The Atchison, Topeka & Santa Fe Railway Co.

Coast Lines

ALBUQUERQUE DIVISION.

EMPLOYEES' TIME TABLE

IN EFFECT

Sunday, December 17, 1939,

AT 12:01 O'CLOCK A. M.

MOUNTAIN STANDARD TIME

Superseding Time Table No. 74, Dated June 11, 1939,
and any Supplements thereto.

75

75

This Time Table is for the Government and Information of Employees of this Company only.

E. E. McCARTY,
General Manager,
Los Angeles, Cal.

F. J. MacKIE,
Assistant General
Manager,
Los Angeles, Cal.

O. L. GRAY,
Superintendent,
Winslow, Ariz.

R. C. KLINE,
Assistant Superintendent,
Fourth and Parker Districts,
Prescott, Ariz.

W. L. MORE,
Trainmaster,
First and Second Districts,
Winslow, Ariz.

E. E. FOULKS,
Trainmaster,
Third and Grand Canyon
Districts,
Winslow, Ariz.

L. M. SHIPLEY,
Chief Dispatcher,

G. H. CUMMING,
Night Chief Dispatcher,
Winslow, Ariz.

A. R. WOODS,
C. J. TRIMBLE,
J. R. POE,
C. M. SCOTT,

Dispatchers,
Winslow, Ariz.

S. ALBRIGHT,
J. B. RUDERT,
K. I. SCHELL,

ALL DISTRICTS

1. A copy of the book entitled, "The Atchison, Topeka & Santa Fe Railway System, Rules and Regulations of the Operating Department," revised 1927, and of the book, "Rules and Regulations for the Maintenance of Way and Structures," revised 1928, must be in the hands of all employees whose duties are in any way prescribed thereby.

2. Rule S-72: Except as otherwise provided, all eastward trains are superior to westward trains of the same class.

3. The number of tons shown by rate sheet as ordinary rating for engines is based on maximum grade; but between points where grades and other conditions are favorable more cars can frequently be hauled, and conductors are required to fill out trains to car limit or to full capacity of their engines.

4. Rule 1 (B): Standard clocks are located at Belen (station and yard offices), Gallup (station and yard offices), Winslow (telegraph office and roundhouse), Williams, Ash Fork, Seligman, Prescott, Mobest, Phoenix, and Parker.

5. Rule 5: At stations named below, schedule time and train orders apply at switch where opposing train enters siding. First class trains must not pass the point where traffic is received or discharged before time shown in schedule.

Isletasiding west of depot.
Kirkland, Hillsidesiding west of depot.
Peoria, Mobestsiding east of depot.

When a section of double track is used as single track, time will apply at end of double track, usually the crossover. When more than one crossover, train order will specify which one to be used.

6. Rule 88: At Aguila, the crossover east of depot is the "heading-in" point for eastward trains required to take siding. Westward train holding main track shall remain clear until opposing train has entered siding.

7. Rule 10 (A): Permanent slow boards are located approximately 3,000 feet in advance of curves, bridges, or other locations where speed of trains is permanently restricted, except that where such slow boards cannot be so placed account of physical conditions, sidings, etc., the distance may be increased to a location approximately 4,000 to 5,000 feet in advance. Where two or more restricted areas are close together and speed allowed on each is the same, but one slow board will be used. When the speed differs on each area, additional slow boards will be placed, it being understood that the speed indicated on one or a succession of slow boards must be respected until a "green" board is passed. Where permanent slow boards indicate train speeds in excess of the maximum engine speeds prescribed in time tables, the maximum engine speeds prescribed must be observed.

8. Rule 17: In addition to the provisions thereof, trains on siding at night must not display headlight until rear of train on the main track has passed.

Electric headlights must be dimmed:

(a) At meeting points by train on main track after switch has been lined for opposing train to enter siding, as prescribed by Rule S-89 (A).

(b) Approaching another train in the act of receiving or discharging passengers.

(c) On double track as may be expedient when trains are approaching from opposite direction.

Headlight will be displayed through tunnels.

9. Rule 82 (A): Bulletin boards and books are located at Albuquerque, Abajo, Belen, Gallup, Winslow, Williams, Ash Fork, Seligman, Clarkdale, Prescott, Wickenburg, Mobest, Phoenix, and Parker.

