**SPECIAL INSTRUCTIONS**

Special instructions prefixed by letter or number modify Rules for the Government of the Operating Department with corresponding letter or number, unless otherwise specified.

**A-1. OTHER RAILROADS.**

Between: N. Y. C. Crossing and Notre Dame, South Bend M. C. time table governs.

"PO" and Calumet Park Interlocking, trains run via M. C.; M. C. time table governs.

Indiana Harbor and Osborn, Ivanhoe and Columbia Avenue, and between Calumet Park and Blue Island, trains run via I. H. B.; I. H. B. time table governs.

Chicago and Englewood, N. Y. C. and C. R. I. & P. Joint Time Table governs.

Between Wyton and WR, C. C. C. & St. L. Ry. time table governs.

N. Y. C. Jct. and Zearing, trains run via C. B. & Q. C. B. & Q. time table governs.

Ladd: C. M. St. P. & P. trains use N. Y. C. tracks between C. M. St. P. & P. Jct., and C. M. St. P. and P. connection just east of Q crossing.

Knox: Engines turning must obtain permission from N. Y. C. & St. L. before entering N. Y. C. & St. L. tracks.

Between: C. C. C. & St. L. Ry., yard at Court Street and N. Y. C. connection at 5th Avenue, Kankakee.

Movements will be made at restricted speed.

A Trainman must ride on last car of train or cut.

If main track is blocked for any reason, full protection must be given in accordance with Rule 99.

Kankakee on C. C. C. & St. L. and old K. & S. Ry. tracks: Trains, cuts or engines moving in either direction between N. Y. C. connection at 5th Avenue and Kankakee must obtain permission from Signalman at C. C. C. & St. L. Passenger Station before beginning such move, must report clear of main track at N. Y. C. connection at 5th Avenue or Schuyler Avenue, must not again enter main track without permission and must keep clear of first class trains.

Trains, cuts or engines will use middle track between Greenwood and Schuyler Avenues, unless otherwise authorized.

**B-3. REPORTS.**

When a train or engine crew has been on duty 14 hours, the conductor must send report to the Superintendent by wire.

When car of live stock is due to be fed, rested and watered within 3 hours, the conductor must send report to the Superintendent by wire.

**DEFECTIVE CARS.**

Cars becoming defective enroute when loaded with live stock or perishable freight may be hauled by chains instead of couplers to next repair point, and when so hauled at the rear of caboose must be chained in addition to being coupled unless the air brakes are in service.

Other defective cars must not be hauled by chain in revenue trains or in association with cars commercially used, beyond the first side track.

| East of Depue Jct., Illinois River..... | Interlocking. |

**103. PUBLIC GRADE CROSSINGS.**

When switching or when trains or cars are left standing on the approach track circuit of a highway flashing light signal, causing the continuous operation of the signal, a member of the crew must, when practicable, be stationed at the crossing to facilitate highway traffic, advising such traffic when it is safe to cross.

**LaPorte:**

When making movements against current of traffic on tracks Nos. 2 and 4 between JD and Durham, trains or engines must stop before crossing Orchard Avenue and Weller Avenue and trainmen must flag movements over these street crossings.

**Chesterton, Calumet Road:**

To operate flashing light signals, engines, with or without cars, making movement on track No. 2 over track pan for the purpose of scooping water or taking water at stand pipe must move at least five hundred (500) feet east of east end of track pan before making return movement; otherwise, crossing must be protected by trainman on the ground.

Elkhart, Jackson St.: (E. & W. Branch) Trains and engines on the E. & W. Branch must stop before crossing.

Elkhart: Trainmen must flag trains or engines over the following crossings on the C. C. C. & St. L. Old Line: Division, Cassopolis, Middlebury and Main Sts., Jackson Blvd., Edwardsburg Ave. and eastbound movements over Elkhart Ave.

South Bend, M. C. Connection: Trainmen must flag trains or engines over Western Avenue during hours crossing watchman is off duty. At night lighted fusee must be used.

Hartsdale: Trainmen must flag movements over Kennedy Avenue.

Schneider: U. S. Route 41: To operate flashing light signals trains in either direction will, when setting out cars at Schneider, stop a sufficient distance short of the home signal so that, after setting out or picking up cars and engine is back on train, engine will be clear of the home signal.

