 can be secured by conductor from Crew Dispatcher at Pennsylvania Station or Station Master at Jamaica.

**D-3414.** All oil lanterns, when in use, must be kept turned as low as possible, except when a full glare is needed.

**D-3415.** In the event of a short circuit developing upon a multiple unit car and there is any doubt as to overcoming it by removing the bus (4 point) jumpers and shoe fuses, and it becomes necessary to have the power shut off, the following procedure will apply:

After the power is shut off, pull the bus (4 point) jumpers at each end of the defective car, and break off all contact shoes. Striking the shoes on the SIDE with a hammer or sledge will usually break the shoe clear of the third rail without damaging the shoe fulcrum casting.

When a multiple train is slow and losing time, the motorman will notify the conductor, who will pass the word back for the train crew to reverse all battery switches. If the desired results are not thereby obtained, the conductor will arrange, at or before the next stop, to have all 10 point jumpers inserted, and this without disturbing the 10 point jumpers already in use. After inserting the jumper, each member of the crew will also operate the circuit breaker, reset lever on each car, and after which each member of the crew will pass a signal to the conductor from the right side of the train.

Motorman's attention also is called to Rule 346 of the Instruction Book of Multiple Unit Equipment.

**D-3416.** In changing power at Jamaica, air brakes should be examined in accordance with instructions contained in Rule 10-B or 99-B-1 (Brake and Train Air Signal Instructions), with the following modifications:

1. After steam or electric locomotive is coupled to train and all hoses coupled up, engineman will release the brakes. Rear-end inspector will be located at the second-rear car and observe brakes for release. When brakes are observed released on the second-rear car, the rear car will be examined for release and signal then given for service application. When brakes on rear car are observed applied, brakes on second rear car will be examined for application and then signal for release will be given. When release is observed on second-rear car, brakes on rear car will be examined and when released, signal for O. K. of brakes will be given.

2. After locomotives are coupled to train, the head-end inspector will be located at the second car to observe release on that car and then the first car and after receiving signal from rear-end inspector, signal the Engineman for service application. When brakes on first car are observed applied, second car will be examined and after receiving signal from rear-end inspector, signal for release of brakes. When release is observed on the second car, brakes on first car will be examined and when release is observed, after receiving signal from rear-end inspector, signal O. K. of the brakes to the Engineman.

3. As the train leaves the station, the head-end inspector will observe the train from an advantageous location for stuck brakes or sliding wheels, and in the event of such make proper arrangements to have the train stopped.

MU Equipment—With locks for cut-out cocks in the brake pipe line: Employees will be governed by the following in the operation of these cut-out cocks:

To cut in air—

1. Pull out brake pipe cock handle (upper rod).
  2. Pull out main reservoir cock handle (lower rod).
- This locks the brake pipe cock in open position.

To cut off air—

1. Push the main reservoir cock handle in (lower rod).
2. Push brake pipe cock handle in (upper rod).

**D-3417.** In order to eliminate difficulty experienced by brake cylinder packing contracting caused by cold temperature, when the temperature is 32 degrees or lower, the following instructions will be observed on multiple unit and steam passenger trains which have just previously been laid up a period of one hour or more:

Multiple unit passenger trains—a service application of the air brake must be made followed by an emergency application after which the brakes must be released and regular terminal test made.

Passenger trains other than multiple unit—a 25 lb. brake pipe reduction must be made followed by emergency application, after which the brakes must be released and regular terminal test made.

**D-3418.** (5-A Freight Cars in a Passenger Train)—Must be equipped with a safety valve applied to the brake cylinder, or the brake cylinder pipe, except in emergency cases cars may be operated without this safety valve and the Engineman in charge of the train notified to operate his train brakes under normal operating conditions in such a manner so as to avoid a brake cylinder pressure in excess of 60 lbs. at speeds less than 25 miles per hour. The safety valve when applied must be removed when the car returns to freight service.

**D-3419.** In accordance with System General Notice No. 245, the following regulations will govern, superseding all previous instructions, as to handling and disposition of lost articles which may be found on trains, in or about stations or on other property of the Company:

In establishing these rules, the Long Island Railroad Company does not assume the character of the finder of lost property but merely undertakes to lend its aid and co-operation as between the finder and the owner with a view to providing an effective method for the return of lost articles to their owners.