10. Rule S-83 is amended to read: A train must not leave its initial station on any district, or a junction, or pass from double to single track, until it has been ascertained whether all trains due, which are superior, have arrived or left.

Rule 83 (A): The second paragraph is amended to read: Before leaving a register station at which it is necessary for the conductor to check the train register, he must fill out Form 1514 and deliver same personally to each engineman of his train.

At register stations, conductors must personally register their trains, unless relieved therefrom by Form T order, except as provided in the following:

Dalies—Westward inferior trains from Belen District may accept check of register at Belen as applying to end of double track Dalies.

D. T. Junction, eastward trains may register by Form 903. Westward trains will not register, but will check register for opposing superior trains, unless their arrival was indicated on the register at Gallup.

Joseph City, westward trains may register by Form 903. Eastward trains will not register but will check register for opposing superior trains unless their arrival was indicated on register at Winslow.

Williams, Ash Fork and Wickenburg, trains originating and terminating only will register.

Supai, westward first-class trains only will register.

Matthie, first class and second class trains only will register.

Mobest, first class trains may register by Form 903 and will not check register.

11. Rule 86 is amended to read: Within automatic block signal territory, except when signals are inoperative, an inferior train must clear a first class train, or a superior train created by Example (3) of Form G train order, in the same direction, not less than five minutes and must clear the block sufficiently to prevent delay.

12. Rule 93: Yard limits are located at Belen, Dalies, Grants, Gallup, Holbrook, Winslow, Flagstaff, Riordan, Williams, Grand Canyon, Supai, Ash Fork, Crookton, Seligman, Drake, Prescott, Skull Valley, Matthie, Wickenburg, Glendale-Alhambra, Phoenix-Mobest, Clarkdale, Parker, and on Crown King District, Entro.

13. Rule 97: Extra trains, the conductors and engine-men of which have been furnished clearance card, Form 902, numbered and OK'd by the train dispatcher, and orders designated thereon, are authorized to move with the current of traffic on double track from a district terminal to a district terminal, or from an intermediate station to a district terminal, without Form G train orders; but if provision has been made for the use of a section of double track as single track no extra train may move over such section in either direction without having an order Form G.

A Form G order will be required for all short movements between intermediate stations except extra trains Gallup to Dalies or Gallup to D. T. Junction, Winslow to Joseph City, and helper engines returning light from Supai to Williams and from Supai and Crookton to Ash Fork will accept clearance cards as provided above.

14. Rule 103: In addition to the provisions thereof, cars must not be cut off upon grades depending upon air or hand brakes to hold them, but must be placed with the engine.

15. Rule 210: In addition to the provisions thereof, no train will leave its initial station on any district, except where office is closed or not maintained, without receiving clearance card, Form 902, numbered and OK'd by the train dispatcher.

No train will leave Ash Fork, Prescott, Wickenburg, or

Parker without clearance card, Form 902.

At Isleta, westward trains having received Albuquerque Division clearance card, Form 902, at Albuquerque or Abajo, will be governed by indication given by the train order signal.

At Dalies, trains to and from the Belen District will be governed by indication given by the train order signal.

At Williams, all trains, except Third District trains passing on main tracks, must secure clearance card, Form 902.

16. Rule 221: The second paragraph is abrogated.

Rule 221 (A) applies only to trains taking siding at stations where the train order signal is located between the siding switches.

17. The use of retainers on trains descending grades will be left to the judgment of conductors and engine-men.

When retainers are used on a freight train, speed of such train must not exceed twenty miles per hour.

18. Rule 310: Following is list of structures:

Johnson Canyon Tunnel between McLellan and Daze on Third District, tunnel between Perkinsville and Sycamore on Clarkdale District, and tunnel between Vicksburg and Harcuvar on Parker District.

At Gallup Mines, the tipples, bins, pipe lines, wires, and other obstructions located at Gallup American, Black Star, Mentmore, Southwestern, Allison and Coal Basin, will not clear an engine or a man on top or side of car.