Walkerton: Trainmen must flag trains or engines moving over U. S. Route 6 on B. & O. wye track. At night, lighted fusee must be used.

Dwight: Trainmen must flag trains or engines moving over U. S. Route 66 on wye track. At night lighted fusee must be used.

**104. SWITCHES.**

**Remote Controlled Switches.**

Remote controlled switch is located at:

| Location                | Signal Station | Signal     | Tracks           |
|-------------------------|----------------|------------|------------------|
| 1.28 miles west of..... | PO.....        | 501.2..... | No. 2 to siding. |

Enginemen or trainmen finding signal governing movement over switch displaying the stop indication will call signalman at signal station for instructions. Additional instructions are located in telephone box.

**Spring Switches.**

Jackson Street, Danville: At junction of No. 1 and No. 2 tracks; normal position for No. 2 track. Trains moving from No. 1 track to single track will trail this switch. For switching movements the switch must be operated by hand. It must be left in normal position.

Trains or engines stopped while trailing through switch in normal position must not take slack or make reverse movement unless switch is properly lined.

When signal indicates Stop the switch must be examined, and if found in proper position train may proceed, after obtaining permission from Signalman at Wyton; if not in proper position, switch must be operated by hand before movement is made over the switch. Rule 104B will govern if switch is found defective.

**104a. NORMAL POSITION OF SWITCHES.**

The normal position of switches is as follows:

FN, switch connecting siding with G. & W. Branch track: For siding.

Walkerton, team track switch: For B. & O. wye.

Hamlet, Lumber track switch: For Lumber Track.

Wheatfield, wye switch from the C. A. & S.: For team track.

Hays, wye switch: For G. T. W. wye.

**DESIGNATION AND USE OF MAIN TRACKS.**

Single Track:  
Between: South Bend and N. Y. C. Jct.  
Depue Jct. and Depue.  
Ladd Jct. and Churchill.  
Schneider and Morocco.  
Sheff and NX.  
Jackson Street—Danville and WR.

**D-151.**

Two Tracks:  
Between: Elkhart passenger station and Signal Station JD  
Durham and Signal Station NE.  
Signal Station JN and Signal Station 61st St.  
Tracks are numbered from the south and will be used as follows:  
No. 2, Eastward.  
No. 1, Westward.  
Between: Osborn and Schneider.  
Morocco and Sheff.  
NX and Jackson Street—Danville.  
Tracks are numbered from the west and will be used as follows:  
No. 1, Southward  
No. 2, Northward

**Four Tracks:**

Between: Signal Station JD and Durham  
Signal Station NE and Signal Station CR  
Tracks are numbered from the south and will be used as follows:  
No. 4, Eastward—Freight.  
No. 2, Eastward—Passenger.  
No. 1, Westward—Passenger.  
No. 3, Westward—Freight.  
Between: Signal Station CR and Signal Station JN.  
Tracks are numbered from the south and will be used as follows:  
No. 2, Eastward—Passenger.  
No. 1, Westward—Passenger.  
No. 4, Eastward—Freight.  
No. 3, Westward—Freight.

**221b. MOVEMENT BY TRAIN ORDERS.**

Rule 221b governs at stations where T.O. signals are shown in list of Stations, Office Calls, Signals and Telephones.

**S-231. OPPOSING AND FOLLOWING MOVEMENT OF TRAINS ON SINGLE TRACK BY BLOCK SIGNALS.**

Rule S-231 governs:  
Between: Jackson Street—Danville and Wyton.

**S-241. MOVEMENT OF TRAINS IN SAME DIRECTION ON SINGLE TRACK BY BLOCK SIGNALS.**

Rules S-241 to S-244 inclusive governs:  
Between: Wyton and WR.

**D-251. MOVEMENT OF TRAINS WITH CURRENT OF TRAFFIC ON TWO OR MORE TRACKS BY BLOCK SIGNALS.**

Rule D-251 governs:  
Between: Elkhart and Chicago.  
Osborn and Schneider.  
Morocco and Sheff.  
NX and Jackson Street—Danville.

**SIGNAL ASPECTS, INDICATIONS, and RULES.**

Special signal aspects, signal indications and signal rules will be found in the back of the time table.