All lost articles found on station premises or other Company property must be delivered immediately to the Ticket Agent at said station. When lost articles are found on trains, trainmen will deliver such articles to either the Lost and Found Bureau, Flatbush Avenue; Pennsylvania Station or the Station Master, Jamaica. When the Lost and Found Bureau is closed at Flatbush Avenue, articles will be turned over to the Station Master.

The Ticket Agent, Agents, Lost and Found Bureau or Station Master, to whom lost articles are delivered, will issue finder a receipt, Form C. T. L. 20 or C. T. L. 20-A, in the case of Flatbush Avenue, and also fill out and attach to the article a lost article tag, Form P. D. 618, the stub of which will be detached and forwarded immediately to the General Baggage Agent, Philadelphia. If the article or contents thereof indicates address of owner, an effort will be made by the custodians as noted in this paragraph to immediately get in touch with the party to make return. If name and address of owner are not indicated and the article contains transportation equivalent (ticket, pass or other form of transportation) the nearest Ticket Receiver should be advised promptly, giving description of article and transportation equivalent contained therein. All tracing for such articles will be done by the Station Master or Agent, Lost and Found Bureau.

Lost articles will be retained by Ticket Agents or Station Master at Jamaica for a period of twenty-four (24) hours, after which they will be forwarded to the Agent, Lost and Found Bureau, Flatbush Avenue, together with name and address of the finder, description of article (if pocketbook, list contents), location where found and date. The Agent, Lost and Found Bureau, will retain such articles for a period of sixty, (60) days awaiting claim from owner. Any articles not claimed by owner within a period of sixty (60) days will, at the end of that time be surrendered to the finder on presentation of receipt issued therefor, except that transportation equivalents found by employes (including such equivalents contained in wallets, pocketbooks, etc.) should be forwarded to the Auditor of Passenger Traffic, Philadelphia, with complete information. At the expiration of ninety (90) days from date found, all lost articles not claimed by owner or finder will be forwarded by the Agent, Lost and Found Bureau, to the General Baggage Agent, Philadelphia, for final disposition.

Articles found in Pullman cars must be turned over to the Pullman employes (conductor if one is on duty) in charge of car in which the article is found or deposited at the proper Pullman office in accordance with instructions issued by the Pullman Company. Information as to finding of such articles should also be given to the Lost and Found Bureau in order that persons making inquiry may be directed to the Pullman Office having custody of such article.

**D-3420.** If smoking cars are equipped with two toilets, both doors must be open, except that within New York City limits, doors of all toilets must be locked by orders of Board of Health.

Before laying up passenger cars at terminals, train crews must see that doors of all toilets are locked.

Semaphore type automatic signals, governing eastward and westward movements on No. 2 and No. 1 tracks, located on signal bridges S-120 and S-126, renumbered S-126, S-125, S-130 and S-129, respectively.

**E. CORONA:** Position light type automatic signal N-64, governing westward movements on No. 1 track, moved westwardly 10 feet and located on retaining wall.

**F. JC-INTERLOCKING:** Top arm of two-arm semaphore type home interlocking signal, located 350 feet east of JC Interlocking Station, governing westward movements from the Whitestone Branch, fixed in stop position.

**G. JA BLOCK STATION:** Two arm position light type signal governing westward movements to No. 1 and No. 2 tracks, relocated, on retaining wall 6 feet east of former location.

**H. BS INTERLOCKING:** Top arm of two-arm semaphore type home interlocking signal located 400 feet west of BS Interlocking Station, governing eastward movements from the Montauk Cut-off on No. 2 track, fixed in stop position.

**I. HJ INTERLOCKING:** Indication on two-arm position light type home signal located 700 feet west of drawbridge, governing eastward movements on No. 2 track, Rockaway Beach Branch, aspect changed from approach to caution, slow speed.

**J. LONG ISLAND CITY:** Deraill at west end of Third Street Running Siding, east of Third Street crossing, moved eastwardly 60 feet.