19. Rule 313: The presence of more than two men on the footboard of an engine, one on each side of the coupler, is prohibited.

Except in lead switching, or when more than one switch or derail is to be thrown, the presence of more than one man on the front end of an engine in direction of movement is prohibited.

Except in lead switching, employees must not ride between engines and cars, and must never do so while couplings are being made between engines and cars.

20. Rule 314: No freight train will run more than 75 miles without stopping for inspection, except between Grants and Belen and between Winslow and Gallup, providing inspection stop is made between Chambers and Joseph City, inclusive.

21. Rule 356: On passenger trains, conductor or brakeman shall pass through train not less frequently than once each forty-five minutes to safeguard the comfort of passengers.

New Mexico statutes 1929 Section 116-202 provide that any railroad shall have the following powers:

"To expel from its cars at any stopping place, using no more force than may be necessary, any passenger who, upon demand, shall refuse to pay his fare, or shall behave in a rude, riotous, or disorderly manner towards other passengers, or the employees of such corporation in charge of such cars, or, upon his attention being called thereto, shall persist in violating the rules of the corporation against gambling upon its cars."

Arizona: The 1928 Revised Code provides:

"Sec. 4790. Confidence game; bogus check. Every person who, with intent to cheat and defraud, shall obtain or attempt to obtain from any other person, any money, property, or valuable thing whatever, by means or by use of any trick or deception, or false or fraudulent representation, or statement or pretense, or by any other means or instruments, or device, commonly called the "confidence game," or by means or by use of any false or bogus check, or by any other printed, written or engraved instrument, or spurious coin or metal, shall be guilty of a felony, and shall be punished by imprisonment in the state prison for a term of not less than one nor more than five years.

"Sec. 4791. Bunko games. Whoever shall deal, play or practice, the confidence game or the game called top and bottom swindle, three card monte, bunko, or any similar play, game or practice, or practice any confidence trick or game not mentioned in this section, shall be deemed guilty of a felony.

"Sec. 4792. Venue of confidence game when committed on train; duty of trainmen. Whenever any of the offenses mentioned in the two preceding sections are committed on any railroad car, coach or train, the venue shall lie, and the person be tried in any county in this state through which said railroad may run. Railroad conductors and brakemen on railroad trains cognizant of the violation of the provisions of the two preceding sections, shall immediately arrest the person so offending without warrant or other process, and failure to make such arrest or attempt in good faith to do so shall be a misdemeanor."

22. Rule 360 is modified as follows: Station announcements will be omitted between the hours of 10:00 p.m. and 6:00 a.m., when in the judgment of the conductor they are unnecessary, but should there be any passenger to detrain, a member of the crew must inform such passenger or passengers.

23. Rule 382: Revenue passengers and employes holding passes stamped "Good on Freight Trains," may be carried on freight trains, but only to and from stations where these trains are required to stop.

24. Rule 391: Standard thermometers are located at Seligman, Ash Fork, Williams, Flagstaff, Angell, Winslow, Holbrook, Adamana, D. T. Junction, Chambers, Houck, Gallup, Wingate, Thoreau, Grants, Laguna, Belen, Puro, Prescott, Skull Valley, Wickenburg, Glendale, Mobest, Salome, and Parker.

Conductors of trains having perishable freight will be governed by instructions contained in SFRD circular 2-I, supplements thereto, and special bulletins with respect to handling ventilators.

SPEED LIMITATIONS

25. The speed of passenger trains will ordinarily be that prescribed in the schedule; but in cases of delay, requiring greater speed in order to enable trains to make meeting points, or to secure connections, the speed may be so moderately increased above that prescribed in the schedule, as, in the judgment of the conductor and engineman in charge of the train, may be safe and prudent, due consideration being always given to condition of track and all the circumstances.

Enginemen of trains in which are dining or cafe cars will, during meal hours, regulate speed and manipulate air, rounding curves and making station stops so that train will move smoothly, without jar, and train conductors must observe that this is done.

Maximum speed of passenger trains, forty miles per hour, freight trains, twenty miles per hour, over switches and frogs entering or leaving turnouts at double track junctions not otherwise restricted.