**TAKE-SIDING SIGNAL.**

Take-siding signal will be given by the display of a green board by day and the green board and two green lights by night. This signal applies only to the movement of freight

trains with the current of traffic and will be displayed on the ground at, or from the window of communicating station. Engineman must acknowledge the display of the signal by sounding engine whistle signal 14(g).

Westward freight trains receiving TAKE-SIDING SIGNAL at Durham will take siding at Chesterton.

Westward freight trains receiving TAKE-SIDING SIGNAL at PO will take siding at Pine.

**GRADE SIGNALS.**

A yellow disc, showing the letter G, displayed to the right of an automatic signal, indicates grade signal. Grade signals must be observed as prescribed in Rule 291, except heavy tonnage freight trains will not be required to stop, but may proceed as prescribed in Rule 509a.

**SIGNAL INDICATIONS.**

WG, Standard signal located south of westward yard lead track governs westward movements on westward yard lead track.

Porter, freight trains receiving indication as per Rule 291, Figure 192, "STOP, THEN PROCEED AT RESTRICTED SPEED", at Signal 499.1 at Porter, will STOP east of highway crossing east of Chesterton Station and must not proceed until indication changes or permission is received from Signalman at PO Interlocking.

**297. RAILROAD GRADE CROSSING SIGNALS.**

Trains must stop before proceeding unless otherwise indicated.

| Location                 | Signal                    | Indication                                |

**305. MANUAL BLOCK SYSTEM.**

Manual Block System is in use:  
Single Track:  
Between South Bend and N. Y. C. Jct.  
Schneider and Morocco.  
Sheff and NX.  
Jackson Street—Danville and WR

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Trains must not pass Remote Controlled Manual Block Signals at Ginger Hill, Enos and Jackson Street, Danville, without entire train or to do switching without first notifying the controlling signalman of intended moves and must report to controlling signalman as soon as such moves have been completed.

Two or more Tracks:  
Between ND and Schneider.  
Morocco and Sheff.  
NX and Jackson Street—Danville.

Rules 318-A and 331-A for absolute block for following movements only, govern the movement of passenger trains.

Rules 318-B and 331-B for permissive block, for following movements only, govern the movement of trains other than passenger trains.

Except where Rule D-261 is in effect, Manual Block System Rules will govern movements against the current of traffic.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

**Single and Two or More Tracks:**  
A signalman may admit a train other than a passenger train to a block that is wholly or partly within yard limits under a clear block indication when it is known that the block is not occupied by a passenger train or not occupied by a train other than a passenger train outside of yard limits.

Indications of Manual Block Signals will convey to second class and extra trains information as to condition of that portion of the block that is not within yard limits. Second class and extra trains and engines must move within yard limits prepared to stop unless the main track is seen or known to be clear.

At interlockings where home (or dwarf) signals are also used as manual block signals, enginemen or trainmen must before passing stop-signal, in addition to clearance Form A, receive hand signal as provided in Rule 663, or permission from the signalman.

Where an automatic signal is in use in Manual Block territory, it will indicate condition of track only between automatic signal and fixed signal reading "End of Automatic Block."

**373. BLOCK STATIONS ARE OPEN.**

Block stations are open as specified in list of Stations, Office Calls, Signals and Telephones.

**505. AUTOMATIC BLOCK SYSTEM.**

Automatic Block System is in use:  
Two or More Tracks:  
Between Elkhart and Chicago.  
Osborn and ND.

Except where Rule D-261 is in effect, Manual Block System Rules will govern movements against the current of traffic.

Rules 317-A and 331-A for absolute block for opposing and following movements govern the movement of passenger trains.

Rules 317-B and 331-B for absolute block for opposing movements and permissive block for following movements govern the movement of trains other than passenger trains.

Automatic signals are in use in Manual Block territory as specified in list of Stations, Office Calls, Signals and Telephones.

**606. INTERLOCKING SIGNALS**

Interlocking signals used as block signals will be indicated by the letters INT.-M.B. in list of Stations, Office Calls, Signals and Telephones.

**703. DEFECTIVE CARS.**

Cars must not be placed forward of 15 cars from caboose when so carded. So far as possible, inspectors must apply these cards to cars requiring such movement prior to trains being made up in the yard.