**K. OZONE PARK:** New block station located 1,100 feet west of former RK Interlocking Station, Station Signal BA; and new block station located 500 feet west of Signal Bridge R-93; Station Signal CV in service.

New Nos. 1 and 2 tracks from WT Interlocking Station to BA Block Station and hand operated connections to the Rockaway Beach Branch at BA Block Station in service. Automatic Block System Rules 501 to 514, inclusive, in effect. Speed of 15 miles per hour must not be exceeded over these tracks.

New Nos. 1 and 2 tracks between BA Block Station and CV Block Station in service and signalled in both directions. Automatic Block System Rules 501 to 514, inclusive, in effect. Rule 505 amplified as follows: Trains will run by block signals whose indication will supersede time table superiority and will take the place of train orders.

A speed of 15 miles per hour between BA Block Station and a point 750 feet east thereof, and 25 miles per hour between a point 750 feet east of BA Block Station and CV Block Station must not be exceeded.

All switches at BA and CV Block Stations are hand operated and in charge of block operator.

Hand operated switches, connections to Burns Brothers Coal Company, Gillespie Coal Company and Scranton-Lehigh Coal Company sidings, in service, equipped with electric locks and in charge of block operator at BA Block Station.

**L. CORONA:** New No. 1 track between JA and CO Block Stations will be operated as a single track and signalled in both directions.

Between JA and CO Block Stations, Automatic Block System Rules 501 to 514, inclusive, are in effect. Rule 505 amplified as follows: Trains will run by block signals whose indications will supersede time table superiority and will take the place of train orders.

A speed of 25 miles per hour must not be exceeded between a point 1,400 feet west of Corona Passenger Station and a point 5,650 feet east of Corona Passenger Station.

A reverse movement within the limits of CO and JA Block Stations or a forward movement after making a reverse movement, must not be made without the proper signal or permission from the block operator.

Attention is called to close clearance of pole lines, automatic signals and retaining wall on single track.

**M. WT INTERLOCKING:** Interlocking switch and derail leading from Rockaway Beach Branch to sub-station siding, changed to ground

lever connection and will be operated by trainmen. Permission must be obtained from towerman at WT Interlocking before entering or leaving siding.

**N. BETWEEN QU INTERLOCKING AND BELMONT PARK TERMINAL:** Effective September 1st to September 17th, inclusive, daily except Sundays, between 12.01 P.M. and 7.01 P.M., block station located 1,200 feet east of QU Interlocking in service, Station Signal KW.

Block station 1,650 east of KW Block Station in service, Station Signal BM.

No. 3 yard track will be operated as a main track between QU Interlocking and BM Block Station. Manual Block System Rules 301 to 375, inclusive, except 317 B, 318 A and 318 B, in effect. This main track is within yard limits and will be operated in accordance with paragraph D 1802, Time Table No. 113, except that passenger trains will display marker lamps to indicate the rear.

The tracks between BM Block Station and Belmont Park Terminal will be operated as yard tracks under the jurisdiction of the block operator at BM, and trains in either direction will be governed by hand signals given by switchman or block operator.

**O. BETWEEN PARKSIDE AND AQUEDUCT:** Derails, pipe connected with main track switches, in service on the following sidings: Glendale, Ribbon Mills, William Demuth & Company and New York Water Service Corporation.

Deraill, hand operated, on connection from No. 4 track to Ozone Park freight house siding, east of automatic signal R 93, out of service.

Switch indicators on switch connection between Montauk Branch and Rockaway Beach Branch and on switch leading from No. 2 track to Glendale yard, Rockaway Beach Branch, out of service.

This General Order will be printed in the Time Table and will not be issued in sticker form.

**F. R. GERARD,**  
Superintendent.

**PENNSYLVANIA RAILROAD**

**NEW YORK ZONE**

**LONG ISLAND RAILROAD**

Jamaica, N. Y., September 18th, 1930.

**GENERAL ORDER NO. { 113-2, ZONE B  
113-3, ZONE C**

Effective Tuesday, September 23rd, 1930

**PT BLOCK STATION, MAIN LINE**

Attended 5.45 A. M. to 9.45 P. M. Correct page 4, Timetable No. 113, accordingly.