Maximum speed permitted through turnouts is as follows:

- No. 8 turnout, 10 m.p.h., 1 mile in 6 minutes.
- No. 10 turnout, 15 m.p.h., 1 mile in 4 minutes.
- No. 14 turnout, 30 m.p.h., 1 mile in 2 minutes.
- No. 20 turnout, 40 m.p.h., 1 mile in 1½ minutes.

On No. 14 turnouts freight trains must reduce speed to 20 m.p.h., and on No. 20 turnouts to 30 m.p.h.

No. 8 turnouts are located within yards.

No. 10 turnouts are located on passing sidings, crossovers and junctions.

No. 14 turnouts are located at:

Dalies

- Eastward main track to Sandia main track;
- Eastward main track to Belen District main track;
- Sandia main track to westward main track;
- Belen main track to westward main track.

D. T. Junction crossover at end of double track.

Joseph City end of double track.

Winslow westward main track to westward freight main; extreme east crossover between main tracks.

No. 20 turnouts are located at:

Canyon Diablo, eastward main track over gauntlet.

Maximum speed of all trains entering or leaving all other turnouts and crossovers, fifteen miles per hour.

Trains moving against the current of traffic on double track will reduce speed to twenty miles per hour around sharp curves and where view is obscured, and use whistle freely.

Trains handling wrecking derricks, steam shovels, pile-drivers or hoists must not exceed twenty-four miles per hour, (one mile in two minutes, thirty seconds), on any portion of the First, Second, Third, Fourth, Belen, Parker, and Grand Canyon Districts, and fifteen miles per hour, (one mile in four minutes), on the Clarkdale and Crown King Districts. This rule not applicable to machines mounted on flat cars with booms tied down.

Trains having dead engines in tow must observe the following speed:

With rods down or disconnected, but with all drivers on rail, fifteen miles per hour, (four minutes for each mile);

With side or main rods up and connected, twenty miles per hour, (three minutes for each mile).

If dead engine has rods down or disconnected with one pair of drivers "swung" or suspended off rail, ten miles per hour, (six minutes for each mile);

Locomotives operating under their own steam with all side rods in place and one main rod removed, must not be operated to exceed following speeds:

20 MPH All Freight and Switch Locomotives include types:			25 MPH Passenger Locomotives Mountain Type. All Locomotives Includes		35 MPH Except Mountain Types Include	
0-4-0	2-6-2	2-10-0	4-8-2	4-4-0	4-6-0

Parker District	1	05	1	30	1	30

Passenger trains will consume not less than:

- 8 min. from Supai to McLellan,
- 13 min. McLellan to Daze,
- 12 min. Daze to Ash Fork,
- 4 min. Prieta to Iron Springs,
- 2 min. Prieta to Alto,
- 21 min. Alto to Prescott,
- 13 min. Iron Springs to Ramsgate,
- 18 min. Ramsgate to Skull Valley,

and if stopped between stations will add the duration of such stops plus one minute to the minimum time prescribed.

26. Rule 872: The second and third paragraphs are amended to read:

When this test is made by inspectors, air brake clearance card, Form 1184, will be prepared by them and delivered to conductor and each engineman on head end of train, who must have a copy before departing.

This test must also be made when changing crews or engine handling brakes upon any train, except helper engines attached or detached subsequent to such tests, in which case test shall be made as per Rule 875. A test of the train brakes is not necessary when detaching helper engines from the rear of passenger or freight trains, except where otherwise provided.

On passenger trains arriving at terminals where engine is not detached, train switched or angle cock closed, this test will be made in the following manner: The arriving engineman will, after stopping, make a full service application and leave brakes applied on train. Employes making inspection will examine each brake to see that it is applied, then signal for engineman to release and again examine train to see that each brake is released.

Rules 875-876: In addition, trains must stop and make the test prescribed:

At Supai—westward trains.

At Prieta—trains in both directions.

In making this test before descending heavy grades be governed as follows: When trains are brought to stop by the use of automatic air brakes, the brakes shall be released and when fully released on rear car an application must then be made to know that brakes are working through train and

INTERLOCKING PLANTS

ISLETA

Junction and east switches of sidings and west switch Coast Lines siding are controlled by interlocker.