**SNOW PLOW EQUIPMENT.**

Snow plows must not be hauled backward when being moved in freight train.

**MAKE-UP OF FREIGHT TRAINS.**

Cranes in non-revenue trains must be hauled ahead of cars occupied by crew unless otherwise instructed.

Scale test cars must be hauled only in slow or local freight trains.

**705. LEAVING CARS ON SIDETRACKS.**

During cold weather, when cars equipped with water system are left where there is no car inspector, conductor must notify Superintendent promptly. When impossible to place cars on steam and car inspector is not available, the steam connections

should be parted and end valves, admission valves and blow off or drain valves opened. The water system should be drained by opening faucets at wash basin and drain valves in wash basin and behind hoppers. On cars not equipped with drain valve behind hopper, the hopper valve handle should be tied open. Water coolers should be drained. Steam Heat Equipment Rule 1725 is modified accordingly.

Cars must not be left bridging across insulated joints in track rails where tank cars are placed.

Cars with hot journals must not be left on any track in close proximity to where gasoline is loaded or unloaded.

#### 824. MAKE-UP OF PASSENGER TRAINS.

Passenger equipment must be of steel construction with the exception that baggage, horse, refrigerator and milk cars of steel underframe construction may be hauled, also such steel underframe passenger cars as are used under special arrangement.

Trains containing more than 5 cars 60 feet or over in length, limited to 30 cars.

Trains containing not more than 5 cars 60 feet or over in length, limited to 40 cars.

#### 841. U. S. MAIL.

A train handling a postal car off its run must also make the stops of the train in which it is usually handled.

When necessary, in case of derailment or washout, employes must see that postal clerks and mail are promptly transferred and every possible convenience furnished for working the mail.

Railroad employes are required to handle, load and unload storage mail carried in baggage and storage cars, and in baggage end of apartment cars.

The loading of U. S. Mail must be given preference over baggage and express. Conductor must not start train until the handling of U. S. Mail is completed. Trains scheduled to stop to discharge passengers, and having U. S. Mail for such points, must stop to unload mail.

A train shall not depart from a station and leave mails which are being loaded or are being trucked from vehicles or from part of the station to the train or aboard a connecting train that has come to a stop in the same station.

Mail should not be carried on trains not regularly authorized to carry same unless requested in writing to do so by a representative of the Railway Mail Service.

When a train is regularly authorized to carry U. S. Mail, all mail offered at stations where the Post Office Department does not maintain a Transfer Clerk or Postal Clerk should be accepted regardless of the space authorized.

When a regular authorization is exceeded from any station at which the Post Office Department maintain a Transfer Clerk or Postal Clerk, the trainmen should secure a written request covering such excess. Failure to receive such request should be reported on the trip report of mail carried.

The Post Office Department Regulations provide the number of sacks, equivalent to units of space authorized as follows:

|                       |        |                       |        |
|-----------------------|--------|-----------------------|--------|
| 1 to 50 sacks.....    | 3 ft.  | 251 to 300 sacks..... | 18 ft. |
| 51 to 100 sacks.....  | 6 ft.  | 301 to 350 sacks..... | 21 ft. |
| 101 to 150 sacks..... | 9 ft.  | 351 to 400 sacks..... | 24 ft. |
| 151 to 200 sacks..... | 12 ft. | 401 to 450 sacks..... | 27 ft. |
| 201 to 250 sacks..... | 15 ft. | 451 to 500 sacks..... | 30 ft. |

Two (2) outside parcels equal one sack.

Utmost care must be used in handling fragile (red label) parcel post mail.

Mail pouches delivered unlocked must not be accepted but returned to Post Office Department, and immediate advice given to Superintendent by wire.

When mail arrives late at night, or when Government messenger is not on hand to receive it, it must be kept in a safe place until proper delivery can be made.

If a mail pouch is stolen, immediate advice must be given to Superintendent by wire.

U. S. Mail Clerks, required to deadhead on mail trains, will be permitted to ride in crew coach on presentation of their travel commission.

Train crews are not permitted to ride in Railway Post Office cars while in use, even though the railroad company may furnish a Railway Post Office car larger than the size authorized.