**MANORVILLE BRANCH**

Montauk Highway, Eastport, unprotected week days, Sundays and holidays 9.45 P. M. to 5.45 A. M. Special Instructions D-1619 modified. Correct page 282, Timetable No. 113 accordingly.

Effective Tuesday, September 23rd, 1930 and until Tuesday, September 30th, 1930, inclusive

**HILLSIDE**

Eastward and westward Main Line and Montauk Branch trains will run carefully at Cooper Street, looking out for close side and overhead clearance and workmen about tracks.

Effective 2.00 A. M., Sunday, September 28th, 1930

Eastern Standard Time will be the standard time on the Long Island Railroad.

At that time clocks in all offices which are open and watches of employes on duty must be set back one hour to indicate 1.00 A. M.

Where standard clocks are located, after they have been set back one hour, time must be compared with the Train Dispatcher.

Where an office is open after Eastern Standard Time becomes effective, immediately after opening the office the clock must be set back one hour and time compared with the Train Dispatcher.

On single track at 2.00 A. M., all trains must be stopped and, before proceeding, the conductor and engineman or motorman must compare time, then set back their watches one hour and again compare time; they must also compare time with the first available standard clock.

On double, three or more tracks, trains must stop at the first open telegraph or telephone office after 2.00 A. M., adjust their watches to conform with the clock at that office and compare with each other.

Employes, required by rule to have a reliable watch, on duty at the time Eastern Standard Time becomes effective, after adjusting their watches to show Eastern Standard Time, must compare time with the first available standard clock or with a watch that has been adjusted to show Eastern Standard Time.

Employes, required by rule to have a reliable watch, reporting for duty after Eastern Standard Time becomes effective, before going on duty must adjust their watches to show Eastern Standard Time and must compare time with the first available standard clock or with a watch that has been adjusted to show Eastern Standard Time.

Eastern Standard Time will be transmitted over this Company's telegraph lines from 11:59 A. M. to 12:01 P. M. daily except Sunday.

CP

**PENNSYLVANIA RAILROAD  
NEW YORK ZONE  
LONG ISLAND RAILROAD**

Jamaica, N. Y. November 18, 1930.

**GENERAL ORDER NO. 113-11, ZONE C**

Effective Between 9:00 A. M. and 1:00 P. M., Friday,  
November 21st, 1930

**MONTAUK BRANCH**

Between Jamaica and Richmond Hill.

Position light type automatic signal S-80 out of service.

Westwardly limits of "J" Interlocking on the middle track and No. 1 track extended west 2605 feet.

Hand operated switch located 3580 feet west of "J" Interlocking station leading from the middle track to No. 1 track, changed to an interlocked switch controlled from "J" Interlocking.

Special Instructions D1504, page 279, Timetable 113, modified accordingly.

Position light type home signals located on signal bridge 3280 feet west of "J" Interlocking station, governing westward movements on the middle track and No. 1 track in service.

Position light type dwarf signal located 3620 feet west of "J" Interlocking station, governing eastward movements from No. 1 track in service.

Effective Between 1:00 P. M. and 2:30 P. M., Friday,  
November 21, 1930

**MAIN LINE**

Between "JE" Interlocking and "J1" Block Station.

Between a point 750 feet east of "JE" Interlocking station to a point 150 feet east of J1 block station No. 3 track moved north 35 feet.

Position light type dwarf signal governing eastward movements on No. 3 track located 100 feet west of J1 block station moved north 35 feet.

Two arm semaphore type Home signals located on signal bridge 750 feet east of "JE" Interlocking station governing westward movements from No. 3 track and from the westward layup track out of service.

Position light type home signal located on signal bridge 950 feet east of "JE" Interlocking station governing westward movements from No. 3 track in service.

Position light type dwarf signal located 750 feet east of "JE" Interlocking Station governing westward movements from the westward layup track in service.

Two arm semaphore type home signal located 300 feet west of "JE" Interlocking station, governing eastward movements on No. 9 track changed to a position light type dwarf signal.