The following whistle signals will be used:

- Coast Lines Main Track, ———
- Coast Lines Siding, ———○———
- New Mexico Main Track, ———○———
- New Mexico Siding, ———○○———

DALIES

Superior route to Sandia.

Inferior route to Belen.

Junction switch and east and west switches both sidings controlled by interlocker.

The following whistle signals will be used:

Westward:

- To Westward Main Track, ———
- To Eastward Main Track, ———○———

Eastward:

- To Sandia Main Track, ———
- To Belen Main Track, ———○———
- To North Siding, ———○———
- To South Siding, ———○○———

Rule 711: The indication given by interlocking signals at Isleta and Dalies will be superior to right, class or direction for movements within home signal limits.

Trains held by signals governing west siding switch at Isleta or east siding switches at Dalies will call on telephone.

(Continued from Page 3)

applied on rear car, when they shall be again released and when fully released and recharged on rear car, train may proceed.

27. Rule 701: Red lights will be used in dwarf signals to indicate "Stop."

28. Nos. 1, 3 and 4 will stop on flag at Adamana and Isleta to pick up or discharge detour passengers.

Train No. 4 stop at any station to pick up passengers for Albuquerque and east.

No. 9 will stop at Isleta to discharge revenue passengers originating east of Albuquerque, and will stop at any station west of Isleta to discharge revenue passengers originating at Albuquerque or east and south thereof.

Nos. 2 and 24 will stop on flag at any station to receive revenue passengers for Belen or for points east or south thereof.

SPRING SWITCHES

29. Gallup—Switch from eastward freight lead to eastward main track east of passenger station, normally lined for eastward freight lead.

Winslow—West end of yard, switch from yard lead to westward main track.

Seligman—East yard lead to eastward main track.

Maximum speed trailing through spring switches must not exceed 25 miles per hour.

Reverse movements must not be attempted until switches are properly lined by hand. If stop is made with train on spring switch, care must be taken to control slack action and avoid backward movement.

Trains finding signals or point indicators, immediately in advance of facing point spring switches, in stop position, must examine points before proceeding.

FIRST AND BELEN DISTRICTS

30. New Mexico Division time table and rules govern between Albuquerque and Isleta, and between Belen station and junction with Albuquerque Division at west end of yard.

31. Double track with automatic signals between Dalies and Gallup. Trains must keep to the left.

Double track extends through Gallup passenger yard.

No. 1 is westward main track.

No. 3 is eastward main track.

Automatic signals between Isleta, Dalies and Belen.

At meeting points between Isleta, Dalies and Belen train holding main track will not line switch for opposing train to enter siding, until such train has passed next opposing signal.

At Belen: automatic signals govern movements over crossing between New Mexico and Albuquerque Divisions main tracks west end of yard.

SECOND DISTRICT

32. Double track with automatic signals between Gallup and D. T. Junction, and between Joseph City and Winslow. Trains must keep to the left. Automatic signals between D. T. Junction and Joseph City; at meeting points, trains holding main track will not line switch for opposing train to enter siding, until such train has passed next opposing signal.

33. At D. T. Junction time will apply at end of double track, which is cross-over west of office. Interlocking plant controls junction switch and entrance to westward siding.

At Joseph City time will apply at end of double track east of office. Interlocking plant controls junction switch.

34. At Winslow, interlocking plant controls switch from westward main track to freight lead. Trains held by signals governing this switch will call on telephone. Westward trains will sound whistle signal per Rule 820-A or 820-B at sign 400 feet east of microphone near MP 282½.

THIRD AND GRAND CANYON DISTRICTS

35. Double track with automatic signals between Winslow and Seligman.

Trains must keep to the left between Winslow and overhead bridge No. A-412-A near Mile Post 411, and to the right between this bridge and Seligman.

Rule 703 (A): On eastward track, automatic signals indicate "Proceed," "Medium Speed," or "Restricted Speed," only, from Signal 3992, east of Ash Fork, to Signal 3832-A, west of Supai, inclusive.

Double track extends through following passenger yards:

Winslow, No. 1 is eastward freight lead,
No. 2 is eastward passenger main track,
No. 3 is westward main track.