All full mail cars and parts of cars having the legend "United States Mail" or "U. S. Mail" shall be reserved exclusively for carrying the mails and shall not be used for any other purpose.

#### 916. HEATING, LIGHTING, VENTILATION AND AIR CONDITIONING OF CARS.

Rules for the Operation and Supervision of Steam Heat Equipment. Current Rules govern.

The application of Steam Heat Equipment Rule No. 1724 is as follows:

| Approaching | Direction | Open rear end train pipe valve | Engineman shut off steam at   |
|-------------|-----------|--------------------------------|---|
| Chicago     | Westward  | 31st St.                       | 22nd St.  |
| Elkhart     | Eastward  | Eastbound hump                 | *Between eastward signal 440.2 and switchman's shanty west of station platform. |

\* Should a train be stopped for this signal or for crossover switches, starting valve must not be closed until after train is again started.

Rear end train pipe valve must be opened gradually to full open position when blowing out steam line to avoid metal gaskets being blown off.

When one or more of the first five cars in train are equipped with rubber steam hose and 130 pounds steam pressure is not sufficient to properly heat the train, pressure may be increased to 150 pounds. Steam Heat Equipment Rules Nos. 1706, 1707 and 1712 are modified accordingly.

Before steam pressure is connected to standing cars, train line valve must be closed at opposite end of line.

#### 917. PASSENGER BRAKEMEN.

Rear brakemen of passenger trains will be governed as follows:

| When rear car is                               | And car next ahead is   | Carry equipment in following location:   |   |
|--|-------------------------|--|---|
|  |                         | Storm clothing   | Container and lanterns  |
| Pullman Obs.                                   | Pullman                 | On door catch of aisle door next to rear car if drawing room is next to rear car. If not, place in rear vestibule of car next to rear. | Rear vestibule of car next to rear out of passageway and so placed as to avoid inconvenience to passengers using vestibule. |
| Private or Official DeLuxe Obs., Coach, Diner. | Pullman Pullman Pullman | Rear of coach.   | Rear of coach.  |
| Pullman without observation end.               | Coach                   | On door catch of aisle door at rear of train.  | Rear vestibule, so placed as to avoid inconvenience to persons using vestibule.   |

When more than one private car, conductor will instruct rear brakeman where equipment will be carried.

Grips or other personal effects not required in line of duty must not be carried at rear of train.

#### 932. AIR BRAKES.

Rules for the Operation and Supervision of Air Brakes and Train Air signal. Current Rules govern.

The note at foot of Air Brake Rule 1554 issued in paster form, modifying Rule 1554 of Rules for the Operation and Supervision of Air Brake, etc., Current Rules, is modified as follows:

Note:— It will be observed from the foregoing that the locomotive brake should be permitted to apply with the train brakes when making running tests, unless in the judgment of the engineman, it is necessary to prevent the locomotive brake applying to avoid stalling.

#### HAND BRAKE TEST.

A running test of hand brakes must be made on a motor car upon leaving initial terminal when operating as a single unit. As soon as speed permits engineman must shut off power and signal for brakes. The Conductor or member of train crew must then apply hand brakes to determine if they are operating properly. In case hand brakes do not operate properly, motor car must proceed at restricted speed to the nearest point at which repairs can be made.

#### 1056. JOURNAL BOXES.

Current "Instructions for the Lubrication and Care of Journal Boxes" govern.

When a journal is found overheating enroute, train must be stopped and examination made. Packing must be adjusted or box repacked if this will overcome trouble. If cause of heating cannot be corrected in this manner or car cannot be moved to the next terminal through the use of cooling compound, car should be set out.

Water or snow should not be used for cooling hot journals except in emergency, and when used, journal should be cooled as slowly as conditions will permit.

When cars with hot journals are set out where inspectors do not take immediate charge, precautions must be taken to know that journal is left in condition to avoid damage to car by fire.

Conductor must make prompt report to Superintendent and car foreman of cars treated enroute, or set out account overheated journal, stating whether treated by cooling compound or by water or snow.

#### SPEED RESTRICTIONS

Speed restrictions are shown in miles per hour and apply to entire train.