Two arm semaphore type home signal located on bracket pole 375 feet east of "JE" Interlocking station governing eastward movements on No. 11 track, changed to a position light type dwarf signal.

Color light type dwarf signal located 400 feet west of "JE" Interlocking station governing eastward movements on No. 5 track changed to a position light type dwarf signal.

Color light type dwarf signal located 350 feet east of "JE" Interlocking station governing westward movements from old engine layup track changed to a position light type dwarf signal.

Effective Between 10.00 A. M. and 4.00 P. M., Wednesday, April 14th, 1931

**MP INTERLOCKING**

Semaphore type dwarf signal governing eastward movements from engine layup track moved eastward fifteen feet.

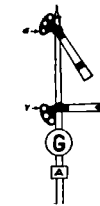

**BETWEEN "BS" AND "DF" INTERLOCKINGS**

Lower quadrant semaphore type automatic signals S-23, S-35 and S-41 changed to grade signals. Letter G added in accordance with sketch shown below.

**INDICATION**—For Tonnage Freight Trains proceed not exceeding 15 miles per hour, expecting to find a train in the block, broken rail, obstruction or switch not properly set. For other trains, stop then proceed in accordance with Rule 509.

**NAME**—Grade Signal.

**INDICATION**—Proceed prepared to stop at next signal.

**NAME**—Approach Signal.

**INDICATION**—Proceed.

**NAME**—Clear Signal.

Special Instruction D-2101, pages 290, 291 and 292, Time Table No. 113, amplified accordingly.

A tonnage freight train is one having 90% or over of the authorized slow freight engine rating. If at any time, due to weather conditions or other causes, the engine rating of a slow freight train is reduced to say 85%, a tonnage freight train will be 90% of the reduced authorized rating.

The conductor must advise the engineman before entering territory where these grade signals are in use, the authorized slow freight engine rating, exact tonnage of train and of any changes due to setting off or picking up cars. Conductors to receive tonnage at the point from which the train is dispatched.

**BETWEEN LONG ISLAND CITY AND PINELAWN**

Letter G removed from the numbers on all automatic signals.

**BETWEEN MINEOLA AND HICKSVILLE**

Lower quadrant semaphore type automatic signals 205, 206, 213 and 214 changed to upper quadrant.

**H TOWER**

Second paragraph General Order No. 113-25, Zone C, is annulled.

**Effective 8.00 A. M., Friday, April 24th, 1931**

**AMAGANSETT**

East switch of passing siding moved westward 2000 ft. Passing siding in service, capacity 31 cars.

**Effective 2:00 A. M., Sunday, April 26th, 1931**

Daylight Saving Time, which is one hour in advance of Eastern Standard Time, will be the standard time on the Long Island Railroad.

At that time clocks in all offices which are open and watches of employees on duty must be advanced one hour to indicate 3.00 A. M.

Where standard clocks are located, after they have been advanced one hour, time must be compared with the Train Dispatcher.

Where an office is open after Daylight Saving Time becomes effective, immediately after opening the office the clock must be advanced one hour and time compared with the Train Dispatcher.

On single track at 2.00 A. M., all trains must be stopped and, before proceeding the conductor and engineman or motorman must compare time, then advance their watches one hour and again compare time; they must also compare time with the first available standard clock.

On double, three or more tracks, trains must stop at the first open telegraph or telephone office after 2:00 A. M. adjust their watches to conform with the clock at that office and compare with each other.

Employees, required by rule to have a reliable watch, on duty at the time Daylight Saving Time becomes effective, after adjusting their watches to show Daylight Saving Time, must compare time with first available standard clock or with a watch that has been adjusted to show Standard Daylight Saving Time.

Employees, required by rule to have a reliable watch, reporting for duty after Daylight Saving Time becomes effective, before going on duty must adjust their watches to show Daylight Saving Time and must compare time with the first available standard clock or with a watch that has been adjusted to show Daylight Saving Time.

During the period Daylight Saving Time is in effect STANDARD time will be transmitted over this company's telegraph lines from 12.59 P. M. to 1.01 P. M. daily except Sunday instead of 12.00 Noon.