Williams, No. 1 is Grand Canyon District main track,
No. 2 is eastward main track,
No. 3 is westward main track.

Ash Fork, No. 1 is Fourth District main track,
No. 2 is westward main track,
No. 3 is eastward main track.

Seligman, No. 1 is westward main track,
No. 2 is eastward main track.

36. Rule 830 (b): At Supai, westward trains finding Signal 3821 and at Crookton eastward trains finding Signal 4142-A in "Stop" position must wait five minutes before proceeding, unless signals change to indicate proceed.

37. Rule 711: Automatic block signals govern train movements through gauntlet Bridge A-313, Canyon Diablo. The indications given by Signals 3121, 3122, 3123 and 3124 are superior to right, class and direction, subject to provisions of Rule 830 (a). If necessary to flag across bridge, flagman must proceed entirely across bridge, before being followed by train.

38. Not more than two engines of any class may be coupled together over Bridge A-313, Canyon Diablo.

39. The maximum tonnage per operative brake in freight service Supai to Ash Fork and on the Grand Canyon District is seventy-five tons.

40. Westward freight trains must stop ten minutes at Daze and eastward freight trains ten minutes at any station, Cliffs to Angell inclusive, for inspection of train and cooling wheels.

41. Ash Fork: Fourth District freight train entering yard use west crossover and long lead. West switch of crossover and west switch of crossover between westward and eastward Third District main tracks electrically locked, controlled by operator in station. If no Third District train closely approaching, operator will release lock and permit train to enter yard. If delayed in crossing over, train must protect as prescribed by Rule D-99.

Further instructions inside locking case; if unable to operate use telephone and advise operator.

42. Rule D-99: At Riordan cross-over movements are permitted governed by signal indication.

Trains and engines turning at Riordan to proceed westward, will be governed by Rule D-152, and when leaving westward leg of wye will be governed by the indication given by dwarf signal located at west end, and must receive a "proceed" signal before proceeding or fouling the circuit in advance of the signal.

A telephone and siren are located on opposite side of the wye track from dwarf signal. Enginemen failing to receive proceed indication or upon sound of the siren will promptly communicate with the operator at Flagstaff.

43. Rule 97 and Special Rule 13: Yellow indication of the dwarf signal will authorize the movement, with current of traffic, on westward track Riordan to Williams without clearance card, Form 902, or Form "G" train order, except if provision has been made for the use of a section of double track as single track between these points, a Form G train order must be obtained before proceeding.

Operator at Flagstaff must be authorized by train order before giving a proceed indication at Riordan and will maintain on Form 862 Standard a record of all westward trains passing Riordan.

FOURTH, CLARKDALE, AND CROWN KING DISTRICTS

44. At Prescott and Alto, switches on stems of wyes must be left lined for west leg.

At Skull Valley and Congress switches on stems of wyes must be left lined for east leg.

45. The maximum tonnage per operative brake in freight service between Prescott and Skull Valley and on the Crown King District is seventy-five tons.

46. Westward freight trains must consume ten minutes at Ramsgate for inspection of train and cooling wheels.

47. Over Bridges B-22, west of Drake, and E-74, west of Ramsgate, engines heavier than 3700 or 3800 class must not be coupled together; engines of 3700 or 3800 class or lighter may be coupled together over these bridges, but when so coupled must not exceed twenty miles per hour.

48. Trains in which are high rack cars loaded with coke must not exceed 24 miles an hour, (one mile in two minutes and thirty seconds).

49. Train movements on Beardsley and Bumstead Spurs must be authorized by train order.

50. At Clarkdale, a spring derail switch is located in upper yard below station, which is trailed through when entering yard and when leaving must be lined for movement and afterward restored to derail.

51. Santa Fe and Southern Pacific trains may jointly use tracks at east and west end of Union Depot at Phoenix.

Yard and light engines must take every precaution to avoid delaying first-class trains on all tracks within Union Depot zone.

Trains will approach switch at entrance to Union Depot tracks prepared to stop and will proceed only when track is known to be clear.

52. At Phoenix, electrically locked derail located on stem of wye to protect crossing with Southern Pacific main track. If derail cannot be opened, release by push button located on post near by.