##### General

|   |    |   |    |
|---|----|---|----|
| Engines, Classes B and U under steam or being towed.....  | 20 | Trains with scale test cars or Jordan spreader.....                         | 25 |
| Engines running backward by night over public crossings....   | 15 | Trains with dead engines not having all side or main rods....               | 20 |
| When automatic train stop device becomes inoperative after leaving terminal or when forestalling whistle fails to sound while forestalling: |    | Work trains with locomotive cranes.....                                     | 30 |
| Passenger, mail, express and milk trains.....   | 35 | Revenue freight trains with cranes moving on own wheels....                 | 25 |
| Other trains.....   | 20 | Freight trains with pushers.....  | 25 |
| Circus trains with freight equipped cars.....   | 30 | Switches and crossovers, not interlocked, when diverging...                 | 10 |
|   |    | Rail Detector Car X8015, under own power or on rear of passenger train..... | 40 |

Note: General speed restrictions govern, except when further restricted by Division or Local speed restrictions.

**ENGINE AND CAR RESTRICTIONS.**

Rail Detector Car X-8015 must not be operated in freight train.  
 Steam engines must not be coupled head on when double heading or running light. In case of emergency, instructions should be obtained from the Superintendent.  
 Motors in damaged condition, making them unfit to be operated at speeds specified in Speed Restrictions, must be hauled separately.  
 Enginemen operating engines equipped with storm wind-shield wings must have windshields closed when operating in all yards or on side tracks.

Engines must not be operated as shown below:

 Yard No. 2 — Grapecreek Coal Co.  
 No engines closer than 75 feet to tipple on tracks Nos. 4, 5, 6, and 7.

**SPECIAL USE OF TRACKS.**  
 Between west entrance to Indiana Harbor elevator yard and Signal Station MS:  
 First track south of track No. 4 will be used as a yard lead for the movement of yard trains and engines in either direction. Trains using this track must proceed expecting to find track occupied and be able to stop short of any obstruction.  
 Schneider: Southward freight trains doing work or being stopped at the home signal of interlocking will immediately call signalman on telephone who will advise them as to movements they can make.

**AUTOMATIC TRAIN STOP.**  
 Enginemen and firemen must be qualified on Rules for the Operation of Automatic Train Stop.  
 Road engines and motors, operated between Elkhart and Chicago, Main Line, must be equipped with automatic train stop device in working order, and cut in, except:  
 a. When used as pusher or second engine.  
 b. By specific authority of Superintendent.  
 c. When automatic train stop device becomes inoperative after leaving terminal, passenger, mail, express and milk trains must be operated at a speed not exceeding 35 miles per hour, and other trains at a speed not exceeding 20 miles per hour. Engineman must notify Superintendent at the first communicating station, and relief engine, if available, must be obtained at the first engine terminal. Train may proceed at normal speed when authorized by train order. Train dispatcher will arrange for clear block between open signal stations in advance of such train, within the limits of the train order.  
 When forestalling whistle fails to sound while forestalling, engineman will reduce to and operate at speed specified in Paragraph C until he has occasion to again forestall as prescribed by the rules, and the whistle sounds; normal speed may then be resumed. Failure of whistle to sound must be reported on Form SC-1.

SIGNAL ASPECTS, SIGNAL INDICATIONS AND SIGNAL RULES  
THE FOLLOWING SPECIAL SIGNAL ASPECTS, SIGNAL INDICATIONS AND  
SIGNAL RULES ARE IN EFFECT:

FIG. 48  
RULE 281  
PROCEED.

FIG. 102  
RULE 285

FIG. 152  
RULE 289C  
NO TRAIN ORDERS.

FIG. 164  
RULE 289E  
TRAIN ORDERS.

Proceed preparing to stop at switch or next signal. Train exceeding medium speed must at once reduce to that speed. Reduction to medium speed must commence before passing signal and be completed before accepting a more favorable indication.

# SPEED TABLE

NOTE—This table is for information only and does not authorize exceeding speed limitations of special instructions or however issued.

| Time per Mile  | Miles per Hour | Time per Mile  | Miles per Hour | Time per Mile  | Miles per Hour | Time per Mile  | Miles per Hour |
|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| 0 min. 36 sec. | 100.00         | 1 min. 30 sec. | 40.00          | 2 min. 24 sec. | 25.00          | 3 min. 18 sec. | 18.18          |