**F. R. GERARD,  
Superintendent.**

**PENNSYLVANIA RAILROAD  
NEW YORK ZONE  
LONG ISLAND RAILROAD**

Jamaica, N. Y., April 16, 1931.

**GENERAL ORDER NO. 113-32, ZONE C**

**Effective Between 8:30 P. M. and 10:30 P. M., Saturday,  
April 18th, 1931**

**BETWEEN NOSTRAND AVENUE AND  
"FT" INTERLOCKING**

Automatic train stops in service at the following signals: Automatic Signals A1-A3-A4-A5-A7-A8-A9-A10-A11-A12-A14 and at eastward and westward home signals at VD Interlocking station and dwarf signal located 170 feet east of VD Interlocking station governing westward movements on No. 2 track. Dwarf signals located opposite automatic signals A1 and A5 are controlled over the automatic train stops located at automatic signals A1 and A5.

Key-by device in service (small iron case) located 10 feet from signal on tunnel wall at each automatic train stop and surrounded by White circle and so located that designated person may operate it from front end of motor car and electric engines.

When a train is stopped by a signal at which an automatic train stop is located, after complying with Rules 509 and 629, to enable the train to proceed, the engineman or conductor or such person as they may designate must at once place the release key in slot in the front of small iron case, turn and hold key to right for 5 seconds or until it is known that automatic train stop is down. Key may then be removed and train proceed in accordance with signal aspect displayed, as the automatic train stop will remain down until entire train has passed over same. The release key is fastened to side of key-by device. If for any reason the automatic train stop arm cannot be released by using release key, train may proceed, passing trippers in tripping position, exercising care to avoid damage to train.

In territory within confines of this General Order Special Instructions D-1614, page 281, Time Table 113, amplified and modified accordingly.

Telephone in service with Clearance Cards Form C located adjacent to key-by device at eastward and westward home signals at "VD" Interlocking and directly connected to VD Interlocking station, making it unnecessary for engineman of motor cars and electric engines to leave train when complying with Rule 629. These telephones are to be used from front end of motor cars or engine cabs only. Other telephones located in manholes and designated by blue lights.

**Effective Monday, April 20th, 1931**

**HAMPTON BAYS**

Speed of 15 miles per hour must not be exceeded over Shinnecock Canal Bridge 1.1 miles east of station.

PENNSYLVANIA RAILROAD

NEW YORK ZONE

LONG ISLAND RAILROAD

Jamaica, N. Y., February 20, 1931.

GENERAL ORDER NO. 113-20, ZONE C

Effective between 10:00 A. M. and 3:00 P. M., Thursday, February 26, 1931

BETWEEN JE INTERLOCKING - J4 BLOCK STATION AND AUTOMATIC SIGNALS S-114 AND S-115.

Temporary Eastward high platform, No. 6 track, Union Hall Street; J4 Block Station, switches and signals controlled therefrom; Eastward and Westward Montauk Branch tracks from J3 Block Station to a point 3500 feet east thereof; No. 3 track between J3 Block Station and JE Interlocking, and No. 1 track between J4 Block Station and J3 Block Station OUT OF SERVICE.

Special Instructions D-1502, Page 279, timetable 113; paragraph A - General Order No. 113-1, Zone C and General Order No. 113-11, Zone C, modified accordingly.

Tracks, switches, westward high platforms, interlocking and automatic position light type signals displaying standard aspects IN SERVICE, as shown on attached diagram. Special Instructions D1502, Page 279, time table 113, amplified accordingly.

Automatic Train Control in service on No. 2 Montauk Branch track from signal S-98 and on No. 1 Montauk Branch track to the westward home signal bridge at JE Interlocking. Special Instructions D-2506, Page 296, timetable 113, amplified accordingly.

Automatic Block system rules 501 to 514, inclusive, are in effect, and rule 505 amplified remains in effect on No. 5 track.

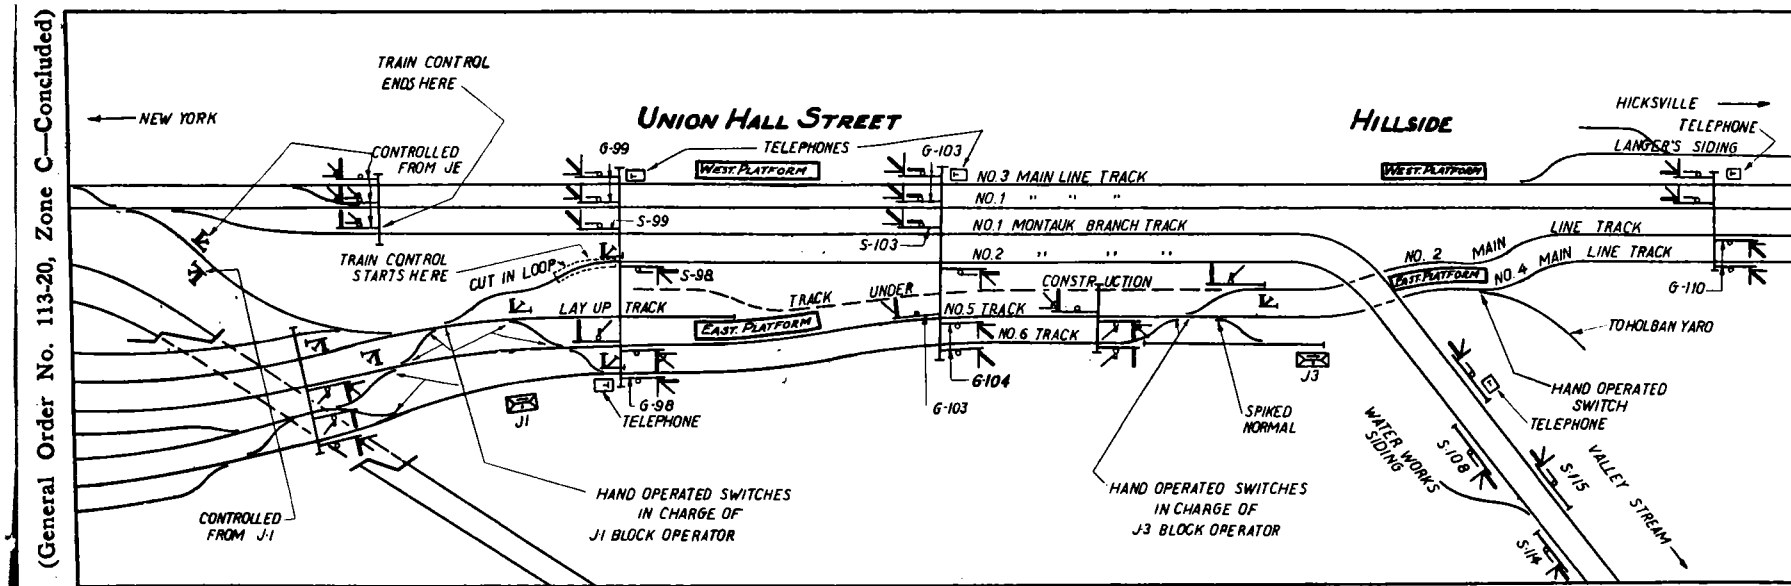

Position light type signals governing movements on No. 1 and No. 3 Main Line tracks located on signal bridge east of Hillside, No. 1 Montauk Branch track located at South Street and No. 2 Montauk Branch track located on signal bridge west of Hillside are not numbered. When power is off the third rail the marker light on these signals will not be lighted, resulting in the display of aspect Fig. 1, page 102aa, Book of Rules, in which case these signals must not be passed without instructions from the Train Dispatcher. Special Instruction D-3003, Page 301, timetable 113, amplified accordingly.

Westward trains from Holban Yard will run against the current of traffic on No. 4 Main Line track, Hillside to J3 Block Station upon receiving verbal permission from the Block Operator at J3 Block Station, who before giving permission for such movements, must assure himself that track is clear and signals governing opposing trains are in stop position and signal lever blocked with the standard blocking device, as provided in Rule 221-C.

Speed of 25 miles per hour must not be exceeded within the limits of this order.

F. R. GERARD  
Superintendent

(General Order No. 113-20, Zone C—Continued)

(General Order No. 113-20, Zone C—Concluded)

**PENNSYLVANIA RAILROAD  
NEW YORK ZONE  
LONG ISLAND RAILROAD**

Jamaica, N. Y., March 3rd, 1931

**GENERAL ORDER NO. 113-22, ZONE C**

**Effective between 5:00 A. M. and 5:00 P. M., Sunday,  
March 8th, 1931**

**BETWEEN JE INTERLOCKING AND HILLSIDE**

J1 and J3 Block Stations, switches and signals controlled therefrom; westward lay up track between J1 Block Station and JE Interlocking; connection to Holban Yard on No. 4 Main Line track, OUT OF SERVICE.

Paragraph A and seventh paragraph respectively of General Orders 113-1 and 113-20, Zone C annulled. Rule 505 amplified—no longer in effect on track No. 5.

Tracks, switches, interlocking and automatic position light type signals displaying standard aspects IN SERVICE as shown on attached diagram. Special Instructions D1502, Page 279, Time Table 113, amplified accordingly.

Automatic Block system rules 501 to 514, inclusive, are in effect. Special Instructions D2501, Page 296, Time Table 113, amplified accordingly.

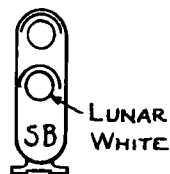

Eastwardly limits of JE Interlocking extended eastward to signal bridge west of Union Hall Street on No. 5 Westward Freight, Nos. 4 and 2 Main Line and No. 2 Montauk Branch tracks.

No. 5 and No. 6 tracks between signal bridge west of Hillside and Holban Yard will be operated as yard tracks under jurisdiction of Yard Master at Holban Yard. Special Instructions D-1801, Page 283, Time Table 113, amplified accordingly. On tracks Nos. 5 and 6 within yard limits, Rule 93A amplified as follows: "All trains must run prepared to stop unless track is seen or known to be clear. Yard movements are not required to protect against other yard movements or extra trains."

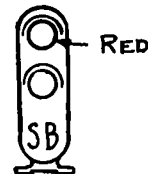

Position light type signals governing movements on No. 2 and No. 4 Main Line tracks located on signal bridge west of Hillside and on No. 6 track located on signal bridge west of Union Hall St. are not numbered. When power is off the third rail the marker light on these signals will not be lighted, resulting in the display of aspect Fig. 1, page 102aa, Book of Rules, in which case these signals must not be passed without instructions from the Train Dispatcher.

(General Order No. 113-22, Zone C—Continued)

Westward third rail section break signal for No. 5 track located at Hillside Sub-station IN SERVICE displaying following aspects:

INDICATION—Proceed.  
NAME—Clear Signal.

INDICATION—Stop.  
NAME—Stop Signal.

These signals must not be passed in the stop position without instructions from the Train Dispatcher; trains other than electric trains are not affected except when electric trains are moved by steam locomotives.

Special Instructions D-3003, Page 301, Time Table 113, amplified accordingly.

Hand operated crossover between Nos. 11 and 12 tracks east of Jamaica Station equipped with an electric lock and controlled from J Interlocking Station.

Speed of 25 miles per hour must not be exceeded on all tracks between Hillside and signal bridge west of Union Hall Street.

**Effective 7:30 A. M., Sunday, March 8th, 1931**

**"F" INTERLOCKING**

Automatic Signal S-6, located 1610 feet west of "F" Tower governing eastward movements on westward yard running track between Montauk Cut-off and Main Line, changed to two arm semaphore type home signal, and controlled from "F" Tower. Special Instruction D-1801, Page 283, Time Table 113, modified accordingly.

Two arm interlocking semaphore type home signal located on Signal Bridge, 65 feet west of "F" Tower, governing eastward movements from Montauk Cut-off track moved west 15 feet and changed to position light type signal.

One arm interlocking semaphore type home signal located on Signal Bridge, 65 feet west of "F" Tower, governing eastward movements from Long Island City eastward Main Line track, moved west 15 feet and changed to position light type ground signal.
